Race Class And The World System The Sociology Of Oliver C Cox:

Race, Class, and the World System Herbert Hunter, Sameer Y. Abraham, 1987 The World-System and Africa Immanuel Wallerstein, 2017-05-31 In *The World System and Africa* Immanuel Wallerstein examines three important interconnected themes that link Africa and the capitalist world system of the last 500 years While drawing attention to the structural crisis of the modern world system Wallerstein uses the first set of essays to explore the impact of this worldwide structural crisis on Africa Next he turns to identity politics a political stance that came to prominence in the last thirty years and considers the world system context for the African dilemmas posed by this approach Not unique to Africa identity politics has become central to political struggles everywhere in the world system Finally Wallerstein reflects on African thinkers analyses of current affairs both in the world system and in Africa Coming from someone who has been involved in writing about Africa for over seventy years Wallerstein argues that if Africa is going to play an appropriate and significant role in resolving the structural crisis of the modern world system it is crucial that there continue to be a well informed and intellectually relevant debate about the issues involved the moral choices to be made and the political strategies to follow

A Different Vision Thomas D Boston, 2002-01-04 *A Different Vision* African American Economic Thought brings together for the first time the ideas philosophies and interpretations of North America s leading African American economists Presented in two volumes Volume 1 includes An in depth discussion of the economics of race and gender Assessments of the contribution and influence of major African American economists and economic philosophies An examination of racism within the economics profession An interdisciplinary approach which is largely free of technical jargon The volumes draw the inescapable conclusion that racial inequality has had an immense impact in every sphere of African American life Race and Ethnicity: Debates and controversies Harry Goulbourne, 2001 **Shades of Difference** Richard Rees, 2007-02-23 From its prehistory in the biological theories of racial difference formulated in the 1800s to its current position in academic debate Richard Rees investigates the diverse fields of scholarship from which the multifaceted understanding of the term ethnicity is derived At the same time Rees traces the broader historical forces that shaped the needs to which the concept of ethnicity responded and the social purposes to which it was applied Centrally he focuses upon the emergence of ethnicity in the early 1940s as a means of resolving contradictions and ambiguities in the racial status of European immigrants and its subsequent legacy and implications on race and caste *Shades of Difference* introduces new perspectives on the definition of whiteness in America and makes an original contribution to the larger discussion of race through a detailed account of ethnicity s original meaning and its revaluation when later appropriated by the discourse of Black Nationalism in the 1960s and 70s Rees has produced a powerful new analysis of the cultural and political history of ethnicity in America *Encyclopedia of African American Business History* Juliet E. K. Walker, 1999-11-30 Black business activity has been sustained in America for almost four centuries From the marketing and trading activities of African slaves in Colonial America to the rise of 20th century

black corporate America African American participation in self employed economic activities has been a persistent theme in the black experience Yet unlike other topics in African American history the study of black business has been limited General reference sources on the black experience with their emphasis on social cultural and political life provide little information on topics related to the history of black business This invaluable encyclopedia is the only reference source providing information on the broad range of topics that illuminate black business history Providing readily accessible information on the black business experience the encyclopedia provides an overview of black business activities and underscores the existence of a historic tradition of black American business participation Entries range from biographies of black business people to overview surveys of business activities from the 1600s to the 1990s including slave and free black business activities and the Black Wallstreet to coverage of black women s business activities and discussions of such African American specific industries as catering funeral enterprises insurance and hair care and cosmetic products Also there are entries on blacks in the automotive parts industry black investment banks black companies listed on the stock market blacks and corporate America civil rights and black business and black athletes and business activities

African American Pioneers of Sociology Pierre Saint-Arnaud,2009-02-07 In *African American Pioneers of Sociology* Pierre Saint Arnaud examines the lasting contributions that African Americans have made to the field of sociology Arguing that science is anything but a neutral construct he defends the radical stances taken by early African American sociologists from accusations of intellectual infirmity by foregrounding the racist historical context of the time these influential works were produced Examining key figures such as W E B Du Bois Edward Franklin Frazier Charles Spurgeon Johnson Horace Roscoe Cayton J G St Clair Drake and Oliver Cromwell Cox Saint Arnaud reveals the ways in which many aspects of modern sociology emerged from these authors radical views on race gender religion and class Beautifully translated from its original French *African American Pioneers of Sociology* is a stunning examination of the influence of African American intellectuals and an essential work for understanding the origins of sociology as a modern discipline

The Mind of Oliver C. Cox Christopher McAuley,2004 Born in Trinidad in 1901 Oliver C Cox immigrated to the US in 1919 establishing himself as a controversial sociologist McAuley s approach to Cox s life and work is shaped by his belief that Cox s Caribbean upbringing and background gave him an unorthodox perspective on race and social change

E. Franklin Frazier and Black Bourgeoisie James E. Teele,2002-05-02 When E Franklin Frazier was elected the first black president of the American Sociological Association in 1948 he was established as the leading American scholar on the black family and was also recognized as a leading theorist on the dynamics of social change and race relations By 1948 his lengthy list of publications included over fifty articles and four major books including the acclaimed *Negro Family in the United*

States Frazier was known for his thorough scholarship and his mastery of skills in both history and sociology. With the publication of *Bourgeoisie Noire* in 1955 translated in 1957 as *Black Bourgeoisie*, Frazier apparently set out on a different track one in which he employed his skills in a critical analysis of the black middle class. The book met with mixed reviews and harsh criticism from the black middle and professional class. Yet Frazier stood solidly by his argument that the black middle class was marked by conspicuous consumption, wish fulfillment, and a world of make believe. While Frazier published four additional books after 1948, *Black Bourgeoisie* remained by far his most controversial. Given his status in American sociology, there has been surprisingly little study of Frazier's work. In *E. Franklin Frazier and Black Bourgeoisie*, a group of distinguished scholars remedies that lack by focusing on his often scorned *Black Bourgeoisie*. This in-depth look at Frazier's controversial publication is relevant to the growing concerns about racism, problems in our cities, the limitations of affirmative action, and the promise of self-help.

American Capitalism Nelson Lichtenstein, 2011-06-03 At the dawn of the twenty first century the legitimacy of American capitalism seems unchallenged The link between open markets economic growth and democratic success has become common wisdom not only among policy makers but for many intellectuals as well In this instance however the past has hardly been prologue to contemporary confidence in the free market American Capitalism presents thirteen thought provoking essays that explain how a variety of individuals many prominent intellectuals but others partisans in the combative world of business and policy engaged with anxieties about the seismic economic changes in postwar America and in the process reconfigured the early twentieth century ideology that put critique of economic power and privilege at its center The essays consider a broad spectrum of figures from C L R James and John Kenneth Galbraith to Peter Drucker and Ayn Rand and topics ranging from theories of Cold War convergence to the rise of the philanthropic Right They examine how the shift away from political economy at midcentury paved the way for the 1960s and the culture wars that followed Contributors interrogate what was lost and gained when intellectuals moved their focus from political economy to cultural criticism The volume thereby offers a blueprint for a dramatic reevaluation of how we should think about the trajectory of American intellectual history in twentieth century United States
