*Relaxed Intensity* Happy Bhalla, 1998-01-01 International journal of sport psychology, 2004 American Book Publishing Record, 1998 **Directorio de psicología de la actividad física y el deporte** Félix Guillén García, Sara Márquez Rosa, 2005-10-10 **Cumulated Index to the Books**, 1999 **Anxiety Management Training** Richard M. Suinn, 2013-11-11 This book owes its existence to an ideal a burning frustration and a trusted believer The ideal was the sense that governed my feelings about systematic desensitization during my early introduction to its benefits It is hard to put into words the initial doubts that pervaded me during my first attempt with desensitization with a seriously phobic client as I religiously worked my way through the procedure Will this client really become relaxed And then what will the visualization actually occur And then what will the fear really vanish just like that And oh the feeling of discovery and validation when indeed the process worked and worked well Desensitization was everything it was claimed to be systematic clean theoretically grounded empirically tested applicable as a behavioral technology regardless of one's own theoretical bias And there were testable outcomes concrete evidence for change So I became invested and aimed at doing more with desensitization My students and I raised some theoretical questions in order to open the doors for revising the desensitization to improve on its applications We tested the rapidity with which desensitization could be accomplished shortening the time by shortening the anxiety hierarchy Along with others we studied the question of group delivery and reducing the total number of sessions as well as examining the use of audiotaped delivery of services *The Sport Psychologist's Handbook* Joaquin Dosil, 2006-02-22 A practical handbook for sports psychologists that outlines the most effective interventions for athletes across a variety of sports A practical manual for the growing force of sports psychologists helping today's athletes to unprecedented levels of application and success Offers specific guidance on the psychological assessment of athletes uniquely presented in an accessible sport by sport format Written by an experienced practicing sports psychologist and author who draws on his own methods and experience in the field Changing State-society Relations In Contemporary China Wei Shan, Lijun Yang, 2016-08-30 This book attempts to provide an overview of social and political changes in Chinese society since the global financial crisis Rapid economic development has restructured the setup of society and empowered or weakened certain social players The chapters in this book provide an updated account of a wide range of social changes including the rise of the middle class and private entrepreneurs the declining social status of the working class as well as the resurgence of non governmental organisations and the growing political mobilisation on the internet The authors also examine the implications of those changes for state society relations governance democratic prospects and potentially for the stability of the current political regime **Energy, Environment and Economic Transformation in China** Shiyi Chen, 2018-10-24 China has achieved rapid economic growth since the market oriented reform in 1978 and became the second largest economy in the world in 2010 However the growth model in China is still extensive in nature and

may be characterized with high energy consumption and heavy environmental pollutions etc In fact China has successively become the largest carbon emitter since 2007 and the largest energy consumer since 2009 in the world This book endeavors to analyze whether such energy driven and environment restricted economic growth can be sustainable in China in the long run The book describes the basic situations of energy consumption and environmental pollution in China from the dimensions of industries regions and energy types It also introduces the evolution of energy and environmental policies implemented in China In particular this book makes use of the environmental activity analysis model to assess the sustainable transformation of economic model in Chinese industries and regions This model captures the negative externalities of pollutants and estimates the environmental total factor productivity accurately The possibilities of win win development and double dividend are also forecasted This book proposes new methods to measure the environmental total factor productivity evaluate the process of low carbon transformation quantify the structural bonus estimate the abating cost and forecast the win win development and so on Researchers may find these methodologies useful for measuring other pollutants and for analysis in other countries
