Bible and Bedlam Louise J. Lawrence, 2018-08-23 Bible and Bedlam first critically questions the exclusion and stereotyping of certain biblical characters and scholars perceived as mad as such judgements illustrate the sanism prejudice against individuals who are diagnosed or perceived as mentally ill perpetuated within the discipline of Western biblical studies Second it seeks to highlight the widespread ideological gatekeeping protection and policing of madness in both western history and scholarship with regard to celebrated biblical figures including Jesus and Paul Third it initiates creative exchanges between biblical texts interpretations and contemporary voices from mad studies and sources autobiographies memoirs etc which are designed to critically disturb disrupt and displace commonly projected and often pejorative assumptions surrounding madness Voices of those subject to diagnostic labelling such as autism schizophrenia and or psychosis are among those juxtaposed here with selected biblical interpretations and texts

From a Gadfly to a Hornet Deron Boyles, Kenneth J. Potts, 2016-10-03 This book examines Hart's career as a teacher editor journalist lecturer and public philosopher It explores his commitment to academic freedom humanizing education and community organizing The book highlights Hart's advocacy for democratic growth in education and his success in challenging ideas and promoting open debate

Jewish Intellectuals and the University M. Morris, 2006-12-11 Marla Morris explores Jewish intellectuals in society and in the university using psychoanalytic theory Morris examines Otherness as experienced by Jewish intellectuals who grapple with anti-Semitism within the halls of academia She claims that academia breeds uncertainty and chaos

The Academic Caesar Steve Fuller, 2016-09-19 Aimed

directly at those who aspire to be university leaders in these turbulent times and written as an academic counterpart to Machiavelli's *The Prince*. *The Academic Caesar* explores four themes that are central to the contemporary university: its Caesar leaders, its economics, its disciplines, and whether academics have a future in the universities. Drawing on a wealth of experience writing about the social epistemology of higher education, Steve Fuller makes a witty, robust, and provocative contribution to the ongoing debate about where the university has come from and where it is going. *The Academic Caesar* will prove a fascinating read for those seeking new insights into current crisis in higher education as well as researchers and academics interested in the sociology of leadership. *Decolonizing Foreign Language Education* Donald

Macedo, 2019-01-10 *Decolonizing Foreign Language Education* interrogates current foreign language and second language education approaches that prioritize white western thought. Edited by acclaimed critical theorist and linguist Donald Macedo, this volume includes cutting edge work by a select group of critical language scholars working to rigorously challenge the marginalization of foreign language education and the displacement of indigenous and non-standard language varieties through the reification of colonial languages. Each chapter confronts the hold of colonialism and imperialism that inform and shape the relationship between foreign language education and literary studies by asserting that a critical approach to applied linguistics is just as important a tool for FL/ESL/EFL educators as literature or linguistic theory.

Establishing Telemedicine in Developing Countries: From Inception to Implementation Rifat Latifi, 2006-07-15 Telemedicine and telehealth development has brought hope to developing countries and their most remote areas yet leaves very significant questions and anxiety among those hoping to maintain status quo of current medical practices. When it comes to telemedicine and its applications, most countries are actually in the same boat. Even in the most developed countries, hospitals, telemedicine is still not practiced. Advanced technology such as computers, diagnostic imaging, robotics, voice-activated machines, and remote controls have changed the hospital and operating room theaters around the western world. Essentially, geography and distance have become abstract nouns and are meaningless in modern times. At the same time, the world equilibrium has not followed the punctuation of an industrial world directed by the broad bandwidth. Nonetheless, the patient has become an educated and informed consumer who questions the decisions of the practitioner and demands explanations and evidence-based medical approaches. The physician's expertise is validated through the Internet and other forms, and the patient insists on care that is up to current world standards. This multiple author book represents a serious attempt to analyze the most important issues in the field of telemedicine and telehealth. It presents concrete assistance to those who would like to explore the possibilities of establishing telemedicine and telehealth in their countries as well as those individuals who would like to establish these programs in developing areas or in countries that simply do not have existing telemedicine networks. **Postcapitalism** Raphael Sassower, 2015-11-17 Debates over the role of government have intensified in the wake of America's deepest financial crisis since the Depression. This book suggests new ways of moving

