Recent Trends In Meaningtext Theory:

Recent Trends in Meaning-text Theory Leo Wanner, 1997-01-01 The present volume contains articles of well known representatives of the Meaning Text Theory MTT and other related linguistic theories Founded by I Mel'cuk and A Zholkovsky in the sixties in Moscow MTT soon became known in the West as a prominent outsider theory The picture changed since then though MTT gained importance in several areas of linguistics and computational linguistics It influenced the design of new grammar formalisms such as Dependency Tree Grammars Also specific parts of MTT have been directly overtaken into other theories consider for example the work on integrating Lexical Functions into Pustejovsky's Generative Lexicon The present volume is a further convincing demonstration of MTT's liveliness and relevance to the field's burning issues The focus of the volume is on semantics semantic representation and relation of semantics to surface in MTT Six out of eight articles Polguère Escalier Paducheva St Germain Beck Bogulavsky deal with problems related to these topics while the last two articles of the volume Sgall and Rambow Joshi throw a bridge between MTT or more precisely between dependency based theories of which MTT is one instantiation and other linguistic theories

Dependenz und Valenz/ Dependency and Valency Vilmos Agel, Ludwig M. Eichinger, Hans Werner Emonds, Peter Hellwig, Hans Jürgen Heringer, Henning Lobin, 2003 Annotation The handbook provides an overview of the current status of this research In its first volume the handbook begins by presenting the historical background of the theories in which the conceptions are rooted and then goes on to deal with the individual elements

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2003-06-29 CICLing 2001 is the second annual Conference on Intelligent text processing and Computational Linguistics hence the name CICLing see www.CICLing.org It is intended to provide a balanced view of the cutting edge developments in both theoretical foundations of computational linguistics and practice of natural language text processing with its numerous applications A feature of the CICLing conferences is their wide scope that covers nearly all areas of computational linguistics and all aspects of natural language processing applications The conference is a forum for dialogue between the specialists working in these two areas This year our invited speakers were Graeme Hirst U Toronto Canada Sylvain Kahane U Paris 7 France and Ruslan Mitkov U Wolverhampton UK They delivered excellent extended lectures and organized vivid discussions A total of 72 submissions were received all but very few of surprisingly high quality After careful reviewing the Program Committee selected for presentation 53 of them 41 as full papers and 12 as short papers by 98 authors from 19 countries Spain 19 authors Japan 15 USA 12 France Mexico 9 each Sweden 6 Canada China Germany Italy Malaysia Russia United Arab Emirates 3 each Argentina 2 Bulgaria The Netherlands Ukraine UK and Uruguay 1 each

Deconstructing Constructions Christopher S. Butler, Javier Martín Arista, 2009-01-14 This collection of papers brings together contributions from experts in functional linguistics and in Construction Grammar approaches with the aim of exploring the concept of construction from different angles and trying to arrive at a better understanding of what a

construction is and what roles constructions play in the frameworks which can be located within a multidimensional functional cognitive space At the same time the volume has a historical dimension for instance in plotting the developments which led to recent models The book is organised in three sections the first deals with particular theoretical issues the second is devoted to the recent Lexical Constructional Model and the third presents a number of analyses of specific constructions The volume thus makes an important contribution to the ongoing debate about the relationship between functionalist and constructionist models

Advances in Artificial Intelligence and Its Applications Obdulia Pichardo Lagunas, Oscar Herrera Alcántara, Gustavo Arroyo Figueroa, 2015-11-19 The two volume set LNAI 9413 9414 constitutes the proceedings of the 14th Mexican International Conference on Artificial Intelligence MICA 2015 held in Cuernavaca Morelos Mexico in October 2015 The total of 98 papers presented in these proceedings was carefully reviewed and selected from 297 submissions They were organized in topical sections named natural language processing logic and multi agent systems bioinspired algorithms neural networks evolutionary algorithms fuzzy logic machine learning and data mining natural language processing applications educational applications biomedical applications image processing and computer vision search and optimization forecasting and intelligent applications

An Advanced Introduction to Semantics Igor Mel'čuk, Jasmina Milićević, 2020-04-02 This book is an advanced introduction to semantics that presents this crucial component of human language through the lens of the Meaning Text theory an approach that treats linguistic knowledge as a huge inventory of correspondences between thought and speech Formally semantics is viewed as an organized set of rules that connect a representation of meaning Semantic Representation to a representation of the sentence Deep Syntactic Representation The approach is particularly interesting for computer assisted language learning natural language processing and computational lexicography as our linguistic rules easily lend themselves to formalization and computer applications The model combines abstract theoretical constructions with numerous linguistic descriptions as well as multiple practice exercises that provide a solid hands on approach to learning how to describe natural language semantics

