The volume is written for researchers and scientists interested in cell therapy, stem cell biology, regenerative medicine and organ transplantation and is contributed by world renowned authors in the field. Provides overview of the fast moving field of stem cell biology and function, regenerative medicine and therapeutics. Covers the possible use of iPSCs for hair loss disorders, Parkinson's disease, Huntington's disease, ischemic stroke, Alzheimer's disease, Glaucoma, Optic Neuropathy, Age Related Macular Degeneration, Type 1 Diabetes, Heart Failure, liver diseases, infertility, Autoimmune Diseases and more. Contributions from stem cell leaders around the world.

Operative Techniques and Recent Advances in Acute Care and Emergency Surgery Paolo Aseni, Luciano De Carlis, Alessandro Mazzola, Antonino M. Grande, 2019-02-11 The aim of this book is to identify and shed new light on the main surgical practices involved in acute care and trauma surgery. Adopting an evidence based approach, a multidisciplinary team of surgeons and intensivists illustrate basic and advanced operative techniques accompanied by a comprehensive and updated reference collection. Emerging surgical procedures in Acute Care Surgery are also explored step by step with the help of ample illustrations. Further the book offers an overview of treatment options for acute organ failure with a focus on peculiar clinical situations that call for special treatment including extracorporeal membrane oxygenation, ECMO, circulatory support and urgent liver transplantation. In order to identify the key determinants in decision making and therapeutic support that can help avoid critical errors, authors not only define and discuss specific surgical techniques but also present major issues and controversies related to it. In essence the book can be considered a 'What to do' guide that offers easy access to both basic and advanced lifesaving surgical procedures due in part to text boxes highlighting Tips, Tricks and Pitfalls as well as advice on Complications Management. Many chapters are enriched by providing clinical case scenarios, an important educational resource including self assessment questionnaires.

Recent Advances in Cardiology: 16 Derek Rowlands, Bernard Clarke, 2014-02-10 Part of the *Recent Advances* series, *Cardiology* is a collection of comprehensive reviews with emphasis on breakthroughs and their practical relevance to clinical practice, providing essential reading to help clinicians and trainees.
