Rael, 2003-01-14 Frederick Douglass Sojourner Truth Martin Delany these figures stand out in the annals of black protest for their vital antislavery efforts But what of the rest of their generation the thousands of other free blacks in the North Patrick Rael explores the tradition of protest and sense of racial identity forged by both famous and lesser known black leaders in antebellum America and illuminates the ideas that united these activists across a wide array of divisions In so doing he reveals the roots of the arguments that still resound in the struggle for justice today Mining sources that include newspapers and pamphlets of the black national press speeches and sermons slave narratives and personal memoirs Rael recovers the voices of an extraordinary range of black leaders in the first half of the nineteenth century He traces how these activists constructed a black American identity through their participation in the discourse of the public sphere and how this identity in turn informed their critiques of a nation predicated on freedom but devoted to white supremacy His analysis explains how their place in the industrializing urbanizing antebellum North offered black leaders a unique opportunity to smooth over class and other tensions among themselves and successfully galvanize the race against slavery **Theology and Slavery**

David Torbett, 2006 This book examines two important American Protestant theologians the archconservative Charles Hodge 1797 1878 and the archliberal Horace Bushnell 1802 1876 and their stances on racial slavery Hodge with his rigid doctrine of biblical inerrancy and Bushnell with his open ended experiential theology represent two poles of thought that continually

assert themselves when American Protestants speak out on social issues This book provides a case study in the moral implications of each of these enduring polarities and upsets conventional understandings of the relationship of conservative and liberal Protestantism to slavery and race The ambivalent attitudes of both men toward slavery and race are significant aspects of both of their enduring intellectual legacies This is the first book length comparison of these two theologians on this subject

**"I'm Not a Racist, But..."** Lawrence Blum, 2015-08-01 Not all racial incidents are racist incidents Lawrence Blum says We need a more varied and nuanced moral vocabulary for talking about the arena of race We should not be faced with a choice of racism or nothing Use of the word racism is pervasive An article about the NAACP's criticism of television networks for casting too few minority actors in lead roles asks Is television a racist institution A white girl in Virginia says it is racist for her African American teacher to wear African attire Blum argues that a growing tendency to castigate as racism everything that goes wrong in the racial domain reduces the term's power to evoke moral outrage In *I'm Not a Racist But* Blum develops a historically grounded account of racism as the deeply morally charged notion it has become He addresses the question whether people of color can be racist defines types of racism and identifies debased and inappropriate usages of the term Though racial insensitivity racial anxiety racial ignorance and racial injustice are in his view not racism they are racial ills that should elicit moral concern Blum argues that race itself even when not serving distinct racial malfeasance is a morally destructive idea implying moral distance and unequal worth History and genetic science reveal both the avoidability and the falsity of the idea of race Blum argues that we can give up the idea of race but must recognize that racial groups historical and social experience has been shaped by having been treated as if they were races Racial Segregation and Eugenic Science Between the Wars Michael L. Blakey, 2025-07-18 This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenic solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world

community began its turn against racism in science and society In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies     *The Young East* ,1925     *Becoming African in America* James Sidbury,2007-09-27 The first slaves imported to America did not see themselves as African but rather as Temne Igbo or Yoruban In *Becoming African in America* James Sidbury reveals how an African identity emerged in the late eighteenth century Atlantic world tracing the development of African from a degrading term connoting savage people to a word that was a source of pride and unity for the diverse victims of the Atlantic slave trade In this wide ranging work Sidbury first examines the work of black writers such as Ignatius Sancho in England and Phillis Wheatley in America who created a narrative of African identity that took its meaning from the diaspora a narrative that began with enslavement and the experience of the Middle Passage allowing people of various ethnic backgrounds to become African by virtue of sharing the oppression of slavery He looks at political activists who worked within the emerging antislavery moment in England and North America in the 1780s and 1790s he describes the rise of the African church movement in various cities most notably the establishment of the African Methodist Episcopal Church as an independent denomination and the efforts of wealthy sea captain Paul Cuffe to initiate a black controlled emigration movement that would forge ties between Sierra Leone and blacks in North America and he examines in detail the efforts of blacks to emigrate to Africa founding Sierra Leone and Liberia Elegantly written and astutely reasoned *Becoming African in America* weaves together intellectual social cultural religious and political threads into an important contribution to African American history one that fundamentally revises our picture of the rich and complicated roots of African nationalist thought in the U S and the black Atlantic     '*Mixed Race*' *Studies* Jayne O.
