text These children are disadvantaged because their brains work differently and they think and respond differently This book embraces a different metaphor for teaching literacy that does not compartmentalize the curriculum into separate areas such as spelling reading writing listening speaking and presenting Instead the focus is on assessing their written language as a place to start in planning for success An unassisted sample of a learners writing could be said to be an example of what they understand of literacy whether it be a scribble at three or an essay at twelve I have proved conclusively that if teacher and student work collaboratively on improving their writing using their reading as a model their reading ability rises naturally This customized and individualized teaching method enables authentic teacher student interactions This not only allows the teacher to closely tailor their teaching to each students unique learning needs but it also brings the student on board in assessing their progress Teaching a Child to Read and Write Well will clear a path towards mastering literacy that can engage all students and lead to success for all Give it a go
