*Regional Development in Europe* Jürgen Allesch, 1989      **Regional Innovation Systems - An Analysis of Innovation Policy Instruments** Michael Bison, 2007-02-01 Inhaltsangabe Abstract Innovation is essential for the competitiveness of companies within the globalised knowledge economy In the actual situation of high unemployment rates in most western countries public economy support works thereby actively on the improvement of innovation activity conditions The regional level is for this attempt the most interesting spatial entity because of its high significance in global economic mechanisms The questions motivating this master thesis are how regional innovation policy can improve a regional innovation system and which of the possible policy instruments the most effective ones are to combat unemployment Innovations are the new combination of recent or established knowledge whose implementation had a noticeable effect on the performance of the organisation it was implemented in This includes product process organisational and people innovations Innovations are not anymore an individual effort but a process which involves many actors and institutions The basis for the exploration of how to support the development and implementation of these innovations is the regional innovation system approach It divides the innovation process into phases and their linkages and allows identifying analytically the evolved actors and the weaknesses of the innovation process The analysis of innovation policy instruments assigns each weakness within the innovation process an instrument which is explained and analysed in detail The examined instruments are competence centres start up centres science parks networks regional knowledge management and diffusion agencies Each instrument s function and its main characteristics get described together with a best practice example which leads to a conclusion on its effects on innovation and employment The result of the analysis is that competence centres start up centres and science parks are central instruments and have the highest potential for employment effects Networks regional knowledge management and diffusion agencies are more supporting measures that improve the performance of the first three For the success of all instruments their combination with each other and the utilisation of synergies and dependencies between them is essential A holistic concept including all instruments is the most effective way to support regional innovation processes These findings get transferred to the case study region Bonn where as an example for an      **Protected Areas and Regional Development in Europe** Ingo Mose, 2016-04-15 While originally created as reserves for beautiful landscapes and endangered species protected areas in Europe were subsequently used as a means to preserve whole ecosystems with restrictions on human activities and impacts More recently protected areas are also being considered as instruments for regional development particularly in marginal regions facing severe economic and socio cultural problems Contrary to previous conservation focused policies new approaches aim to blend conservation and development functions making protected areas real living landscapes and integrating activities such as agriculture forestry handicrafts tourism and education with the conservation and sustainability aspects The past decade has seen a marked increase in these innovative and dynamic types of protected

areas However the policies of individual European countries are very varied This volume provides a comprehensive overview of the relationship between protected areas and regional development policies both in theory and practice Illustrated with a wide range of case studies from across Europe it compares the different concepts strategies and instruments being used In conclusion it suggests the most innovative and successful ways to use protected areas for regeneration and sustainable regional development

*The Regions and the New Europe* Martin Rhodes, 1995 The contributors argue that some regions such as Emilia Romagna Baden Wurttemberg and Rhone Alpes have been highly successful in launching regional development strategies Others such as the English and certain southern European regions lack the economic resources and institutional structures to follow these examples The book analyses the reasons for success and failure and considers the strategic development options open to the less developed European regions

*Regional Behaviour* Dimitrios C. Christopoulos, 2018-02-06 This title was first published in 2001 In the framework of the EU a number of policies have been devised for regions in order to facilitate their balanced economic development The author argues that the focus on regional planners and their actions in academic literature has obscured the importance of regional elites in this process The author compares Western Scotland and the west of Crete focusing on the wider regional political and business elites within these regions and attempting a comparison of elite attitudes within regions and between regions

*Enterprising Initiatives in the Experience Economy* Britta Timm Knudsen, Dorthe Refslund Christensen, Per Blenker, 2014-09-19 Over the last decade the close relationship between culture and economy or the experience economy has

risen on the agenda Although there is an established research field for analysing the economic impact of entrepreneurship there is currently a limited amount of research that analyses the cultural impact and opportunity of entrepreneurship Linking experience economy with enterprising behavior moves the term away from businesses competitiveness and consumer behavior towards a more value focused business in general This ground breaking book integrates entrepreneurship and empowerment into one central theme drawing on research from both the social sciences innovation entrepreneurship empowerment and activism and the humanities participatory culture user generated designs creative networks Enterprising Initiatives expands the definition of entrepreneurship beyond a primarily economic profit seeking phenomenon to a broader understanding of enterprising behaviour based on an individual opportunity nexus Beyond social entrepreneurship it explores a broad range of individual collective and cooperative citizen initiatives under the umbrella of enterprising action This innovative approach will be of great interest to scholars in entrepreneurship social entrepreneurship cultural entrepreneurship cultural studies and consumer culture as well as for policy makers in public and local government regional development and cultural event management
