La Conversation Fracturée Clanton C.W. Dawson Jr.,2017-12-14 This project is a philosophical analysis of the dominant concepts of race that prevail within contemporary American society It is the claim of this book that four main concepts attempt to answer the question what is race The four concepts are racial essentialism race as a social construct with objective status racial nihilism and race as an existential phenomenological process Each concept fails however in providing the necessary and sufficient conditions for a satisfactory concept of race and thus the project calls for a new conceptual framework for answering the question what is race

The Routledge Companion to the Philosophy of Race Paul Taylor,Linda Alcoff,Luvell Anderson,2017-11-28 For many decades race and racism have been common areas of study in departments of sociology history political science English and anthropology Much more recently as the historical concept of race and racial categories have faced significant scientific and political challenges philosophers have become more interested in these areas This changing understanding of the ontology of race has invited inquiry from researchers in moral philosophy metaphysics epistemology philosophy of science philosophy of language and aesthetics The Routledge Companion to Philosophy of Race offers in one comprehensive volume newly written articles on race from the world s leading analytic and continental philosophers It is however accessible to a readership beyond philosophy as well providing a cohesive reference for a wide student and academic readership The Companion synthesizes current philosophical understandings of race providing 37 chapters on the history of philosophy and race as well as how race might be investigated in the usual frameworks of contemporary philosophy The volume concludes with a section

on philosophical approaches to some topics with broad interest outside of philosophy like colonialism affirmative action eugenics immigration race and disability and post racialism By clearly explaining and carefully organizing the leading current philosophical thinking on race this timely collection will help define the subject and bring renewed understanding of race to students and researchers in the humanities social science and sciences **The Philosophy of Race** Albert Atkin, 2014-10-14 Race is so highly charged and loaded a concept it often hampers critical thinking about racial practice and policy A philosophical approach allows us to isolate and analyse the key questions What is race Can we do without race What is racism and why is it wrong What should our policies on race and racism be The Philosophy of Race presents a concise and up to date overview of the central philosophical debates about race It then builds on this philosophical foundation to analyse the sociopolitical questions of racism and race relevant policy Throughout the discussion is illustrated with a wide range of examples Afro American blackness British Asian racial formation Aboriginal identity in Australia the racial grouping of Romany Gypsies and Jews in Europe categories of race in Brazil and the concept of model minorities in the US and UK **A Realist Metaphysics of Race** Jeremy Pierce, 2014-12-11 In A Realist Metaphysics of Race A Context Sensitive Short Term Retentionist Long Term Revisionist Approach Jeremy Pierce defends a social kind view of racial categories On this view the biological features we use to classify people racially do not make races natural kinds Rather races exist because of contingent social practices single out certain groups of people as races give them social importance and allow us to name them as races Pierce also identifies several kinds of context sensitivity as central to how racial categorization works and argues that we need racial categories to identify problems in how our racial constructions are formed including the harmful effects of racial constructions Hence rather than seeking to eliminate such categories Pierce argues that we should also make efforts to change the conditions that generate their problematic elements with an eye toward retaining only the unproblematic aspects A Realist Metaphysics of Race contains insights relevant not just to professional philosophers in metaphysics philosophy of race social philosophy philosophy of language and philosophy of science but also to students and scholars working in sociology biology anthropology ethnic studies and political science **The Rise and Fall of the Caucasian Race** Bruce Baum, 2008-07-01 The term Caucasian is a curious invention of the modern age Originating in 1795 the word identifies both the peoples of the Caucasus Mountains region as well as those thought to be Caucasian Bruce Baum explores the history of the term and the category of the Caucasian race more broadly in the light of the changing politics of racial theory and notions of racial identity With a comprehensive sweep that encompasses the understanding of race even before the use of the term Caucasian Baum traces the major trends in scientific and intellectual understandings of race from the Middle Ages to the present day Baum's conclusions make an unprecedented attempt to separate modern science and politics from a long history of racial classification He offers significant insights into our understanding of race and how the Caucasian race has been authoritatively invented embraced displaced and recovered throughout our history **Black**

Bodies, White Gazes George Yancy, 2008-09-26 Click here to listen to George Yancy's radio interview with C S Soong on Against the Grain Black Bodies White Gazes The Continuing Significance of Race understands Black embodiment within the context of white hegemony within the context of a racist anti Black world George Yancy examines themes such as double consciousness invisibility and corporeal malediction that capture the lived reality of Black bodies under tremendous existential duress He demonstrates that the Black body is a historically lived text on which whites have inscribed their projections which speak equally forcefully to whites own self conceptions

The Routledge Handbook of the Ethics of Discrimination Kasper Lippert-Rasmussen, 2017-08-23 While it has many connections to other topics in normative and applied ethics discrimination is a central subject in philosophy in its own right It plays a significant role in relation to many real life complaints about unjust treatment or unjust inequalities and it raises a number of questions in political and moral philosophy and in legal theory Some of these questions include what distinguishes the concept of discrimination from the concept of differential treatment What distinguishes direct from indirect discrimination Is discrimination always morally wrong What makes discrimination wrong How should we eliminate the effects of discrimination By covering a wide range of topics and by doing so in a way that does not assume prior acquaintance this handbook enables the reader to get to grips with the omnipresent issue The Routledge Handbook of the Ethics of Discrimination is an outstanding reference source to this exciting subject and the first collection of its kind Comprising over thirty chapters by a team of international contributors the handbook is divided into six main parts conceptual issues the wrongness of discrimination groups of discriminatees sites of discrimination causes and means history of discrimination Essential reading for students and researchers in applied ethics and political philosophy the handbook will also be very useful for those in related fields such as law sociology and politics

