## **Reason And Reform Studies In Social Policy:**

The Power Struggles over the Post-neoliberal Social Security System Reforms in Venezuela and Ecuador Ezequiel Luis Bistoletti, 2018-08-25 This book carries out a comparative analysis of the power struggles over the post neoliberal social security reforms in Venezuela and Ecuador The research breaks down why the social security system reform initiated by Hugo Chavez government in Venezuela has come down since its passing in 2002 whereas the social security system reform initiated by Rafael Correa's government in Ecuador has come along in spite of the obstacles since 2007 All in all the analysis determined that the struggles over the social security system reforms in both countries remarkably corresponded to each other with regard to their structural conditions points of contention and contending actors In contrast the analysis established substantial divergences regarding the ways in which the struggles over both reforms came about due to the divergent development of the struggles for hegemony between government and opposition These divergences finally brought about the indefinite stagnation of the reform in Venezuela and the advancement of subsequent partial reforms aimed at the universalization of social security in Ecuador

**Russia and Eurasia at the Crossroads** Egor S. Stroeve, Leonid S. Bliakhman, Mikhail I. Krotov, 2012-12-06. This last century of the second millennium has compressed human history to such an extent that whole ages of engineering, economics, social politics, and the humanities have been accommodated in decades or even years. Mankind has matured and applied its cognitive and creative genes to advance science and to internationalise future goals, including the vital goal of sustainable social development. However, having no control over the new pace of history, twentieth century civilisation has faced global cataclysms of a frequency and depth unprecedented and inconceivable in the past millennia. Among the recent crises to be resolved in the third millennium is the disintegration of the Soviet Union, the biggest state and third largest population in the world. Regrettably, the pace of change in the Soviet Union had been slower than the rates of reform elsewhere. Attempts at economic redecoration instead of radical market oriented reforms failed. In Soviet society, general discontent with the progress of perestroika in the 1980s provoked the child complacency syndrome that is typical of a young mind contemptuous of any adult action; it is convinced that things could have been done much better and much quicker. With the new millennium approaching, the Soviet Union gave way to 15 new states ridden with both inherited and acquired economic, political, and social maladies. It is common knowledge, however, that childhood epidemics are short lived.

Welfare and Party Politics in Latin America Jennifer Pribble, 2013-04-22. Systems of social protection can provide crucial assistance to the poorest and most vulnerable groups in society, but not all systems are created equally. In Latin America, social policies have historically exhibited large gaps in coverage and high levels of inequality in benefit size. Since the late 1990s, countries in this region have begun to grapple with these challenges, enacting a series of reforms to healthcare, social assistance, and education policy. While some of these initiatives have moved in a universal direction, others have maintained existing segmentation or moved in a regressive direction. *Welfare and Party Politics in Latin America* explores this variation in Argentina, Chile, Uruguay, and Venezuela, finding that the design of previous policies, the intensity of electoral competition, and the character of political parties all

Continuity Despite Change Matthew E. Carnes,2014-08-13 As the dust settles on nearly three decades of economic reform in Latin America one of the most fundamental economic policy areas has changed far less than expected labor regulation To date Latin America s labor laws remain both rigidly protective and remarkably diverse Continuity Despite Change develops a new theoretical framework for understanding labor laws and their change through time beginning by conceptualizing labor laws as comprehensive systems or regimes In this context Matthew Carnes demonstrates that the reform measures introduced in the 1980s and 1990s have only marginally modified the labor laws from decades earlier To explain this continuity he argues that labor law development is constrained by long term economic conditions and labor market institutions He points specifically to two key factors the distribution of worker skill levels and the organizational capacity of workers Carnes presents cross national statistical evidence from the eighteen major Latin American economies to show that the theory holds for the decades from the 1980s to the 2000s a period in which many countries grappled with proposed changes to their labor laws He then offers theoretically grounded narratives to explain the different labor law configurations and reform paths of Chile Peru and Argentina His findings push for a rethinking of the impact of globalization on labor regulation as economic and political institutions governing labor have proven to be more resilient than earlier studies have suggested
