The Real Work of Data Science Ron S. Kenett, Thomas C. Redman, 2019-03-26 The essential guide for data scientists and for leaders who must get more from their data science teams The Economist boldly claims that data are now the world's most valuable resource But as Kenett and Redman so richly describe unlocking that value requires far more than technical excellence The Real Work of Data Science explores understanding the problems dealing with quality issues building trust with decision makers putting data science teams in the right organizational spots and helping companies become data driven This is the work that spells the difference between a good data scientist and a great one between a team that makes marginal contributions and one that drives the business between a company that gains some value from its data and one in which data truly is the most valuable resource These two authors are world class experts on analytics data management and data quality they've forgotten more about these topics than most of us will ever know Their book is pragmatic understandable and focused on what really counts If you want to do data science in any capacity you need to read it Thomas H Davenport Distinguished Professor Babson College and Fellow MIT Initiative on the Digital Economy I like your book The chapters address problems that have faced statisticians for generations updated to reflect today's issues such as computational Big Data Sir David Cox Warden of Nuffield College and Professor of Statistics Oxford University Data science is critical for competitiveness for good government for correct decisions But what is data science Kenett and Redman give by far the best introduction to the subject I have seen anywhere They address the critical questions of formulating the right problem collecting the right data doing the right analyses making the right decisions and measuring the actual impact of the decisions This book should become required reading in statistics and computer science departments business schools analytics institutes and most importantly by all business managers A Blanton Godfrey Joseph D Moore Distinguished University Professor Wilson College of Textiles North Carolina State University

Producing the Acceptable Sex Worker Gwyn Easterbrook-Smith, 2022-02-25 Producing the Acceptable Sex Worker considers how sex work is produced in news media narratives a site where much of the general public draws its understanding of the industry in the absence of lived interaction with it Taking New Zealand as a case study this book considers an emerging discourse of acceptability for some sex workers primarily those who do low volume indoor work Their acceptability is established in comparison with other kinds of sex workers resulting in a redistribution but not a reduction of stigma The conditions attached to acceptability reflect persistent anxieties about sex work workers who are acceptable must give the impression that the sexual labour of the job is enjoyable and virtually indistinguishable from their personal life eliding the work involved Unacceptable workers have existing marginalisations magnified by their association with the industry with migrant sex workers produced as devious or exploited and transgender women's involvement with the industry used to deny them the right to public space The conditions

attached to acceptability reveal how neoliberal discourses of choice desire authenticity and personal responsibility inform the formation of sex work in the public eye
