## **Sanctions And Social Deviance The Question Of Deterrence:**

**Sanctions and Social Deviance** Charles R. Tittle,1980 *Theoretical Integration in the Study of Deviance and Crime* Steven F. Messner,Marvin D. Krohn,Allen E. Liska,1989-01-01 How to best generate theoretical growth in the contemporary study of deviance and crime has been the source of much debate This book represents a diverse range of viewpoints concerned about theoretical integration and its benefits The chapters encompass both discussion of the requisites for integrating theories and examinations of methodological strategies to test these theories By providing a source for those grappling with the issue of theoretical integration the book is sure to stimulate further theoretical development in the sociology of deviance and in criminology [An Introduction to Criminological Theory](#) Marilyn McShane,2013-09-13 First Published in 1997 This is a book about the different ways in which crime and criminal behaviour has been explained in modern times It will be seen that there are different explanations or theories which have been proposed at various times during the past 200 years by among others legal philosophers biologists psychologists sociologists and political scientists [The Punisher's Brain](#) Morris B. Hoffman,2014-04-14 Using evidence and arguments from neuroscience and evolutionary psychology Morris B Hoffman describes how the judge and jury system evolved **The Capacity to Punish** Henry N. Pontell,1985-02-22 This book examines the relationship between crime demographic characteristics criminal justice resources court processing and final sanctioning outcomes at the court level in the U S in the context of deterrence theory It concludes that current criminal justice practices especially the extremely low probability of certain and severe punishment make the deterrent effect of punishment minimal under the current system of criminal justice Court caseloads influenced particularly be the degree of inequality in the population appear to be pushing down the formal penalty structures and hence the probability of sanction The inability of courts to produce severe and certain sanctions is also linked to the overfunding of police relative to other criminal justice agencies especially the office of the prosecutor Putting more cops on the beat might actually lead to further erosion of the deterrent effect of punishment as more violators are pushed through the revolving door of the courts **Factors Influencing Individual Taxpayer Compliance Behaviour** Ken Devos,2013-09-30 This volume provides a comprehensive analysis of why taxpayers behave the way they do It reveals the motivations for why some taxpayers comply with the law while others choose not to comply Given the current global financial climate there is a need for governments worldwide to increase their revenue collections via improving taxpayer compliance Research into what shapes and influences taxpayer behavior is critical in that any marginal improvement in understanding and dealing with this behavior can potentially have a dramatic impact upon government revenue Based on Australian data derived from the data bases of the Australian Taxation Office as an example this book presents findings that provide lessons for tax systems around the world Regardless of the type of tax system in place taxpayers of all nationalities are concerned about how their tax authorities deal with non compliance and in particular how the tax authorities go about encouraging compliance and

ensuring a fair tax system for all The book presents empirical evidence concerning taxpayer compliance behavior with particular attention being drawn to the moral values of taxpayers the perceived fairness of the tax system and the deterrent measures undertaken by revenue authorities which influence that behavior Other issues examined include the degree to which tax penalties operate as an effective deterrent to curbing behavior and how taxpayers level of general tax knowledge and awareness also impacts upon their actions *The Law of Good People* Yuval Feldman,2018-06-07 Currently the dominant enforcement paradigm is based on the idea that states deal with bad people or those pursuing their own self interests with laws that exact a price for misbehavior through sanctions and punishment At the same time by contrast behavioral ethics posits that good people are guided by cognitive processes and biases that enable them to bend the laws within the confines of their conscience In this illuminating book Yuval Feldman analyzes these paradigms and provides a broad theoretical and empirical comparison of traditional and non traditional enforcement mechanisms to advance our understanding of how states can better deal with misdeeds committed by normative citizens blinded by cognitive biases regarding their own ethicality By bridging the gap between new findings of behavioral ethics and traditional methods used to modify behavior Feldman proposes a law of good people that should be read by scholars and policymakers around the world