forward based on the policies and principles that have worked in the past Sassower shows how American pragmatism has guided the more successful financial policies undertaken during the past century This means that from the workplace to foreign aid Americans benefit when they collaborate with each other rather than only pursue their self interest in competitive ways Drawing on thinkers from Adam Smith to Keynes to Bernanke Sassower shows how a new era of postideological capitalism can emerge in the wake of the current economic crisis renewing America s leadership for the future *Back to the University's Future* Steve Fuller,2023-07-08 This volume addresses the central question facing the future of higher education around the world whether and why universities need to exist at all This book accepts the question s premise It is not clear that the university is any longer needed as an institution that is unless its defenders recover what had made the university the revolutionary institution that over the past two centuries has not only defined the shape of modern systematic inquiry but also the distinctiveness of the societies that have housed them In short what is required is a reanimation of the spirit of Wilhelm von Humboldt for our times hence the book s title and subtitle Humboldt was responsible for relaunching the university as the vanguard institution of Enlightenment to which we continue to pay lip service and sometimes not much more than that Admittedly the task of relaunching Humboldt today is made difficult because many of the concrete achievements associated with the Humboldtian university not least academic disciplines and nation states are increasingly seen as problematic if not obsolete However the global reach of the Humboldtian vision in its 19th century and 20th century heyday offers hope that it may be recovered in the 21st century The book focuses on the performative character of the academic vocation what Humboldt memorably characterized as the unity of research and teaching in the same person a role model for students and society at large The book s seven chapters develop this theme in a historically and philosophically nuanced way in terms of the Humboldtian vision of knowledge sense of free expression and critical judgement and commitment to translation and publicity **Strange Love** Robin Truth Goodman,Kenneth J. Saltman,2002 Seeks to answer the question of how varied cultural forms in this case curricula multicultural literature and popular films educate the public ideologically Interrogates the relationship between the political economy of globalization and the new human rights imperialism and the cultural politics that educate the public into complicity with it through such narratives as family war politics privatization and innocence Introduction Immigrant Voices Enrique T. Trueba,Lilia I. Bartolomé,2000 The ethnics are coming and the fear of many observers is that the quality of traditional disciplines will suffer as a result *Immigrant Voices In Search of Pedagogical Reform* is a new book which shows that such fear is unfounded Ethnic scholars of international repute come together in this new collection of essays to meditate upon the single most important social phenomena in America today Immigration Due to the ever increasing ethnic diversity in today s school populations the need to explore this issue has become more critical than ever Giving voice to a broad range of complex experiences contributors from China Taiwan Mexico Argentina Spain and Slovakia provide insight into the numerous obstacles immigrants must overcome in

order to succeed in both the academy and society at large Offering broad theoretical perspectives as well as powerful and unforgettable personal narratives this book serves as a invaluable resource for continued efforts toward educational equity

Prairie Town Jacqueline Edmondson,2003 Like many other agricultural based towns Prairie Town struggled for survival within the context of the on going farm crisis NAFTA neoliberal agricultural policies and growing agribusiness that negatively impacted many farmers throughout the world

Chomsky on Miseducation Noam Chomsky,2004 In this book Chomsky builds a larger understanding of our educational needs starting with the changing role of schools today yet broadening our view toward new models of public education for citizenship

Pedagogy of Freedom Paulo Freire,2000-12-13 In *Pedagogy of Freedom* Paulo Freire travels ever more deeply into the territory where learning and activism are the essence of human life This profound new book shows why an engaged way of learning and teaching is central to the creation of the individual culture and history Freire finds in today s emerging global society a new context in which education cannot be indifferent to the reproduction of dominant ideologies and the interrogation of them He argues against progressive liberalism and its passive acceptance of a world where unemployment and hunger must inevitably co exist with opulence In so doing he shows why an acceptance of fatalism leads to loss of personal and societal freedom and how those individuals who think without optimism have lost their place in history This book displays the striking creativity and profound insight that characterized Freire s work to the very end of his life an uplifting and provocative exploration not only for educators but for all who learn and live

Imagining Teachers Gustavo Fischman,2000 This book calls for a different understanding of the professional preparation of pre service teachers critically reflecting on issues of caring and gender and challenging the dominance of words only educational research methodologies Using conceptual tools from visual anthropology cultural studies feminism and critical pedagogy Fischman focuses on the educational dilemmas that students and professors in teacher education programs face within institutions that reinforce rather than challenge oppressive class racial ethnic and gender dynamics He pays special attention to the transmission of models of teaching that are invested of essential masculine and feminine patterns that potentially lead to two very distinctive professional careers one that is associated with dedication and care and a second that emphasizes order and command

The Last Good Job in America Stanley Aronowitz,2007-11 Money jobs careers training_all are topics often overheard in the conversation of middle class Americans One of the nation s leading critics of education the world of work and the labor movement Stanley Aronowitz shows how new technologies labor and education all are deeply intertwined in our culture and everyday lives This book reflects Aronowitz s thinking at a time when globalization has brought these connections to broad public attention Aronowitz argues for the decline of the job as the backbone along with family of American society Despite high employment low wages and job insecurity leave many families at or below the poverty line The career instability previously experienced mostly by blue collar workers has spread to middle managers and high level executives caught in the rapid movement of capital and

technologies In light of these facts Aronowitz argues for a new social contract between employers and workers

Confronting Disaster Raphael Sassower, 2004-06-01 Contemporary society is rife with instability Our active and invasive study of genetics has given life to one of the great specters of biological science the clone The scarcity of natural energy sources has led to an increased manipulation of atomic or nuclear energy and regressive environmental policies resulting in a greater sense of danger for everyone The promises of economic globalization have in some cases been delivered but in many other ways globalization has created even greater gaps in social and economic life Despite the expansion of our productive and technological capabilities our workdays grow longer not shorter We find ourselves in exile from our families our friends and from other meaningful forms of social connection And as freedom is bandied about in the popular press and media as the preeminent global social value it actually seems that the reigning contemporary ethos of our time is stress and anxiety While Raphael Sassower's previous work has focused extensively on science and technology this book is significantly different It is an urgent commentary in the tradition of Herbert Marcuse's *One Dimensional Man* or even Sigmund Freud's *Civilization and Its Discontents* a culmination of many years of research and thought carefully arranged into an extended essay on our contemporary social cultural and existential orientation in the modern world This book is written for advanced graduate students informed and concerned citizenry and especially the young student who in the face of mounting anxiety must be able to make critical choices towards an uncertain future *American Book Publishing Record* ,2000 **What's the University For?** ,2000
