Reasonable Faith Jay L. Wile,1997 **Reasonable Faith: The Scientific Case for Christianity** Audio CD,2006-08-09

In this CD Dr Wile lays out a complete argument for the validity of the Christian faith He begins with the scientific evidence that demonstrates the existence of God Based on his arguments the listener will quickly realize that science unerringly points to the existence of a supernatural creator He then uses medical science and historical science to demonstrate quite clearly that the Creator is the God of the Bible after listening to this tape you will understand that the Christian faith can be backed up with scientific evidence This is a recorded presentation based on the book Reasonable Faith it is NOT the book on CD

factually accurate this is required reading for anyone keen to question the soundness of anything W L Craig has argued over the decades Which makes it an invaluable resource for refuting Christian apologetics generally Richard Carrier author on the historicity of Jesus This book should be required reading for anyone who is proposing to debate William Lane Craig on the existence of God It should also be something that those who debate Craig on that topic advertise this book gives an accurate idea of the amount of material that needs to be provided to begin to address the usual panoply of arguments that Craig puts forward in a debate Professor Graham Oppy Monash James Fodor has a graduate degree in physics at the University of Melbourne and is a research assistant in structural biology at Monash University With a keen interest in philosophy he writes for the Rationalist magazine on various subjects in religion and epistemology As president of the University of Melbourne Secular Society he has engaged in numerous discussions and public debates concerning religion with a focus on secular morality and the evidence for the resurrection of Jesus He also has a keen interest in effective altruism and computational neuroscience
