Rejuvenation The History Of An Idea:

Rejuvenation Eric J. Trimmer, 1967 Rejuvenation, 1970 **Rejuvenation**, 1970 *Rejuvenation. The History of an Idea. Illustrated* Eric James Trimmer, 1967 Rejuvenation. The History of an Idea, Etc. [With Plates.]. Eric James TRIMMER, 1967 *The Cult of Youth* James F. Stark, 2020-03-19 The first account of anti ageing and rejuvenation in modern Britain exploring hormones diet electrotherapy exercise and skin care Aging Moderns Scott Herring, 2022-12-13 What happens when the avant garde grows old Examining a group of writers and artists who continued the modernist experiment into later life Scott Herring reveals how their radical artistic principles set out a new path for creative aging Aging Moderns provides portraits of writers and artists who sought out or employed unconventional methods and collaborations up until the early twenty first century Herring finds Djuna Barnes performing the principles of high modernism not only in poetry but also in pharmacy orders and grocery lists In mystery novels featuring Gertrude Stein and Alice B Toklas along with modernist souvenir collections the gay writer Samuel Steward elaborated a queer theory of aging and challenged gay male ageism The Harlem Renaissance dancer Mabel Hampton dispelled stereotypes about aging through her queer of color performances at the Lesbian Herstory Archives Herring explores Ivan Albright s magic realist portraits of elders Tillie Olsen s writings on the aging female worker and the surrealistic works made by Charles Henri Ford and his caregiver Indra Bahadur Tamang at the Dakota apartment building in New York City Showcasing previously unpublished experimental art and writing this deeply interdisciplinary book unites new modernist studies American studies disability studies and critical age studies Aging Moderns rethinks assumptions about literary creativity the depiction of old age and the boundaries of modernism *The Fountain of Youth* Stephen G. Post, Robert H. Binstock, 2004-04-08 A wide variety of ambitions and measures to slow stop and reverse phenomena associated with aging have been part of human culture since early civilization From alchemy to cell injections to dietary supplements the list of techniques aimed at altering the processes of aging continues to expand Charlatans quacks and entrepreneurs proffering anti aging products and practices have always exploited uniformed customers and instilled doubt and apprehension toward practices intended to extend life Recently however the pursuit of longevity has developed into a respectable scientific activity Many biologists are substantially funded by the government and the private sector to conduct research that they believe will lead to effective anti aging interventions While many embrace this quest for prolongevity extended youth and long life others fear its consequences If effective anti aging interventions were achieved they would likely bring about profound alterations in the experiences of individual and collective life What if aging could be decelerated to the extent that both average life expectancy and maximum life span would increase by forty percent What if all humans could live to be centenarians free of the chronic diseases and disabilities now commonly associated with old age What if modern scientists could find the modern equivalent to the Fountain of Youth that Ponce de Leon sought This book addresses these questions by exploring the ramifications of possible anti aging interventions on both individual and collective

life Through a series of essays it examines the biomedical goal of prolongevity from cultural scientific religious and ethical perspectives offering a sweeping view into the future of aging Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1971 **Modernism, Technology, and the Body** Tim Armstrong,1998-02-28 This book is a study of the relations between the body and its technologies in modernism Tim Armstrong traces the links between modernist literary texts and medical psychological and social theory across a range of writers including Yeats Henry James Eliot Stein and Pound Armstrong shows how modernist texts enact experimental procedures which have their origins in nineteenth century psychophysics biology and bodily reform techniques but within a context in which the body is reconceived and subjected to new modes of production representation and commodification Drawing on a wide range of disciplines Armstrong challenges the received oppositions between technology and literature the instrumental and the aesthetic by demonstrating the leaky boundaries and complex interconnections between these domains This book offers a cultural history of modernism as it negotiated the enduring fact of the human body in a period of rapid technological change A History of Ideas About the Prolongation of Life Gerald Gruman,2003-02-26 Dr Gruman s book examines the quest for longevity and immortality up to the year 1800 He presents multicultural perspectives and attitudes as depicted in Islamic and Chinese societies as well as in Western Civilization This scholarly work contributes to our understanding of the origins of medicine personal hygiene and public health as well as the underlying psychological and social determinants of longevity and humanity s longing for its attainment **What Does It Mean to Grow Old?** Thomas R. Cole,1987-08 In What Does It Mean to Grow Old essayists come to grips as best they can with the phenomenon of an America that is about to become the Old Country They have been drawn from every relevant discipline gerontology social medicine politics health anthropology ethics law and asked to speak their mind Most of them write extremely well and their sharply individual voices are heard **The Return of Ideology** Cheng Chen,2016-07-06 As a nation makes the transition from communism to democracy or another form of authoritarianism its regime must construct not only new political institutions but also a new political ideology that can guide policy and provide a sense of mission The new ideology is crucial for legitimacy at home and abroad as well as the regime s long term viability In The Return of Ideology Cheng Chen compares post communist regimes with a focus on Russia under Putin and post Deng China investigating the factors that affect the success of an ideology building project and identifies the implications for international affairs Successful ideology building requires two necessary but not sufficient conditions The regime must establish a coherent ideological repertoire that takes into account the nation s ideological heritage and fresh surges of nationalism Also the regime must attract and maintain a strong commitment to the emerging ideology among the political elite Drawing on rich primary sources including interviews surveys political speeches writings of political leaders and a variety of publications Chen identifies the major obstacles to ideology building in modern Russia and China and assesses their respective long term prospects Whereas creating a new regime ideology has been a protracted and difficult

