Work, Learning and Sustainable Development John Fien, Rupert Maclean, Man-Gon Park, 2008-10-26 This book is the first that provides a comprehensive overview of the way countries education systems and institutions have responded to the call for an integration of learning for work citizenship and sustainability at the Second International Conference on Technical and Vocational Education which was held in Seoul in 1999 Discussions on the central theme of the Seoul Conference lifelong learning and training for all a bridge to the future led to the conclusion that a new paradigm of both development and Technical and Vocational Education TVET was needed This book showcases the wide range of international initiatives that

have sought to put such exhortations into practice It includes case studies of national TVET policy reforms reoriented curricula sustainable campus management programs and examples of innovative approaches to integrating learning in TVET with on the job training and in community service It also focuses on the issues and challenges being faced and ways of moving forward Case studies feature initiatives in a wide range of world regions and countries and include authors from UK Germany Finland Canada USA Australia South Africa China Republic of Korea India Pakistan and the Philippines

Value-Based Software Engineering Stefan Biffl,Aybuke Aurum,Barry Boehm,Hakan Erdogmus,Paul Grünbacher,2006-02-23 The IT community has always struggled with questions concerning the value of an organization s investment in software and hardware It is the goal of value based software engineering VBSE to develop models and measures of value which are of use for managers developers and users as they make tradeoff decisions between for example quality and cost or functionality and schedule such decisions must be economically feasible and comprehensible to the stakeholders with differing value perspectives VBSE has its roots in work on software engineering economics pioneered by Barry Boehm in the early 1980s However the emergence of a wider scope that defines VBSE is more recent VBSE extends the merely technical ISO software engineering definition with elements not only from economics but also from cognitive science finance management science behavioral sciences and decision sciences giving rise to a truly multi disciplinary framework Biffl and his co editors invited leading researchers and structured their contributions into three parts following an introduction into the area by Boehm himself They first detail the foundations of VBSE followed by a presentation of state of the art methods and techniques The third part demonstrates the benefits of VBSE through concrete examples and case studies This book deviates from the more anecdotal style of many management oriented software engineering books and so appeals particularly to all readers who are interested in solid foundations for high level aspects of software engineering decision making i e to product or project managers driven by economics and to software engineering researchers and students

International Finance H. Kent Baker (ed.), Leigh A. Riddick, 2013 Understanding the current state of affairs and tools available in the study of international

finance is increasingly important as few areas in finance can be divorced completely from international issues International Finance reflects the new diversity of interest in international finance by bringing together a set of chapters that summarizes and synthesizes developments to date in the many and varied areas that are now viewed as having international content The book attempts to differentiate between what is known what is believed and what is still being debated about international finance The survey nature of this book involves tradeoffs that inevitably had to be made in the process given the vast footprint that constitutes international finance No single book can cover everything This book however tries to maintain a balance between the micro and macro aspects of international finance Although each chapter is self contained the chapters form a logical whole that follows a logical sequence The book is organized into five broad categories of interest 1 exchange rates and risk management 2 international financial markets and institutions 3 international investing 4 international financial management and 5 special topics The chapters cover market integration financial crisis and the links between financial markets and development in some detail as they relate to these areas In each instance the contributors to this book discuss developments in the field to date and explain the importance of each area to finance as a field of study Consequently the strategic focus of the book is both broad and narrow depending on the reader's needs The entire book provides a broad picture of the current state of international finance but a reader with more focused interests will find individual chapters illuminating on specific topics