Criminal Careers and "Career Criminals," National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on Research on Law Enforcement and the Administration of Justice,Panel on Research on Criminal Careers,1986-02-01 By focusing attention on individuals rather than on aggregates this book takes a novel approach to studying criminal behavior It develops a framework for collecting information about individual criminal careers and their parameters reviews existing knowledge about criminal career dimensions presents models of offending patterns and describes how criminal career information can be used to develop and refine criminal justice policies In addition an agenda for future research on criminal careers is presented The SAGE Encyclopedia of Criminal Psychology Robert D. Morgan,2019-04-25 The SAGE Encyclopedia of Criminal Psychology will be a modern interdisciplinary resource aimed at students and professionals interested in the intersection of psychology e g social forensic clinical criminal justice sociology and criminology The interdisciplinary study of human behavior in legal contexts includes numerous topics on criminal behavior criminal justice policies and legal process crime detection and prevention eyewitness identification prison life offender assessment and rehabilitation risk assessment and management offender mental health community reintegration and juvenile offending The study of these topics has been increasing continually since the late 1800s with people trained in many legal professions such as policing social work law academia mental health and corrections This will be a comprehensive work that will provide the most current empirical information on those topics of greatest concern to students who desire to work in these fields This encyclopedia is a unique reference work that looks at criminal behavior primarily through a scientific lens With over 500 entries the book brings together top empirically driven

McKnight,1992-10-30 This work is the first comprehensive study of law enforcement in traditional China The depth and rigour to which the subject is treated makes it invaluable in the study of Chinese society or law and order **Punishment and Crime** Gary Kleck,Brion Sever,2017-10-04 This book summarizes and synthesizes a vast body of research on the effects of legal punishment and criminal behavior Covering studies conducted between 1967 and 2015 Punishment and Crime evaluates the assertion that legal punishment reduces crime by investigating the impacts both positive and negative of legal punishment on criminal behavior with emphasis on the effects of punitive crime control policies via the mechanisms of deterrence and incapacitation Brion Sever and Gary Kleck author of the renowned Point Blank Guns and Violence in America present a literature review on legal punishment in the United States that is unparalleled in depth and scope This text is a must read for students researchers and policymakers concerned with the fields of corrections and crime prevention

*Moral Psychology and Human Agency* Justin D'Arms,Daniel Jacobson,2014-11-06 These ten original essays examine the moral and philosophical implications of developments in the science of ethics the growing movement that seeks to use recent empirical findings to answer long standing ethical questions Efforts to make moral psychology a thoroughly empirical discipline have divided philosophers along methodological fault lines isolating discussions that will profit more from intellectual exchange This volume takes an even handed approach including essays from advocates of empirical ethics as well as those who are sceptical of some of its central claims Some of these essays make novel use of empirical findings to develop philosophical research programs regarding such crucial moral phenomena as desire emotion and memory Others bring new critical scrutiny to bear on some of the most influential proposals of the empirical ethics movement including the claim that evolution undermines moral realism the effort to recruit a dual process model of the mind to support consequentialism against other moral theories and the claim that ordinary evaluative judgments are seldom if ever sensitive to reasons because moral reasoning is merely the post hoc rationalization of unthinking emotional response **Recent Developments in**

**Criminological Theory** Stuart Henry,2017-07-05 This volume contains recent and cutting edge articles from leading criminological theorists The book is organized into ten sections each representing the latest in the multi disciplinary orientations representing a cross section of contemporary criminological theory These sections include 1 Classical and Rational Choice 2 Biological and Biosocial 3 Psychological 4 Social Learning and Neutralization 5 Social Control 6 Social Ecology Sub cultural and Cultural 7 Anomie and Strain 8 Conflict and Radical 9 Feminist and Gender 10 Critical Criminologies Anarchist Postmodernist Peacemaking The articles were selected based on their contributions to advancing the field including ways in which the authors of each chapter understand the current theoretical tendencies of their respective approaches and how they envision the future of their theories Because of this the articles focus on theory rather than empirical research Of particular note is the tendency toward integration of different perspectives as described by editors Henry and Lukas in their original introduction to this volume Do Prisons Make Us Safer? Steven Raphael,Michael

