Recent Progress In Hormone Research Volume 37 Proceedings Of The 198:

Recent Progress in Hormone Research Roy O. Greep, 2013-10-22 Recent Progress in Hormone Research Volume 35 presents the proceedings of the 1978 Laurentian Hormone Conference held from August 27 through September 1 1978 at the Mont Tremblant Lodge Mont Tremblant Quebec Canada The book discusses the organization structure transcription and regulation of the ovalbumin gene vitellogenesis as a versatile model for hormonal regulation of gene expression and thyroid hormone receptors and responses The text also describes the circular dichroism of pituitary hormones receptor mediated uptake of lipoprotein cholesterol and its utilization for steroid synthesis in the adrenal cortex and estrogen and antiestrogen action in reproductive tissues and tumors The effects of FSH on gonadal functions the hormonal control of ovarian follicular development and studies on atherogenesis and corneal transplantation using cultured vascular and corneal endothelia are also considered The book further tackles the testis organizing H Y antigen and the primary sex determining mechanism of mammals the studies of the 3T3 L1 adipocyte like cell line and the hormonal interactions in the regulation of blood glucose Endocrinologists physiologists gynecologists and cell biologists will find the text invaluable Recent Progress in Hormone Research Gregory Pincus, 2013-10-22 Recent Progress in Hormone Research Volume 23 is a collection of papers presented at the 1966 Laurentian Hormone Conference held at Mont Tremblant Quebec Canada This conference explores four major areas of research including thyroid physiology thyroid hormones contemporary developments in peptide hormone chemistry and biochemistry and special studies of insulin particularly in man This book is organized into four parts encompassing 14 chapters Part I deal with the factors controlling thyroid stimulation and special studies of the mode of action of thyroid hormones including antithyroid drugs Part II describes the mode of action of steroid hormones and hormonal steroids based on the effects on normal and neoplastic tissues This part also looks into a definitive segment of research in endocrinology with the metabolism of the steroid hormones in vivo and in vitro The discussion of an important clinical condition involving adrenocortical steroid production is given in the chapter concerned with congenital adrenal hyperplasia Parts III and IV explore the synthesis of peptide hormones and insulin These parts also tackle the gastrointestinal hormone biochemistry the detection of at least two insulin like activities in human serum and the particular control of insulin activity in man This book is directed primarily toward endocrinologists **Recent Progress in Hormone Research** C. Wayne Bardin, 2013-09-11 Recent Progress in Hormone Research Volume 47 covers the developments in the field of endocrinology and metabolism The book discusses the molecular mechanism of action of a steroid hormone receptor neuroendocrine control of human reproduction in the male and the immortalization of neuroendocrine cells by targeted oncogenesis The text also describes the neuroendocrine regulation of the luteinizing hormone releasing hormone pulse generator in the rat the gonadotropin releasing hormone pulses and steroids receptors and response elements The molecular biology of human renin and its gene the cellular and molecular analysis of pancreatic islet cell lineage and differentiation and sulfonylurea signal transduction are

also considered The book further tackles the complex hormone response unit regulating transcription of the phosphoenolpyruvate carboxykinase gene and the structure and molecular regulation of mammalian glucose transporters Endocrinologists physiologists and biochemists will find the book invaluable The Embryology of the Human Thyroid Gland Including Ultimobranchial Body and Others Related S. Sugiyama,2012-12-06 In 1967 the present author published as a monograph Histological studies of the human thyroid gland observed from the viewpoint of its postnatal development based upon the quantitative measurements of thyroid tissue components in 326 cases ranging in age from immediately after birth to 88 years Through successive intermediate zones newborn infant child and pubertal on one hand and through a transitional zone presenile on the other hand the realm of interest concerning in medicine recently has been extended from the main trunk of the adult towards two poles senile gerontology and embryonic prenatology The problem of the thyroid gland is no exception to this recent trend Boyd 1950 and also seems to be one of the most topic endocrine subjects from the standpoint of this view Russel et al 1957 Carr et al 1959 Smith et al 1961 Pickering 1964 Pickering et al 1958 1961 1963 French et al 1964 A survey of the literature shows considerable numbers of papers dealing with the developmental histology of the prenatal human thyroid gland Earlier Dr **Hormones and Reproduction of Vertebrates, Volume 1** David O. Norris,Kristin H. Lopez,2024-07-17 Hormones and Reproduction of Vertebrates Volume 1 Fishes is the first of five second edition volumes representing a comprehensive and integrated overview of hormones and reproduction in fishes amphibians reptiles birds and mammals The book includes coverage of endocrinology neuroendocrinology physiology behavior and anatomy of fish reproduction It provides a broad treatment of the roles of pituitary thyroid adrenal and gonadal hormones in all aspects of reproduction as well as descriptions of major life history events New to this edition is a concluding assessment of the effect of environmental influences on fishes Initial chapters in this book broadly examine sex determination reproductive neuroendocrinology stress and hormonal regulation as it relates to testicular and ovarian development and function Subsequent chapters examine hormones and reproduction of specific taxa including agnathan chondrichthyan and sarcopterygian fishes The book concludes with an examination of the environmental influences on hormones and reproduction of fishes including endocrine disrupting chemicals and climate change Hormones and Reproduction of Vertebrates Volume 1 Fishes is designed to provide a readable coordinated description of reproductive basics in fishes as well as an introduction to the latest trends in reproductive research and a presentation of our understanding of reproductive events gained over the past decade It may serve as a stand alone reference for researchers and practitioners in the field of ichthyology or as one of five coordinated references aligned to provide topical treatment across vertebrate taxa for researchers practitioners and students focused on vertebrate endocrinology Covers endocrinology neuroendocrinology physiology behavior and anatomy of fish reproduction Includes pituitary pineal thyroid adrenal and gonadal hormones Focuses on teleosts as well as information on agnathan chondrichthyan and sarcopterygian fishes Provides new coverage on

