Regulating Entrepreneurial Behaviour In European Health Care Systems:

Regulating Entrepreneurial Behaviour in European Health Care Systems Richard B. Saltman, Reinhard Busse, Elias Mossialos, 2002 Contending that European policy makers in their efforts to protect patient's health have enacted an overly bureaucratic and static regulatory regime this collection of 11 papers argues for a new regulatory regime that allows for more entrepreneurial innovation while still protecting the quality of service of the health care systems Authors discuss the lessons learned from the regulation of the public utilities accreditation as a means for the regulation of quality the challenge of corruption the effects of regulation on entrepreneurship in the pharmaceutical markets and an international perspective on the regulatory environment of general practice The book is distributed in the US by Taylor Francis Annotation copyrighted by Book News Inc Portland OR

Health Care Systems in Europe under Austerity E. Pavolini, A. Guillén, 2013-11-27 This book analyses recent reform trends of European health care systems Using eight European countries case studies it connects policy reforms with a healthcare quadrilemma and compares how well these systems perform in terms of economic efficiency medical achievements social inequalities and responsiveness to patients and workers

Trends in EU Health Care Systems Winfried de Gooijer, 2007-03-20 For decades the nations of the European Union wrote the book on universal health coverage Recent economic developments however have created problems ranging from widening inequities of care to growing numbers of uninsured a progression expertly described by Win de Gooijer in *Trends in EU Health Care Systems* De Gooijer's dual background as an economist and the CEO of Dutch health care corporations together with his broad international experience give him a unique understanding of his subject He traces world economic currents that have affected quality of and access to health care throughout the EU trends that took years to develop but are coming to rapid fruition Comparative illustrations from Europe and the US show

national interests at odds with global ones as governments transfer social responsibilities to market driven agencies Included in his discussion Expansion versus reform a forty year analysis of Europe s health care systems Why governments cannot completely control the always evolving dynamics of health care Ethical and medical issues arising from the continent s changing politics Predictions on future directions in EU health care how much change is possible how much is necessary Some may find De Gooijer s ideas startling and the book is bound to be the subject of controversy But it is critical reading for health care managers and policymakers politicians and insurers advanced students of public health in short anyone looking to Europe for the next phase of this far reaching evolution This book is a very important contribution to the debate about the future direction of health policy in Europe It captures the economic and social trends that underpin health systems with a keen and objective eye and poses some very challenging questions about the future It will not be a comfortable read for politicians but it is a book that must be read Brian Edwards President of the European Hospital and Health Care Federation HOPE The concept of subsidiarity is prohibitive to a sound discussion of health care systems on a European level Economic principles dominate the debate and their consequences for health care are hardly understood The author bridges the gap between economic and health care developments and wrote a book that is essential reading for policy makers and health care managers who really care Rob Koning Past President of the European Health Management Association EHMA The future development of European health policy should not be an exclusively political affair Hospital managers should also be actively involved particularly as regards the design and organization of present and future European hospitals For this purpose this book is a useful and well founded manual It not only clarifies the dangers but also points to the challenges and possible alternative policy options Therefore this book should be in the boardroom of each and every European hospital Willy Heuschen Secretary General of the European Association of Hospital Managers EAHM Win de Gooijer brings immense clarity to a complex issue In this book he draws major and new conclusions and raises many challenging questions We hope this book will draw the attention it deserves G rard Vincent President International Hospital Federation

Europe Restructured David Owen, 2015-08-27 In Europe Restructured David Owen lays out a blueprint for a new structure where those countries that may wish to be part of a more integrated EU eurozone are facilitated in doing so while those who may only want a Single Market European Community are free to do so He suggests building on the Single Market European Economic Area of 30 states including Norway Iceland and Liechtenstein and inviting Turkey to join This with Croatia joining the EU next year would make 32 countries and some others later Europe Restructured recounts the key historical events in Britain s equivocal relationship with the Common Market European Community and now Union from 1962 2012 and considers how Britain s place in the EU affects her other global foreign and

defense relationships in particular with the United States All this leads David Owen to the conclusion that urgently in 2013 or more likely in 2015 2016 a referendum will have to be held in the UK He wants a clear referendum choice in the UK

The European Health Report 2002 World Health Organization. Regional Office for Europe,2002-07 The European health report responds to the statutory requirements to provide the member states with essential public health information The report analyses a decade of evidence on health in the Region which embraces 51 WHO Member States with some 870 million people While overall levels of health in the Region are among the highest in the world the report describes widening gaps between and within countries It confirms the strong links between socioeconomic development health and equity in the WHO European Region The report builds on the view that health policies cannot be isolated from other policy sectors One central task in improving health is to reduce socioeconomic inequalities thus placing health in the context of human development The link between health and employment income maintenance social welfare housing and education is crucial in all European Member States The report focuses on concrete evidence useful for decision makers in public health Its role is to summarize and feed back to Member States the information created deposited and accredited during the Regional Office s work with Member States on key topics and issues in public health in Europe in the context of the values and principles of WHO as one Organization
