Regulating Financial Markets A Critique And Some Proposals:

Regulating Financial Markets George J. Benston,1999 This study explains why financial services have for centuries been regulated to a greater extent than are most products that do not directly affect people s health or safety **The Advantage of Competitive Federalism for Securities Regulation** Roberta Romano,2002 In this analysis of securities regulation the author demonstrates that the current approach toward U S regulation exclusive jurisdiction of the Securities and Exchange Commission is misguided and should be revamped by implementing a regime of competitive federalism Under such a system firms would select their regulator from among the states the SEC or other nations The author asserts that competitive federalism harnesses the high powered incentives of markets to the regulatory state to produce regulatory arrangements most compatible with investors preferences The author contends that the empirical evidence does not indicate that the SEC is effective in achieving its stated objectives The commission s expansions of disclosure requirements over the years have not significantly enhanced investors wealth In addition she asserts evidence from institutional equity and debt markets and cross country listing practices demonstrates that firms voluntarily disclose substantial information beyond mandatory requirements to provide the information investors demand The author concludes that under competitive federalism the aspects of the SEC s regime that are valuable to investors will be retained those that are not will be discarded and the resulting securities regime will better meet investors needs than the present one Hobart Paper ,1998 *The Financial Crisis and the Regulation of Finance* Christopher J. Green, Eric J. Pentecost, Thomas G. Weyman-Jones,2011-01-01 The Financial Crisis and the Regulation of Finance includes a comprehensive overview of the crisis and reviews the theory and practise of regulation in the UK and worldwide The contributors all international experts on financial markets and regulation provide perspectives and analysis on macro prudential regulation the regulation of financial firms and the role of shareholders and disclosure This rigorous book will be of great interest to all those with an interest in banking and finance including academics professionals bankers regulators advisors and civil servants Students on banking and finance courses will also find this clear and compact resource invaluable Mobile Payments, Consumer Policy, and the Law Nwanneka Ezechukwu,2023-03-17 Mobile technology offers an innovative and cost effective channel for delivering a range of financial services including mobile payments In some jurisdictions mobile payments simply provide a convenient option for facilitating payment transactions In other jurisdictions mobile payments are viewed as potentially transformative because they present an opportunity to expand access to financial services However as with other innovations mobile payments raise consumer protection concerns and require robust regulatory mechanisms to address such concerns Against this backdrop the book adopts a typology of consumer policy tools which can be used to address the identified consumer concerns This typology guides the enquiry into the existing consumer protection frameworks applying to mobile payments in selected jurisdictions Canada Kenya and the United Kingdom The main objective of this endeavour is to identify best practices that national

authorities seeking to leverage mobile payments and similar innovations can emulate This book will be of interest to policymakers regulators industry stakeholders students and scholars interested in the regulation of innovative financial services particularly from a consumer protection perspective The New Financial Architecture Benton E. Gup, 2000-09-30 Bank failures crises global banking megamergers changes in technology the effect of these world events is to weaken existing methods of regulating bank safety and soundness and even to make some methods ineffective Federal regulators are evaluating new ways to solve them Dr Gup and his panel of academics and regulatory professionals explore these problems and the difficulties in implementing solutions They point out that global banking megamergers and changes in technology are drastically altering the way financial services are delivered They also argue that existing methods of bank regulation formulated in the United States and elsewhere as early as the 19th century are not able to cope with these changes The search now underway for new methods that are global in scope Inevitably they will involve cross border supervision and international cooperation Covering a wide range of topics from the rationale of banking regulation to optimal banking regulation in the new world environments this book examines the innovative tools needed to cope with these problems Greater reliance on market discipline the use of internal controls based on statistical models such as Value at Risk and subordinated debt are discussed This timely probing analysis of one of the hottest topics in bank regulation today is an important resource for professionals and their academic colleagues in the fields of banking finance investment and world trade *The Governance of Macroprudential Policy* Tracy C Maguza, 2024-01-11 This book critically examines the theoretical foundations and legal framework for macroprudential policy its tools and governance in the UK the US and the EU It goes deeper into a normative discussion of the legitimacy of macroprudential policy in these jurisdictions where the mandate for maintaining financial stability has been delegated to independent authorities The Global Financial Crisis of 2007 2008 reopened debates regarding legitimacy of the independent regulatory state given its democratic deficit The response to a perceived legitimacy gap has been to increase political oversight in financial policymaking and regulation The book posits that the real problem is not a lack of democracy but rather a lack of social justice Across the globe there is growing dissatisfaction with a financial system and regulatory process that appear depersonalised and perpetuate inequalities Citizens are calling for more socially just systems of governance and the future success of financial policymakers and regulators will hinge on this Given the marked distributional effects that have been noted in some macroprudential policy tools the book questions whether macroprudential policy should be solely based on highly rationalised and strongly quantitative reasons By proposing that macroprudential policymakers should have a social justice mandate alongside their financial stability mandate as well as legal mechanisms for operationalising the added authority the book contributes to the growing discourse on the role of social justice in public policy **Raising Capital on Arab Equity Markets** Lu'ayy Minwer Al-Rimawi, 2012-02-01 This first book of its kind discusses in particular the role of investor protection as regards disclosure
