Abstract: Oral diseases and conditions affect children's oral health and negatively influence their overall health. Early detection and intervention are important in mitigating these negative consequences. However, dental fear and anxiety (DFA) regarding dental procedures often hinder children from seeking necessary dental care. Non-pharmacological behavior management strategies, such as distraction techniques, are commonly adopted to manage children's behaviors. Distraction techniques have been developed rapidly in recent years and are widely accepted by both health professionals and parents due to their noninvasive and low-cost nature. This concise review aims to summarize current distraction techniques applied during dental treatments, especially for children. The most commonly reported techniques for children are audio distraction, audio-visual distraction, tactile distraction, olfactory distraction, and gustatory distraction. Audio distraction techniques involving music and storytelling help children relax. Audio-visual distraction techniques help to divert children's attention from the dental treatment. Tactile stimuli can reduce the transmission of pain signals. Olfactory stimuli can help children feel comfortable and relaxed. Gustatory distraction involving sweet substances can create a positive environment. These distraction techniques effectively reduce DFA in children and improve their satisfaction with dental procedures. As technology continues to develop, further research is needed to provide more robust, evidence-based guidance for dentists using distraction techniques.

1. Introduction

Oral diseases and conditions, such as dental caries and dental trauma, are prevalent among children worldwide. *Lassot* reported that untreated dental caries in deciduous teeth affect 9% of the child population, potentially leading to unremitting pain and infection [1]. The International Association of Dental Traumatology indicated that 25% of schoolchildren experience dental trauma that may need urgent or emergency dental care [2]. The development and progression of oral diseases and conditions can negatively impact children's oral cavity, maxillofacial development, and overall psychological health [3]. Early detection and management of oral diseases and conditions are essential to mitigate these consequences. However, dental fear and anxiety (DFA) during dental procedures can lead to negative or aggressive behaviors and hinder children from seeking the necessary dental care [4]. The term DFA refers to intense negative emotions associated with dental procedures. DFA is not uncommon among children. A systematic review reported that DFA affects 37% of preschool children and 25.8% of schoolchildren worldwide. Preschool children with

outlines possible policy prescriptions of relevance both in the North and South **Progress** Leo Marx, Bruce Mazlish, 2025-10-01 Progress perhaps the fundamental secular belief of modern Western society has come under heavy fire recently because after three centuries advances in science and technology seem increasingly to bring problems in their wake alienation environmental degradation the threat of nuclear destruction The idea of progress is brought into question by postmodern critique attacking the notion of science as truth Yet no other meaningful organization of humankind's sense of time looms on the horizon This volume seeks to reassess the meaning and prospects of the idea of progress Looking toward the millennium the volume seeks to evaluate the idea's worth both in theory is it intellectually viable and defensible today and practice even if theoretically defensible is the idea undermined in actual life Approaching these questions from the perspectives of science anthropology economics religion political philosophy feminism medicine environmental studies and the Third World the contributors all distinguished scholars provide a unique and critical balance Ultimately the contributors find that progress is both a fact and an illusion it does occur in certain areas but it does not sweep all before it as its Enlightenment votaries thought it would This foundational idea permeates discourse in the natural and social sciences as well as the humanities and will engage historians students of the history of science and technology sociologists political scientists philosophers literary scholars and art critics as well as those interested in civilization in general Contributors include Jill Ker Conway Zhiyuan Cui Leon Eisenberg Robert Heilbroner Gerald Holton Leo Marx Bruce Mazlish Ali A Mazrui Alan Ryan John M Staudenmaier George W Stocking Jr and Richard White A discerning reconsideration of the idea of progress in a variety of carefully defined theoretical and empirical historical contexts David Hollinger University of California Berkeley Leo Marx is Professor of American Cultural History Emeritus Massachusetts Institute of Technology Bruce Mazlish is Professor of History Massachusetts Institute of Technology *A Neoclassical Analysis of Macroeconomic Policy* Michael Beenstock, 1980 Some recent trends in macroeconomic theory and practice A critique of Keynesian macroeconomics The basic neoclassical model Extension of the neoclassical model Long term policy analysis The rational expectations hypothesis Macroeconomic policy and rational expectations Theory and practice *Recent Developments in the Study of Business and Economic History* Robert E. Gallman, 1977 **Models of Capitalism** Evelynne Huber, 2002 Latin American societies have undergone fundamental changes in the past two decades moving from capitalist economies with very wide ranging state intervention to more market driven systems After a prolonged period of recession these changes produced some successes in economic growth in the 1990s but they also exacerbated many problems especially poverty and inequality Models of Capitalism examines why some societies with market economies perform much better than others in combining growth and equity and what the less successful countries can learn from the more successful ones The contributors look at different models of capitalism in Latin America Northeast and Southeast Asia and advanced industrial countries asking which patterns of economic and social policies governments in the more successful societies pursued and which configurations of institutions

