San Francisco 1865 1932 Politics Power And Urban Development:

San Francisco, Eighteen Sixty-Five to Nineteen Thirty-Two William Issel, Robert W. Cherny, 1987-03-16 **Building San Francisco's Parks, 1850-1930** Terence Young, 2004-02-16

In 1865 when San Francisco's Daily Evening Bulletin asked its readers if it were not time for the city to finally establish a public park residents had only private gardens and small urban squares where they could retreat from urban crowding noise and filth Five short years later city supervisors approved the creation of Golden Gate Park the second largest urban park in America Over the next sixty years and particularly after 1900 a network of smaller parks and parkways was built turning San Francisco into one of the nation's greenest cities In *Building San Francisco's Parks 1850 1930* Terence Young traces the history of San Francisco's park system from the earliest city plans which made no provision for a public park through the private garden movement of the 1850s and 1860 Frederick Law Olmsted's early involvement in developing a comprehensive parks plan the design and construction of Golden Gate Park and finally to the expansion of green space in the first third of the twentieth century Young documents this history in terms of the four social ideals that guided America's urban park advocates and planners in this period public health prosperity social coherence and democratic equality He also differentiates between two periods in the history of American park building each defined by a distinctive attitude towards improving nature the romantic approach which prevailed from the 1860s to the 1880s emphasized the beauty of nature while the rationalistic approach dominant from the 1880s to the 1920s saw nature as the best setting for uplifting activities such as athletics and education *Building San Francisco's Parks 1850 1930* maps the political cultural and social dimensions of landscape design in urban America and offers new insights into the transformation of San Francisco's physical environment and quality of life through its world famous park system

Governor James Rolph and the Great Depression in California James Worthen, 2010-07-27

In 1911 when businessman James Rolph first ran for mayor of San Francisco he promised I will be mayor of the whole city and not the mayor for any particular section This statement seemed to characterize Rolph's political career After serving an unprecedented five terms as mayor he went on to win California's 1930 gubernatorial election Rolph however had severely underestimated the challenges he would be up against as a Depression era governor A genuine love of people and desire to help had gotten him as far as the governor's office but could do little to help him solve the new problems he found Lack of a firm agenda coupled with an unrealistic or perhaps idealistic governing style left him at odds with the legislature and found his chief lieutenants forming into warring cliques Ultimately Rolph in spite of good intentions and a love of civil service was unable to translate his mayoral triumph with all its charm and style into a gubernatorial success This biography relies heavily on primary sources such as contemporary newspaper articles and firsthand recollections Beginning with Rolph's mayoral career the book enumerates the qualities which led to his phenomenal success as San Francisco's top politician The work then examines the criticisms levied against Rolph as governor and the ways in which these complaints were and were not justified The unfortunate

historical timing of Rolph s governorship is also discussed In many ways Rolph s attempt to translate from prosperous 20s mayor to Depression era 30s governor was simply ill fated from the very beginning A detailed bibliography and index is also provided

California Polyphony Mina Yang,2010-10-01 What does it mean to be Californian To find out Mina Yang delves into multicultural nature of musics in the state that has launched musical and cultural trends for decades In the early twentieth century an orientalist fascination with Asian music and culture dominated the popular imagination of white Californians and influenced their interactions with the Asian Other Several decades later tensions between the Los Angeles Police Department and the African American community made the thriving jazz and blues nightclub scene of 1940s Central Avenue a target for the LAPD s anti vice crusade The musical scores for Hollywood s noir films confirmed reactionary notions of the threat to white female sexuality in the face of

black culture and urban corruption while Mexican Americans faced a conflicted assimilation into the white American mainstream Finally Korean Americans in the twenty first century turned to hip hop to express their cultural and national identities A compelling journey into the origins of musical identity California Polyphony explores the intersection of musicology cultural history and politics to define Californian

Race, Class and Power in the Building of Richmond, 1870-1920 Steven J. Hoffman, 2017-08-30 Using post Civil War Richmond Virginia as a case study Hoffman explores the role of race and class in the city building process from 1870 to 1920 Richmond's railroad connections enabled the city to participate in the commercial expansion that accompanied the rise of the New South A highly compact city of mixed residential industrial and commercial space at the end of the Civil War Richmond remained a classic example of what historians call a walking city through the end of the century As city streets were improved and public transportation became available the city's white merchants and emerging white middle class sought homes removed from the congested downtown The city's African American and white workers generally could not afford to take part in this residential migration As a result the mixture of race and class that had existed in the city since its inception began to disappear The city of Richmond exemplified characteristics of both Northern and Southern cities during the period from 1870 to 1920 Retreating Confederate soldiers had started fires that destroyed the city in 1865 but by 1870 the former capital of the Confederacy was on the road to recovery from war and reconstruction reestablishing itself as an important manufacturing and trade center The city's size diversity and economic position at the time not only allows for comparisons to both Northern and Southern cities but also permits an analysis of the role of groups other than the elite in city building process By taking a look at Richmond we are able to see a more complete picture of how American cities have come to be the way they are

Industrial Cowboys David Igler, 2005-01-28 The process by which two neighborhood butchers turned themselves into landed industrialists depended to an extraordinary degree on the acquisition manipulation and exploitation of natural resources Igler examines the broader impact of western industrialism as exemplified by Miller Lux on landscapes and waterscapes bringing to the forefront the important issues of land reclamation water politics San Francisco's unique business environment and the city's relation to its surrounding hinterlands He provides a rich discussion of the social relations engineered by Miller Lux from the dispossession of Californio rancheros to the ethnic segmentation of the firm's massive labor force Jacket

