Kant's principle proposes Critical philosophy is here radically opposed to the pre-critical metaphysical tradition. Reality no longer appears as absolutely positive being which excludes all negativity from itself and negation is not reduced to being a simple removal, the mere absence of being. Instead, reality and negation behave as an equally positive something in respect to one another such that negation is itself a reality that is actively opposed to another reality. Such a definition of the relation between reality and negation became indispensable for post-Kantian Philosophy and represents a central aspect of Kantian inspired philosophy in respect to Leibnizian metaphysics. The present work therefore departs from the hypothesis that the essential philosophical importance of the Anticipations of Perception can only be fully measured by exploring its impact in the Post-Kantian debate.

Revelation of Reality Dinesh C. Bhargava, 2020-09-08 This book is for those in quest of Reality. The first two chapters deal with the Origin and Process of Creation. Nobel Prize winning quantum physicists and others of the twentieth century had their first non-sensory experience of reality as the Mystics did. The models of modern physics became akin to those of Eastern philosophy. Modern science has discovered a reality beyond the physical world endorsing ancient Vedic teachings of Illusion that Truth or Reality does not lie in what is seen but in what is unseen. Vedanta deals with the Origin and the Beginning of Creation. Science does not deal with the origin of the universe but only describes the early beginnings and evolutions after the event. CRNS Scientist The day science begins to study non-physical phenomena it will make more progress in one decade than in all the previous centuries of its existence. Nikolai Tesla The book refers to the world at a deeper level and describes the Sub-structure, the Absolute Substance and the Ground of all Existence. It describes how Mind creates matter by dissolving the distinction between subject and object through acts of conscious observation and interaction. Modern Science is changing western thinking to converge with the revelations of the ancient seers, re-strengthening mankind's belief in a Supreme Being. From here on, Nature, Man, and God all seem to converge.

Sacred Reality, Digital Simulation Enrico Beltramini, 2025-07-29 This study explores the relationship between the sacred and the virtual, emphasizing the sacred as a divinely dependent consecrated space activated through ritual mediating between the profane and the holy. The central argument is that the virtual is fundamentally incompatible with the ritual form, a concept developed by Romano Guardini and others including Joseph Ratzinger, which holds that the sacred is not merely acknowledged but made present through ritualized actions that require tangible participatory engagement. Even if the virtual realm were acknowledged as real and retained both the bodily presence of the faithful and the Divine Presence, the rite would still be ineffective. Virtuality prevents the proper enactment of the rite, rendering it ineffective. At its core, the ritual form is performative, embodied, and consecratory. It requires physical presence, material elements, and a structured sequence of gestures, symbols, and words that together make the divine encounter possible. Their absence in virtual spaces disrupts ritual form, compromising its sacramental function.

Satan and the Problem of Evil Gregory A. Boyd,2025-08-04 Where does evil come from If there is a sovereign creator God as Christian faith holds is this God ultimately responsible for evil Does God s sovereignty mean that God causes each instance of sin and suffering How do Satan his demons and hell fit into God s providential oversight of all creation and history How does God interact with human intention and action If people act freely does God know in particular every human decision before the choice is made In this important book Gregory A Boyd mounts a thorough response to these ages old questions which remain both crucial and contentious both practical and complex In this work Boyd defends his scripturally grounded trinitarian warfare theodicy presented in *God at War* with rigorous philosophical reflection and insights from human experience and scientific discovery Critiquing the classical Calvinist solution to the problem of evil he advocates an alternative understanding of the sovereignty of the trinitarian God and of the reality of Satan that sheds light on our fallen human condition While all may not agree with Boyd s conclusions *Satan and the Problem of Evil* promises to advance the church s discussion of these critical issues

Kant & Phenomenology Tom Rockmore,2011-01-22 Phenomenology together with Marxism pragmatism and analytic philosophy dominated philosophy in the twentieth century and Edmund Husserl is usually thought to have been the first to develop the concept His views influenced a variety of important later thinkers such as Heidegger and Merleau Ponty who eventually turned phenomenology away from questions of knowledge But here Tom Rockmore argues for a return to phenomenology s origins in epistemology and he does so by locating its roots in the work of Immanuel Kant *Kant and Phenomenology* traces the formulation of Kant s phenomenological approach back to the second edition of Kant s *Critique of Pure Reason* In response to various criticisms of the first edition Kant more forcefully put forth a constructivist theory of knowledge This shift in Kant s thinking challenged the representational approach to epistemology and it is this turn Rockmore contends that makes Kant the first great phenomenologist He then follows this phenomenological line through the work of Kant s idealist successors Fichte and Hegel Steeped in the sources and literature it examines Kant and *Phenomenology* persuasively reshapes our conception of both of its main subjects

Inside Reality Dr. Thomas Stark, There are those such as scientists who see only the outside of reality its appearance its surface its phenomenal aspect They are blind to the inside the substance the foundation the noumenal aspect They dismiss it as non existent or illusion or epiphenomenon Scientists are those that believe that phenomena have no underlying noumena What you see is what you get Seeing is believing Everything is appearance Nothing is concealed There are no hidden variables and no unobservables The scientific method says Observe That works only if everything is observable If there are foundational unobservables science is catastrophically wrong and has cut itself off from the truth The only truth it can furnish is that of surfaces and appearances with no substance Those who truly want to understand reality must become masters of both perspectives inside and outside noumenon and phenomenon and see how they relate communicate and interact

Eternal God, Eternal Life Philip G. Ziegler, 2016-09-22 How ought Christian faith and theology understand the concept of human immortality today And what if anything might be distinctively Christian about such a concept The contributors to this volume explore how our thinking

about the prospect of human immortality is decisively determined by what we receive of the limitless life of the triune God of the gospel and how our understanding of immortality is made concrete by the Christian hope in the resurrection of the body and the life everlasting. Debates about how best to understand the eternal life of God are directly significant to how we can imagine the promise of eternal life. While immortality is generally conceived to be a future qualification of human reality, theological approaches to the question of personal immortality must investigate the difference that the hope and promise of such eternal life makes in the living of present day spiritual life as well as in our common moral and political existence. To understand immortality as an eschatological gift of God requires that we take account of it as a formative factor at the foundations of the Christian life.