Semantic Relations and the Lexicon M. Lynne Murphy, 2003-10-02 Semantic Relations and the Lexicon explores the many paradigmatic semantic relations between words such as synonymy antonymy and hyponymy and their relevance to the mental organization of our vocabularies Drawing on a century s research in linguistics psychology philosophy anthropology and computer science M Lynne Murphy proposes a pragmatic approach to these relations Whereas traditional approaches have claimed that paradigmatic relations are part of our lexical knowledge Dr Murphy argues that they constitute metalinguistic knowledge which can be derived through a single relational principle and may also be stored as part of our extra lexical conceptual representations of a word Part I shows how this approach can account for the properties of lexical relations in ways that traditional approaches cannot and Part II examines particular relations in detail This book will serve as an informative handbook for all linguists and cognitive scientists interested in the mental representation of vocabulary

Evaluation in

Context Geoff Thompson, Laura Alba-Juez, 2014-02-04 It is now an acknowledged fact in the world of linguistics that the concept of evaluation is crucial and that there is very little if any discourse that cannot be analyzed through the prism of its evaluative content This book presents some of the latest developments in the study of this phenomenon Released more than a decade later than Hunston and Thompson's 2000 *Evaluation in Text* *Evaluation in Context* is designed as its sequel in an attempt to continue update and extend the different avenues of research opened by the earlier work Both theoretical and empirical studies on the topic are presented with the intention of scrutinizing as many of its dimensions as possible by not only looking at evaluative texts but also considering the aspects of the discursive context that affect the final evaluative meaning at both the production and reception stages of the evaluative act The editors main objective has been to gather contributions which investigate the manifold faces and phases of evaluation by presenting a wide variety of perspectives that include different linguistic theories e g Axiological Semantics Functionalism or Politeness Theory different levels of linguistic description e g phonological lexical or semantic and different text types and contexts e g the evaluation found in ironic discourse the multimodality of media discourse or the world of politics just to name a few The volume can be of use not only for scholars who study the evaluative function of language but also for students who wish to pursue research in the area

Van Valin, Jr, 2023-06-07 Role and Reference Grammar RRG is a theory of language in which linguistic structures are accounted for in terms of the interplay of discourse semantics and syntax With contributions from a team of leading scholars this Handbook provides a field defining overview of RRG Assuming no prior knowledge it introduces the framework step by step and includes a pedagogical guide for instructors It features in depth discussions of syntax morphology and lexical semantics including treatments of lexical and grammatical categories the syntax of simple clauses and complex sentences and how the linking of syntax with semantics and discourse works in each of these domains It illustrates RRG's contribution to the study of language acquisition language change and processing computational linguistics and neurolinguistics and also contains five grammatical sketches which show how RRG analyses work in practice Comprehensive yet accessible it is essential reading for anyone who is interested in how grammar interfaces with meaning

New-dialect Formation in Canada Stefan Dollinger, 2008 This book details the development of eleven modal auxiliaries in late 18th and 19th century Canadian English in a framework of new dialect formation The study assesses features of the modal auxiliaries tracing influences to British and American input varieties parallel developments or Canadian innovations The findings are based on the Corpus of Early Ontario English pre Confederation Section the first electronic corpus of early Canadian English The data which are drawn from newspapers diaries and letters include original transcriptions from manuscript sources and texts from

semi literate writers While the overall results are generally coherent with new dialect formation theory the Ontarian context suggests a number of adaptations to the current model In addition to its general Late Modern English focus New Dialect Formation in Canada traces changes in epistemic modal functions up to the present day offering answers to the loss of root uses in the central modals By comparing Canadian with British and American data important theoretical insights on the origins of the variety are gained The study offers a sociohistorical perspective on a still understudied variety of North American English by combining language internal features with settlement history in this first monograph length diachronic treatment of Canadian English in real time

