*The Anatomy of the Holocaust* Raul Hilberg, Walter H. Pehle, René Schlott, 2019-11-07 A multifaceted look at historian Raul Hilberg tracing the evolution of Holocaust research from a marginal subdiscipline into a vital intellectual project I would recommend this book to both Holocaust historians and general readers alike The breadth and depth of Hilberg's research and his particular insights have not yet been surpassed by any other Holocaust scholar Jewish Libraries News Reviews Though best known as the author of the landmark 1961 work *The Destruction of the European Jews* the historian Raul Hilberg produced a variety of archival research personal essays and other works over a career that spanned half a century *The Anatomy of the Holocaust* collects some of Hilberg's most essential and groundbreaking writings many of them published in obscure journals or otherwise inaccessible to nonspecialists in a single volume Supplemented with commentary and notes from Hilberg's longtime German editor and his biographer From the Introduction This selection by the editors from the multitude of his published texts focuses on Hilberg's intellectual interests as a Holocaust researcher Among other topics they deal with the bureaucracy of the Holocaust the number of victims the role of the Judenrat Jewish councils and the function of the railway and the police in the extermination process The scholarly impulses extending from Hilberg's work remain remarkable and virulent almost a decade after his death 2 They deserve to be readily accessible in one place to historians and the interested public in the new compilation offered here Many of the debates influenced by Hilberg are not yet resolved The texts presented can be quite revealing in light of these controversies

Jewish Tradition and the Challenge of Darwinism Geoffrey Cantor, Marc Swetlitz, 2008-09-15 Darwin's theory of evolution transformed the life sciences and made profound claims about human origins and the human condition topics often viewed as the prerogative of religion As a result evolution has provoked a wide variety of religious responses ranging from angry rejection to enthusiastic

acceptance While Christian responses to evolution have been studied extensively little scholarly attention has been paid to Jewish reactions Jewish Tradition and the Challenge of Darwinism is the first extended meditation on the Jewish engagement with this crucial and controversial theory The contributors to Jewish Tradition and the Challenge of Darwinism from several academic disciplines and two branches of the rabbinate present case studies showing how Jewish discussions of evolution have been shaped by the intersections of faith science philosophy and ideology in specific historical contexts Furthermore they examine how evolutionary theory has been deployed when characterizing Jews as a race both by Zionists and by anti Semites Jewish Tradition and the Challenge of Darwinism addresses historical and contemporary as well as progressive and Orthodox responses to evolution in America Europe and Israel ultimately extending the history of Darwinism into new religious domains

**Handbook on the Geographies of Power** Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war

**Group Problems in Crime and Punishment** Hermann Mannheim, 2013-08-21 First published in 1998 This is Volume IX of the fifteen in the Sociology of Law and Criminology series This is a collection of mainly previously published periodicals articles reports or reviews on group problems in crime and punishment The material has throughout been revised in 1955 and brought up to date by adding brief introductory or concluding remarks and further references to recent legislation literature and other subsequent developments

**Paranoia: A Study in Diagnosis** A. Fried, J. Agassi, 2012-12-06 There is a curious parallel between the philosophy of science and psychiatric theory The so called demarcation question which has exercised philosophers of science over the last decades posed the problem of distinguishing science proper from non science in particular from metaphysics from pseudo science from the non rational or irrational or from the untestable or the empirically meaningless In psychiatric theory the demarcation question appears as a problem of distinguishing the sane from the insane the well from the mentally ill The parallelism is interesting when the criteria for what fails to be scientific are seen to be congruent with the criteria which define those psychoses which are marked by cognitive failure In this book Dr Yehuda Fried and Professor Joseph Agassi a practicing psychiatrist and a philosopher of science respectively focus on an extreme case

of psychosis paranoia as an essentially intellectual disorder that is as one in which there is a systematic and chronic delusion which is sustained by logical means They write Paranoia is an extreme case by the very fact that paranoia is by definition a quirk of the intellectual apparatus a logical delusion p 2 Idea of Commercial Society in the Scottish Enlightenment Christopher J Berry,2015-04-08 Christopher Berry explains why Enlightenment thinkers considered commercial society to be wealthier and freer than earlier forms looking at key works from Adam Smith David Hume and Adam Ferguson alongside lesser known figures **Conceptualising the Social World** John Scott,2011-06-23 This comprehensive and authoritative statement of fundamental principles of sociological analysis integrates approaches that are often seen as mutually exclusive John Scott argues that theorising in sociology and other social sciences is characterised by the application of eight key principles of sociological analysis culture nature system structure action space time mind and development He considers the principal contributions to the study of each of these dimensions in their historical sequence in order to bring out the cumulative character of knowledge Showing that the various principles can be combined in a single disciplinary framework Scott argues that sociologists can work most productively within an intellectual division of labour that transcends artificial theoretical and disciplinary differences Sociology provides the central ideas for conceptualising the social but it must co exist productively with other social science disciplines and disciplinary areas Professing Sociology Irving Horowitz,2017-07-05 Professing Sociology was originally published at a time when sociology commanded widespread interest and public funding Written by one of the leaders of the new sociology of the late sixties this volume captures the nature and intensity of the field s intellectual foundations and scope It reveals the field s post World War II development as a scientific discipline and as a profession and includes the author s most significant writings on critical trends shaping the field Irving Louis Horowitz divides the life cycle of sociology into three main sections The first deals with the inner life of sociology covering basic theoretical issues uniting and dividing the profession In a second section Horowitz shows the institutions and sources from which the struggle of ideas is nourished A third section shows how political life shapes the inner life of American sociology Horowitz gives a great deal of attention to international social science to the relationship of social science to public policy and to federal projects and grant agencies and their effects on research Irving Louis Horowitz was undoubtedly influential in shaping his field and Professing Sociology offers valuable insights into how ideas become part of the fabric of professional life As the new introduction by Howard G Schneiderman shows Professing Sociology provides a clear picture of sociology at the height of its importance **Encyclopedia of Law and Society** David S. **Justice and the Genesis of War** David A. Welch,1995-08-10 Studies of the causes of wars generally presuppose a realist account of motivation when statesmen choose to wage war they do so for purposes of self preservation or self aggrandizement In this book however David Welch argues that humans are motivated by normative concerns the pursuit of which may result in behaviour inconsistent with self interest He examines the effect of one particular type of normative motivation the justice motive in the outbreak of five Great Power wars the Crimean war the Franco Prussian war World War I World War II and the Falklands war Realist theory would suggest that these wars would be among the least likely to be influenced by considerations other than power and interest but the author demonstrates that the justice motive played an important role in the genesis of war and that its neglect by theorists of international politics is a major oversight
