Fighting in the Dark Vincent P. O'Hara, Trent Hone, 2025-01-16 Fighting in the Dark is a new book about naval combat at night the title also however signifies the overarching theme of the book of moving from dark to light in short the process of mastering technological change during war The authors start with the proposition that it is hard to hit an invisible target particularly one in motion In the nineteenth century when ships relied upon visual signaling and vessels beyond hailing range were deaf and mute in the dark night battles at sea were rare and largely accidental Three inventions changed this the torpedo the searchlight and the radio These inventions at the end of the nineteenth and start of the twentieth centuries transformed naval warfare by making combat in the dark feasible and in some cases desirable The process by which navies used the dark and adapted it into a medium for effective combat was long and difficult more so for some than others This book is about that process and about how Russian British German Italian Japanese and US navies confronted the specific new challenges and adapted to unfamiliar situations and emerging technologies Fighting in the Dark consists of chapters written by a group of highly respected naval historians and the book's approach illuminates how different navies and cultures approached common problems The fierce night time battles that are described serve as a metaphor for the larger issues and the reader is led along a fascinating journey of naval warfare from the Russo Japanese War through WWI to the Second

Innovating Victory Vincent O'Hara,Leonard R Heinz,2022-04-15 Innovating Victory Naval Technology in Three Wars studies how the world's navies incorporated new technologies into their ships their practices and their doctrine It does this by examining six core technologies fundamental to twentieth century naval warfare including new platforms submarines and aircraft new weapons torpedoes and mines and new tools radar and radio Each chapter considers the state of a subject technology when it was first used in war and what navies expected of it It then looks at the way navies discovered and developed the technology's best use in many cases overcoming disappointed expectations It considers how a new technology threatened its opponents not to mention its users and how those threats were managed Innovating Victory shows that the use of technology is more than introducing and mastering a new weapon or system Differences in national resources force mixtures priorities perceptions and missions forced nations to approach the problems presented by new technologies in different ways Navies that specialized in specific technologies often held advantages over

enemies in some areas but found themselves disadvantaged in others Vincent P O Hara and Leonard R Heinz present new perspectives and explore the process of technological introduction and innovation in a way that is relevant to today's navies which face challenges and questions even greater than those of 1904 1914 and 1939 *Yachting*, 2006-01 Science!, 2nd Edition DK, 2025-04-01 DK's best selling richly illustrated encyclopedia series explores the wonderful world of science Learn the ins and outs of science as you've never seen it before through incredibly detailed 3D illustrations in this encyclopedia for children aged 9 Knowledge Encyclopedia's clear explanations illustrations photographs and 3D images will engage children in complex subjects Learn about hundreds of vehicles that float fly or speed across the land including the record breakers the fastest largest longest and strangest modes of transportation ever to zoom sail or soar This all encompassing science encyclopedia for kids offers An impressive collection of facts charts timelines and illustrations A visual approach using illustrations photographs and extremely detailed 3D CGI images Clear explanations of physics chemistry and biology as well as space exploration the latest technology wonderful wildlife and our amazing bodies Children can explore science in a new and exciting way Learn about groundbreaking topics like looking inside a cell pulling apart the ever present electronics in our lives to see how they work showing how ships stay afloat and examining the forces that hold the Universe together This impressively detailed encyclopedia uses awesome illustrations to show biology chemistry and physics in the world around us All the essential information in easy to read text with additional fun facts and brought to life with amazing 3D illustrations that look inside the anatomy of a blue whale zoom into a molecule of water and out of the Solar System More in the series Knowledge Encyclopedia Science is part of DK's visual and hugely successful Knowledge Encyclopedia series Complete the collection and dive into the deep with Knowledge Encyclopedia Ocean take a trip to the solar system with Knowledge Encyclopedia Space and travel back to prehistoric times with Knowledge Encyclopedia Dinosaur *Marine Aviation* United States.