process in China it has been even more so in Russia The ability to forge an ideology is not merely a domestic concern for these two nations but a matter of international import as these two great powers move to assert and extend their influence in the world China Dream: Still Coming True? A cura di Alessia Amighini, 2016-09-08 At a time when the economic transition in China is casting shadows on the weak world recovery and the country is further increasing military spending at double digit rates it is key to assess how far President Xi has gone in fulfilling the China Dream of ascendance to cultural economic and military power Even more important is to try to figure out what the substance of the China Dream is likely to be in the near future The current risk is that the Chinese people and the Chinese government are dreaming different dreams and that Xi's China Dream might be more a dream for the country and much less so for the people China has recently reached a series of symbolic milestones the Yuan's inclusion in the IMF's SDR basket the new China led Asian Infrastructure Investment Bank AIIB the market economy status by a number of countries The 2016 Chinese G20 Presidency will provide a timely occasion for China to better define its role in global economic governance However progress on reforms is lagging behind expectations and international tensions are on the rise This volume explores the viability of the China Dream and analyzes its major challenges **1650-1850**, 1994 **A History of Religious Ideas, Volume 2** Mircea Eliade, 2011-12-16 In volume 2 of this monumental work Mircea Eliade continues his magisterial progress through the history of religious ideas The religions of ancient China Brahmanism and Hinduism Buddha and his contemporaries Roman religion Celtic and German religions Judaism the Hellenistic period the Iranian syntheses and the birth of Christianity all are encompassed in this volume

Ideas in the History of Economic Development Estrella Trincado, Andrés Lazzarini, Denis Melnik, 2019-08-05 This edited volume examines the relationship between economic ideas economic policies and development institutions analysing the cases of 11 peripheral countries in Europe Latin America and Asia across the nineteenth and twentieth centuries It sheds light on the obstacles that have prevented the sustained economic growth of these countries and examines the origins of national and regional approaches to development The chapters present a fascinating insight into the ideas and visions in the different locations with the overarching categories of economic nationalism and economic liberalism and how they have influenced development outcomes This book will be valuable reading for advanced students and researchers of development economics the history of economic thought and economic history *National Union Catalog*, 1973 **The Idea of Historical Recurrence in Western Thought** G. W. Trompf, 2023-11-15 The idea that history repeats itself has a long and intriguing history This volume is concerned with the period of time in the Western tradition when its expressions were most numerous and fervent The author shows that this idea should not be confined to its cyclical version for such notions as reenactment retribution and renaissance also belong under the wide umbrella of recurrence He argues moreover that not only the Greco Roman but also the biblical tradition contributed to the history of this idea The old contrast between Judeo Christian linear views of history and Greco Roman cyclical views is brought into question Beginning with Polybius Trompf

examines the manifold forms of recurrence thinking in Greek and Roman historiography then turns his attention to biblical views of historical change arguing that in Luke Acts and in earlier Jewish writings an interest in the idea of history repeating itself was clearly demonstrated Jewish and early Christian writers initiated and foreshadowed an extensive synthesizing of recurrence notions and models from both traditions although the syntheses could vary with the context and dogmatic considerations The Renaissance and Reformation intertwine classical and biblical notions of recurrence most closely yet even in the sixteenth century some ideas distinct to each tradition such as the Polybian conception of a cycle of governments and the biblical notion of the reenactment of significant events were revived in stark separation from each other The Idea of Historical Recurrence in Western Thought deals with a continuing but not always fruitful dialogue between the two great traditions of Western thought a dialogue that did not stop short in the days of Machiavelli but has been carried on to the present day This study is the first half of a long story to be continued in a second volume on the idea of historical recurrence from Giambattista Vico to Arnold Toynbee The idea that history repeats itself has a long and intriguing history This volume is concerned with the period of time in the Western tradition when its expressions were most numerous and fervent The author shows that this idea should not be confined to

The History of the Study of Landforms Volume 2 R. P. Beckinsale, R. J. Chorley, A J Dunn, 2003-09-02 This volume is entirely devoted to the life and work of the world's most famous geomorphologist William Morris Davis 1850-1934 It contains a treatment in depth of Davis many contributions to the study of landforms including the cycle of erosion denudation chronology arid and karst geomorphology the coral reef problem