endocrine disrupting chemicals microplastics and climate change **Medical Books and Serials in Print** ,1984 SAFE USES OF CORTISOL William McK. Jefferies,2004-01-04 The Third Edition of this popular book brings up to date the material that so many readers found helpful in the previous editions The text has been revised and reorganized with current chapters focusing on the history of cortisol use sources of confusion regarding cortisol therapy the significance of normal adrenocortical function generally accepted uses of physiological dosage viral infections miscellaneous clinical conditions and future directions for research and therapy The author provides explanation and confirmation of the rationale for the effectiveness and safety of the uses of physiological dosages of cortisol in the treatment not only of patients with rheumatoid arthritis and other autoimmune disorders but also of patients with chronic allergies chronic fatigue syndrome gonadal dysfunction infertility shingles acne hirsutism respiratory infections and other less common disorders It is a known fact that the influenza virus attacks the human body by impairing the production of the adrenocorticotrophic hormone ACTH which in turn impairs the production of cortisol the only hormone that is absolutely essential for life In addition within the past two years a new infection has developed in central China and has been labeled Severe Acute Respiratory Syndrome SARS The ACTH hormone and the SARS epidemic is addressed and it is hoped that this type of cortisol therapy will not only be helpful in the treatment of the various disorders mentioned but will lead to a better understanding of the factors that contribute to the development of these disorders and ultimately contribute towards their prevention **Acta Physiologica Hungarica** ,1985 Proceedings of the Royal Society of London Royal Society (Great Britain),1976 **Progress in Neuropeptide Research** Döhler,2013-11-21 As early as in the twenties and thirties of our century Ernst Scharrer published papers suggesting on the basis of morphological findings that the brain exhibits secretory function which he called neurosecretion Only a few decades later Scharrer s presumption was fully confirmed by the isolation of a number of neuropeptides and by the disclosure of their chemical structures Neuropeptide research is one of the most rapidly expanding fields in biomedicine Initially investigators focused their attention on the existence and role of neuropeptides within the hypothalamo hypophyseal system This particular area of research still provides plenty of interesting and fruitful findings Neuropeptides including those which were discovered as hypothalamic hormones can also be detected in other parts of the brain and even in peripheral organs In fact several neuropeptides were found to be synthesized not only by neurones but also by non neuronal cells These observations imply much wider functional relevance of neuropeptides than it had been supposed initially It appears from present day knowledge that neuropeptides are not only involved in neurotransmission and in the control of pituitary function but also in direct regulation of numerous peripheral biological processes including reproduction digestion immune functions and even cell growth This volume includes the invited papers of the Symposium on Progress in Neuropeptide Research which was held in Looz Poland on September 8 10 1988 Topics of the symposium reflect upon newly discovered peptides new localizations new functions and new technical approaches **Fortschritte der Arzneimittelforschung / Progress in**

K. Bustad,2013-10-22 Biology of Radioiodine presents the proceedings of the Hanford Symposium on the Biology of Radioiodine by the U S Atomic Energy Commission and the Hanford Laboratories of the General Electric Company held in Richland Washington on July 17 19 1963 This book discusses the biochemistry and physiology of radioiodine Organized into 53 chapters this compilation of papers begins with an overview of the comprehensive research program on radioiodine This text then examines the risk in the occupations involving exposure to radiation Other chapters consider the properties of different radioiodines including fission yield half life radiations and precursors in the fission product decay series This book discusses as well the empirical relationships relating the transfer of radioiodine from air to grass The final chapter deals with biomedical considerations when large quantities of radioiodine are released in the environment This book is a valuable resource for biologists physiologists biochemists and scientists

Progress in Molecular and Environmental Bioengineering Angelo Carpi,2011-08-01 This book provides an example of the successful and rapid expansion of bioengineering within the world of the science It includes a core of studies on bioengineering technology applications so important that their progress is expected to improve both human health and ecosystem These studies provide an important update on technology and achievements in molecular and cellular engineering as well as in the relatively new field of environmental bioengineering The book will hopefully attract the interest of not only the bioengineers researchers or professionals but also of everyone who appreciates life and environmental sciences **The Journal of Cell Biology** ,1985 No 2 pt 2 of November issue each year from v 19 47 1963 70 and v 55 1972 contain the
