European Integration Willem Molle,2017-03-27 Through four previous editions The Economics of European Integration by Willem Molle has established itself as a preferred textbook for students of the economics of the EU as well as a reliable reference work for those with a professional interest in the European Union Carefully revised this fifth edition takes into account changes in course requirements new statistical information and recent policy developments It includes new material on the ongoing integration of the New Member States and the new forms of association with accession countries in Central and Eastern Europe the implementation of the Monetary Union and the performance of the euro the EU experience as a guide for the economic integration of other regions and for the improvement of world economic governance Written in a clear style and combining original insights with authoritative analysis this new edition will further enhance the book s reputation for providing the ideal introduction to the economics of the European Union Foreign Direct Investment and

Corporate Networking Robert L. A. Morsink,1998-01-01 This innovative book analyses the geographical patterns in foreign direct investment flows by combining elements from the theory of international production and the theory of economic geography It develops a model for explaining why foreign direct investment is attracted to certain locations Foreign Direct Investment and Corporate Networking will be of interest to economists working in the areas of international trade and investment economic geographers and corporate strategy advisors as well as to policy makers from government and non governmental organisations **Regional and Global Multinationals** Christoph Czychon,2021-06-29 Based on their ability

to facilitate interdependencies across the borders of national and regional markets multinationals enterprises MNEs act as the key drivers of world trade and investment activities While recent global challenges additionally highlight the need to explain and assess the status and progress of internationality regionality previous research renders the concept of firm level globalization as a special but not the general case Christoph Czychon dedicates specific attention to the research on regional and global MNEs based on an extensive and rigorous review of the existing academic literature as well as the analysis of

2005 2015 empirical data from the European context with a focus on CAC40 and DAX30 listed firms In doing so the author offers insights and results that stand in contrast to the original narrative of the debate and presents a comprehensive and updated perspective on regional and global MNEs

Currency and Contest in East Asia William M. Grimes, 2011-03-15 Since the Asian Financial Crisis of 1997 98 East Asian economies have sought to make themselves less vulnerable to global financial markets by transforming the regional financial architecture With Japan as a leading actor they have introduced initiatives to provide emergency financing to crisis economies support the development of local currency bond markets and better coordinate currency policies In *Currency and Contest in East Asia* William W Grimes builds on years of primary research and scores of interviews with participants and policy analysts to provide the most accurate complete and detailed description available of attempts to build financial cooperation among East Asian countries Adapting realist political economy theory to the realities of contemporary global finance Grimes places regional issues firmly in the wider context of great power rivalries He argues that financial regionalism can best be understood as one arena for competition among Japan the United States and China Despite their mutual desire for regional prosperity and economic stability these three powers have conflicting political interests Their struggles for regional leadership raise questions about the long term feasibility of regional financial cooperation the possible effects of Sino Japanese rivalry on regional financial stability and the potential for East Asian financial regionalism to undermine the long established albeit waning global and regional dominance of the United States and the dollar