A. Stoll, 2009-01-22 The number of people incarcerated in U S prisons and jails more than quadrupled between 1975 and 2005 reaching the unprecedented level of over two million inmates today Annual corrections spending now exceeds 64 billion dollars and many of the social and economic burdens resulting from mass incarceration fall disproportionately on minority communities Yet crime rates across the country have also dropped considerably during this time period In Do Prisons Make Us Safer leading experts systematically examine the complex repercussions of the massive surge in our nation s prison system Do Prisons Make Us Safer asks whether it makes sense to maintain such a large and costly prison system The contributors expand the scope of previous analyses to include a number of underexplored dimensions such as the fiscal impact on states effects on children and employment prospects for former inmates Steven Raphael and Michael Stoll assess the reasons behind the explosion in incarceration rates and find that criminal behavior itself accounts for only a small fraction of the prison boom Eighty five percent of the trend can be attributed to get tough on crime policies that have increased both the likelihood of a prison sentence and the length of time served Shawn Bushway shows that while prison time effectively deters and incapacitates criminals in the short term long term benefits such as overall crime reduction or individual rehabilitation are less clear cut Amy Lerman conducts a novel investigation into the effects of imprisonment on criminal psychology and uncovers striking evidence that placement in a high security penitentiary leads to increased rates of violence and anger particularly in the case of first time or minor offenders Rucker Johnson documents the spill over effects of parental incarceration children who have had a parent serve prison time exhibit more behavioral problems than their peers Policies to enhance the well being of these children are essential to breaking a devastating cycle of poverty unemployment and crime John Donohue s economic calculations suggest that alternative social welfare policies such as education and employment programs for at risk youth may lower crime just as effectively as prisons but at a much lower human cost The cost of hiring a new teacher is roughly equal to the cost of incarcerating an additional inmate The United States currently imprisons a greater proportion of its citizens than any other nation in the world Until now however we ve lacked systematic and comprehensive data on how this prison boom has affected families communities and our nation as a whole Do Prisons Make Us Safer provides a highly nuanced and deeply engaging account of one of the most dramatic policy developments in recent U S history

#### **The Oxford Handbook of Offender Decision Making**

Wim Bernasco, Jean-Louis Van Gelder, H. Elffers, 2017 The Oxford Handbook of Offender Decision Making provides high quality reviews of the main paradigms in offender decision making such as rational choice theory and dual process theory It contains up to date reviews of empirical research on decision making in a wide range of decision types including not only criminal initiation and

desistance but also choice of locations times targets victims methods as well as a large variety of crimes The Handbook also provides comprehensive in depth treatments of the major methods that can be used to study offender decision making

*A Fundamental Mistake* Graham Cliff,2012-06-01 Does it puzzle you that despite ever increasing rules controls and counter measures antisocial behaviour is seemingly spiralling out of control Why have there been riots in Britain Why is law enforcement failing to make our society a better place in which to live Have our politicians lost the plot Are our values wrong A Fundamental Mistake explains why a change of direction is needed in society s thinking about how to get people to behave themselves it also offers a carefully argued strategy by which to achieve this The emphasis needs to shift away from coercion and punishment and towards inducement and reward The remarkable thing is that although we already have the necessary knowledge it s not put to good use Taking a fresh approach Graham Cliff draws on mainstream behavioural psychology and applied ethics to make his case for challenging some of our time honoured cultural assumptions and practices Be prepared to re think your position Despite the weightiness of the subject this is a book for everyone because it works up from first principles in a readily readable way No expertise is needed to follow the flow from the basics of human nature to the way our minds work then through the web of customs and rules that make up society on to government laws and punishment and finally to how and why things might be done differently Nobody will agree with everything that A Fundamental Mistake has to say because that s what debate is all about However it s as well to remember this when it comes to tackling antisocial behaviour it s not enough just to get tough we must get clever too

*Rationality and the Ideology of Disconnection* Michael Taylor,2006-07-24 A powerful and provocative critique of the foundations of Rational Choice theory and the economic way of thinking about the world written by a former leading practitioner The target is a dehumanizing ideology that cannot properly recognize that normal people have attachments and commitments to other people and to practices projects principles and places which provide them with desire independent reasons for action and that they are reflective creatures who think about what they are and what they should be with ideals that can shape and structure the way they see their choices The author s views are brought to bear on the economic way of thinking about the natural environment and on how and when the norm of fair reciprocity motivates us to do our part in cooperative endeavors Throughout the argument is adorned by thought provoking examples that keep what is at stake clearly before the reader s mind

Engaging Public Sector Clients John Alford,2009-04-08 Exploring three rich cases across three countries this book shows how government organizations need their clients to contribute time and effort to co producing public services and how organizations can better elicit this work from them by providing good client service and appealing to their intrinsic needs and social values
