fields of research were established by in depth dis cussions of energy transduction and transport mechanisms The general
principles of regulation by signal transduction and protein phosphorylation dephosphorylation were presented in the context
of specific cellular processes Discussions included al so the role of protein tyrosine kinases which are structurally related to
oncogene products and therefore implicated in va rious aspects of cell development and transformation This book presents

Jans,2013-03-09 Receptors Douglas A. Lauffenburger,Jennifer Linderman,1996-01-11 Receptors Models for Binding Trafficking and Signaling bridges the gap between chemical engineering and cell biology by lucidly and practically demonstrating how a mathematical modeling approach combined with quantitative experiments can provide enhanced understanding of cell phenomena involving receptor ligand interactions In stressing the need for a quantitative understanding of how receptor mediated cell functions depend on receptor and ligand properties the book offers comprehensive treatments of both basic and state of the art model frameworks that span the entire spectrum of receptor processes from fundamental cell surface binding intracellular trafficking and signal transduction events to the cell behavioral functions they govern including proliferation adhesion and migration The book emphasizes mechanistic models that are accessible to experimental testing and includes detailed examples of important contemporary issues This much needed book introduces chemical engineers and bioengineers to important problems in receptor biology and familiarizes cell biologists with the insights that can be gained from engineering analysis and synthesis As such chemical engineers researchers and advanced students in the fields of biotechnology biomedical sciences bioengineering and molecular cell biology will find this book to be conceptually rich timely and useful *From Structure to Signalosomes: New Perspectives About Membrane Receptors and Channels* Yi Ma,Kai He,Gerald A.