Rebel Imaginaries Elizabeth E. Sine, 2020-11-23 During the Great Depression California became a wellspring for some of the era's most inventive and imaginative political movements In response to the global catastrophe the multiracial laboring populations who formed the basis of California's economy gave rise to an oppositional culture that challenged the modes of racialism nationalism and rationalism that had guided modernization during preceding decades In Rebel Imaginaries Elizabeth E Sine tells the story of that oppositional culture's emergence revealing how aggrieved Californians asserted political visions that embraced difference fostered a sense of shared vulnerability and underscored the interconnectedness

and interdependence of global struggles for human dignity From the Imperial Valley s agricultural fields to Hollywood seemingly disparate communities of African American Native American Mexican Filipinx Asian and White working class people were linked by their myriad struggles against Depression era capitalism and patterns of inequality and marginalization In tracing the diverse coalition of those involved in labor strikes citizenship and immigration reform and articulating and imagining freedom through artistic practice Sine demonstrates that the era s social movements were far more heterogeneous multivalent and contested than previously understood *Many Wests* David M. Wrobel, Michael C. Steiner, 1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West s regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West s different places *Many Wests* presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions

Manufacturing the Modern Patron in Victorian California John Ott, 2017-07-05 Through the example of Central Pacific Railroad executives *Manufacturing the Modern Patron in Victorian California* redirects attention from the usual art historical protagonists artistic producers and rewrites narratives of American art from the unfamiliar vantage of patrons and collectors Neither denouncing nor lionizing nor dismissing its subjects it demonstrates the benefits of taking art consumers seriously as active contributors to the cultural meanings of artwork It explores the critical role of art patronage in the articulation of a new and distinctly modern elite class identity for newly ascendant corporate executives and financiers These economic elites also sought to legitimate trends in industrial capitalism such as mechanization incorporation and

proletarianization through their consumption of a diverse array of elite culture including regional landscapes panoramic and stop motion photography history paintings of the California Gold Rush the architecture of Stanford University and the design of domestic galleries This book addresses not only readers in the art history and visual and material cultures of the United States but also scholars of patronage studies American Studies and the sociology of culture It tells a story still relevant to this new Gilded Age of the early 21st century in which wealthy collectors dramatically shape contemporary art markets and institutions

from presidents and mayors to advocates for the rights of women blacks and workers constructed prospective memories of their present. They did so by contributing not just written testimony to time capsules but also sources that historians and archivists considered illegitimate such as photographs, phonograph records, films, and everyday artifacts. By offering a direct line to posterity, time capsules stimulated various hopes for the future. *Remembrance of Things Present* delves into these treasure chests to unearth those forgotten futures. **Divergent Jewish Cultures** Deborah Dash Moore, S. Ilan

Troen, 2008-10-01 Two creative centers of Jewish life rose to prominence in the twentieth century: one in Israel and the other in the United States. Although Israeli and American Jews share kinship and history drawn from their Eastern European roots, they have developed divergent cultures from their common origins, often seeming more like distant cousins than close relatives. This book explores why this is so, examining how two communities that constitute eighty percent of the world's Jewish population have created separate identities and cultures. Using examples from literature, art, history, and politics, leading Israeli and American scholars focus on the political, social, and memory cultures of their two communities, considering in particular the American Jewish challenge to diaspora consciousness and the Israeli struggle to forge a secular national Jewish identity. At the same time, they seek to understand how a sense of mutual responsibility and fate animates American and Israeli Jews who reside in distant places, speak different languages, and live within different political and social worlds.

Urbanization and the Pacific World, 1500-1900 Lionel Frost, 2017-05-15 Between 1500 and 1900 there was a constant growth in the numbers of large cities and networks of smaller towns throughout the Pacific world, in which traders and primary producers did business. The essays in *Urbanization and the Pacific World* explore the increasingly complex economic relationships that connected cities in and around the Pacific world to each other and pay particular attention to the impact that growing cities had on the economies of their hinterlands. The volume also contains articles that examine the problems that city growth created and the ways in which people were able to cope with them. Along with the new introduction, the essays cover all of the regions of the Pacific world in which city growth took place and will allow the reader to consider a wide range of common and contrasting urban experiences. **Downwardly Mobile** Andrew

Lawson, 2014-05-22 *Downwardly Mobile* explores the links between a growing sense of economic precariousness within the American middle class and the development of literary realism over the course of the nineteenth century, as it examines works by Rebecca Harding Davis, William Dean Howells, Henry James, Hamlin Garland, and others. **American Heathens**

Joshua Paddison, 2012-06-01 In the 19th-century debate over whether the United States should be an explicitly Christian nation, California emerged as a central battleground. Racial groups that were perceived as godless and uncivilized were excluded from suffrage and evangelism; among Indians, and the Chinese was seen as a politically incendiary act. Joshua Paddison sheds light on Reconstruction's impact on Indians and Asian Americans by illustrating how marginalized groups fought for a political voice, refuting racist assumptions with their lives, words, and faith. Reconstruction, he argues, was not

merely a remaking of the South but rather a multiracial and multiregional process of reimagining the nation