The Concept of Race in International Criminal Law Carola Lingaas, 2019-09-19 Members of racial groups are protected under international law against genocide persecution and apartheid But what is race and why was this contentious term not discussed when drafting the Statute of the International Criminal Court Although the law uses this term is it legitimate to talk about race today let alone convict anyone for committing a crime against a racial group This book is the first comprehensive study of the concept of race in international criminal law It explores the theoretical underpinnings for the crimes of genocide apartheid and persecution and analyses all the relevant legal instruments case law and scholarship It exposes how the international criminal tribunals have largely circumvented the topic of race and how incoherent jurisprudence has resulted in inconsistent protection The book provides important new interpretations of a problematic concept by subjecting it to a multifaceted and interdisciplinary analysis The study argues that race in international criminal law should be constructed according to the perpetrator's perception of the victims ostensible racial otherness The perpetrator's imagination as manifested through his behaviour defines the victims racial group membership It will be of interest to students and practitioners of international criminal law as well as those studying genocide apartheid and race in

domestic and international law **A Cultural History of Race in Antiquity** Denise Eileen McCoskey, 2023-06-01 The era generally referred to as antiquity lasted for thousands of years and was characterized by a diverse range of peoples and cultural systems This volume explores some of the specific ways race was defined and mobilized by different groups including the Greeks Romans Egyptians Persians and Ethiopians as they came into contact with one another during this period Key to this inquiry is the examination of institutions such as religion and politics and forms of knowledge such as science that circumscribed the formation of ancient racial identities and helped determine their meanings and consequences Drawing on a range of ancient evidence literature historical writing documentary evidence and ancient art and archaeology this volume highlights both the complexity of ancient racial ideas and the often violent and asymmetrical power structures embedded in ancient racial representations and practices like war and the enslavement of other persons The study of race in antiquity has long been clouded by modern assumptions so this volume also seeks to outline a better method for apprehending race on its own terms in the ancient world including its relationship to other forms of identity such as ethnicity and gender while also seeking to identify and debunk some of the racist methods and biases that have been promulgated by classical historians themselves over the last few centuries **Calculating Race** Benjamin Wiggins, 2020-10-08 In *Calculating Race* Benjamin Wiggins analyzes the historical relationship between statistical risk assessment and race in the United States He illustrates how through a reliance on the variable of race actuarial science transformed the nature of racism and helped usher racial disparities in wealth incarceration and housing from the nineteenth century into the twentieth Wiggins begins by tracing how the life insurance industry utilized race in its calculations at the end of the nineteenth century focusing particularly on Prudential and its aggressive battles with state regulators to discriminate against clients and adjust rates on the basis of race He then turns his focus to the collection of racial statistics in the Illinois state penitentiary system in the late nineteenth century and the state's subsequent development of predictive sentencing and parole formulas in the 1920s that weighed race as a key factor Next he investigates the role of race in the state sponsored mortgage insurance program of the Federal Housing Administration between the start of the New Deal and the beginning of the Cold War and its prolonged effects on mortgage lending Wiggins concludes with an analysis of the use of race in the statistical risk assessments across financial institutions and government programs during the post civil rights movement era and how that practice has been transformed in the twenty first century through proxy variables which stand in for the now taboo category of race Offering readers a new perspective on the historical importance of actuarial science in structural racism *Calculating Race* is a particularly timely contribution as Big Data and algorithmic decision making increasingly pervade our lives *The Assisted Reproduction of Race* Camisha A. Russell, 2018-12-06 The use of assisted reproductive technologies ART in vitro fertilization artificial insemination and gestational surrogacy challenges contemporary notions of what it means to be parents or families Camisha A Russell argues that these technologies also bring new insight to ideas and questions surrounding race In her view if we

think of ART as medical technology we might be surprised by the importance that people using them put on race especially given the scientific evidence that race lacks a genetic basis However if we think of ART as an intervention to make babies and parents as technologies of kinship the importance placed on race may not be so surprising after all Thinking about race in terms of technology brings together the common academic insight that race is a social construction with the equally important insight that race is a political tool which has been and continues to be used in different contexts for a variety of ends including social cohesion economic exploitation and political mastery As Russell explores ideas about race through their role in ART she brings together social and political views to shift debates from what race is to what race does how it is used and what effects it has had in the world

The Oxford Handbook of Philosophy and Race Naomi Zack, 2017 The Oxford Handbook of Philosophy and Race provides up to date explanation and analyses by leading scholars in African American philosophy and philosophy of race Fifty one original essays cover major topics from intellectual history to contemporary social controversies in this emerging philosophical subfield that supports demographic inclusion and emphasizes cultural relevance

Teaching Race in Perilous Times Jason E. Cohen, Sharon D. Raynor, Dwayne A. Mack, 2021-03-01 The college classroom is inevitably influenced by and in turn influences the world around it In the United States this means the complex topic of race can come into play in ways that are both explicit and implicit Teaching Race in Perilous Times highlights and confronts the challenges of teaching race in the United States from syllabus development and pedagogical strategies to accreditation and curricular reform Across fifteen original essays contributors draw on their experiences teaching in different institutional contexts and adopt various qualitative methods from their home disciplines to offer practical strategies for discussing race and racism with students while also reflecting on broader issues in higher education Contributors examine how teachers can respond productively to emotionally charged contexts recognize the roles and pressures that faculty assume as activists in the classroom focus a timely lens on the shifting racial politics and economics of higher education and call for a more historically sensitive reading of the pedagogies involved in teaching race The volume offers a corrective to claims following the 2016 US presidential election that the current moment is unprecedented highlighting the pivotal role of the classroom in contextualizing and responding to our perilous times