Dependency in Linguistic Description Alain Polguère, Igor A. Mel'čuk, 2009-02-18 The book covers three major topics crucial for contemporary syntactic research Firstly it offers a sketch of a general theory of dependency in natural language Different types of linguistic dependencies are distinguished semantic syntactic and morphological the criteria for their recognition are formulated and all possible combinations are discussed in some detail Secondly it demonstrates the application of the general theory in two specific domains establishing the system of Surface Syntactic Relations in French and linear positioning of clitics in Serbian Thirdly it presents a formal

sketch of Head Driven Phrase Structure Grammar modelled in terms of syntactic dependencies **Semantics** Igor Aleksandrovi? Mel'uk, Igor A. Mel'uk, 2012 This book presents an innovative and novel approach to linguistic semantics beginning with the idea that language can be described as a system for the expression of linguistic Meanings as particular surface forms or Texts Semantics is specifically that system of rules that ensures a correct transition from a Semantic Representation of the Meaning of a family of synonymous sentences to the Deep Syntactic Representation of a particular sentence Framed in the terms of Meaning Text linguistics this volume discusses in detail the problems of Semantic Representation including the semantic structure of utterances the semantics of Causation in English and communicative or information structure Based on the author's life long dedication to the study of the semantics and syntax of natural language this book is a paradigm shifting contribution to the language sciences whose originality and daring will make it essential reading for linguists anthropologists semioticians and computational linguists **Semantics** Igor Mel'uk, 2015-01-14 This book presents an innovative and novel approach to linguistic semantics starting from the idea that language can be described as a mechanism for the expression of linguistic Meanings as particular surface forms or Texts Semantics is specifically that system of rules that ensures a transition from a Semantic Representation of the Meaning of a family of synonymous sentences to the Deep Syntactic Representation of a particular sentence Framed in the terms of Meaning Text linguistics the present volume closes the publication of the three volume series It discusses in detail several linguistic notions crucial to the development of Meaning Text models of natural languages semantic and syntactic actants government pattern lexical functions linguistic connotations phrasemes the meaning of grammatical cases and linguistic dependencies The notions under analysis are illustrated from a variety of languages Reflecting the author's life long dedication to the study of the semantics and syntax of natural language this book is a paradigm shifting contribution to the language sciences whose originality and daring will make it essential reading for linguists anthropologists semioticians and computational linguists

Studies on the Phonological Word T. Alan Hall, Ursula Kleinhenz, 1999-06-15 The present volume consists of nine articles dealing with the role of the constituent phonological word or prosodic word in various typologically diverse languages These languages and their respective families subsume Indo European Dutch German English European Portuguese Bantu SiSwati KiNande Algonquian Cree Siouan Dakota and Salishan Lushootseed One contribution examines the phonological word in a sign language The theoretical issues dealt with in the book include evidence for the phonological word e.g. rules phonotactics syllabification stress patterns the connection between morphosyntactic and prosodic structure e.g. alignment phenomena in Optimality Theory and the relationship between the phonological word and other prosodic constituents e.g. the prosodic representation of clitics The volume will be of interest to all linguists and advanced students of linguistics working on Prosodic Phonology phonology morphology and phonology syntax interface and Optimality Theory *Mental States* Andrea C. Schalley, Drew Khlentzos, 2007-12-13 Collecting the work of linguists psychologists neuroscientists archaeologists artificial

intelligence researchers and philosophers this volume presents a richly varied picture of the nature and function of mental states Starting from questions about the cognitive capacities of the early hominin *homo floresiensis* the essays proceed to the role mental representations play in guiding the behaviour of simple organisms and robots thence to the question of which features of its environment the human brain represents and the extent to which complex cognitive skills such as language acquisition and comprehension are impaired when the brain lacks certain important neural structures Other papers explore topics ranging from nativism to the presumed constancy of categorization across signed and spoken languages from the formal representation of metaphor actions and vague language to philosophical questions about conceptual schemes and colours Anyone interested in mental states will find much to reward them in this fine volume

Talking about Motion

Luna Filipović, 2007 Printbegrnsninger Der kan printes 10 sider ad gangen og max 40 sider pr session

Aspect in Burmese Nicoletta Romeo, 2008 The book presents an overview of the aspectual system of Burmese and it focuses on the analysis and description of the meaning and function of some aspectual markers which are among the most commonly used in the language The analysis highlights a few important facts Firstly these markers which typically follow the main verb within the verbal complex derive from lexical verbs which are still in use in Burmese This is an important descriptive factor since the function of these markers can only be fully understood by looking at the interplay between the semantics of their lexical sources and the semantics of the verbs they modify Secondly it is the semantics of the aspectual markers that determines both their order vis vis the main verb and their order vis vis the other markers within the verbal complex The interplay between the semantics and the syntax of these markers is analysed by adopting Role and Reference Grammar