made pursuing such policies possible The investigation focuses on economic policies designed to stimulate growth on labor market policies designed to promote a qualified labor force and increase productivity and wages and on social policies designed to improve general human capital and to distribute life chances in an equitable way The volume is innovative in explicitly connecting the discussion of growth policies with an analysis of labor market and social policies and in going beyond comparison of Latin American with East Asian approaches to include reference to equity oriented policies in North America and Western Europe as well This approach helps demonstrate how important policy design is in determining distributive outcomes at any given level of development The contributors are Antonio Alas Renato Baumann Ha Joon Chang Carlos H Filgueira Fernando Filgueira Robert Grosse Thomas Janoski John Myles T J Pempel Wilson Peres David Brian Robertson John Sheahan John D Stephens Victor E Tokman and Bridget Welsh Sponsored by the Joint Committee on Latin American Studies of the Social Science Research Council and the American Council of Learned Societies

Industries, Firms, and Jobs George Farkas, 2017-09-08 What are the links among industrial structure segmentation the internal structure of firms job characteristics technology productivity labor markets and product markets The answers posited by a distinguished group of sociologists and economists have gained resonance as the field of economic sociology has grown In this expanded edition the editors and their economist colleague Kevin Lang explore the theoretical interstices and update the references Sociologists and economists have responded differently to work within the other discipline For some sociologists the typical economic assumption of basic actors engaged in rational action is both unrealistic and objectionable Other sociologists have not always agreed with everything economists do they have seen rational choice as a partially true description of human behavior and as a starting point for sociological theorizing Among economists the situation is quite different most have maintained their basic rational choice model while pushing aggressively into substantive areas previously addressed only by sociologists and political scientists *Industries Firms and Jobs* is a welcome reassertion of an old tradition of interdisciplinary research That tradition has recently weakened largely because of an enormous expansion of the domain of neoclassical economics The expansion has fed on two scientific developments human capital theory and contract theory This book is an invaluable resource for all economists sociologists labor specialists and business professionals

The New Palgrave Dictionary of Economics, 2016-05-18 The award winning *The New Palgrave Dictionary of Economics* 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product

Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2019 Regional economics an established discipline for several decades has undergone a period of rapid change in the last ten years resulting in the emergence of several new perspectives At the same time the methodology of regional economics has also experienced some surprising developments This fully revised and updated Handbook brings

together contributions looking at new pathways in regional economics written by many well known international scholars The aim is to present the most cutting edge theories explaining regional growth and local development The authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas between regional and mainstream economists It will be an essential source of reference and information for both scholars and students in the field

New Theories in Growth and Development Frank Hahn, Fabrizio Coricelli, Massimo Di Matteo, 2016-01-06 This collection offers a stimulating and insightful overview of the main issues affecting long term economic growth The novelty of this book is that it brings together two strands of economic literature growth and development theories The communication between different approaches is crucial as it is increasingly understood that growth hinges upon institutional and policy aspects that are generally neglected in the stylized models of growth but highly relevant for developing countries Government policies and institution design become central to the explanation of divergent growth paths

Development and Globalization David F. Ruccio, 2012-12-06 Since the mid 1980s David F Ruccio has been developing a new framework of Marxian class analysis and applying it to various issues in socialist planning Third World development and capitalist globalization The aim of this collection is to show through a series of concrete examples how Marxian class analysis can be used to challenge existing modes of thought and to produce new insights about the problems of capitalist development and the possibilities of imagining and creating noncapitalist economies The book consists of fifteen essays plus an introductory chapter situating the author's work in a larger intellectual and political context The topics covered range from planning theory to the role of the state in the Nicaraguan Revolution from radical theories of underdevelopment to the Third World debt crisis and from a critical engagement with regulation theory to contemporary discussions of globalization and imperialism
