Handbook on the Geographies of Power Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war

Development of Geocentric Spatial Language and Cognition Pierre R. Dasen, Ramesh C. Mishra, 2010-08-12 Egocentric spatial language uses coordinates in relation to our body to talk about small scale space put the knife on the right of the plate and the fork on the left while geocentric spatial language uses geographic coordinates put the knife to the east and the fork to the west How do children learn to use geocentric language And why do geocentric spatial references sound strange in English when they are standard practice in other languages This book studies child development in Bali India Nepal and Switzerland and explores how children learn to use a geocentric frame both when speaking and performing non verbal cognitive tasks such as remembering locations and directions The authors examine how these skills develop with age look at the socio cultural contexts in which the learning takes place and explore the ecological cultural social and linguistic conditions that favor the use of a geocentric frame of reference [The Globalization of World Politics](#) John Baylis, Steve Smith, Patricia Owens, 2017 This title provides an introduction to international relations IR supporting over 300 000 students taking their first steps in IR and beyond **Encyclopedia of the Developing World** Thomas M.
