Los Mayas De La Gruta De Loltun Yucatan:

Los mayas de la gruta de Loltún, Yucatán Ernesto González Licón, George F. Andrews, 1986 **Los mayas de la gruta de Loltún, Yucatán, a través de sus materiales arqueológicos** Ernesto González Licón, 1986 Images from the Underworld Andrea J. Stone, 2010-07-05 An in depth look at Maya cave painting from Preconquest times to the Colonial period plus a complete visual catalog of the cave art of Naj Tunich In 1979 a Kekchi Maya Indian accidentally discovered the entrance to Naj Tunich a deep cave in the Maya Mountains of El Peten Guatemala One of the world s few deep caves that contain rock art Naj Tunich features figural images and hieroglyphic inscriptions that have helped to revolutionize our understanding of ancient Maya art and ritual In this book Andrea Stone takes a comprehensive look at Maya cave painting from Preconquest times to the Colonial period After surveying Mesoamerican cave and rock painting sites and discussing all twenty five known painted caves in the Maya area she focuses extensively on Naj Tunich Her text analyzes the images and inscriptions while photographs and line drawings provide a complete visual catalog of the cave art some of which has been subsequently destroyed by vandals This important new body of images and texts enlarges our understanding of the Maya view of sacred landscape and the role of caves in ritual It will be important reading for all students of the Maya as well as for others interested in cave art and in human relationships with the natural environment Not only an extraordinarily detailed and insightful analysis of the painted representations and texts found in Naj Tunich but also a complete survey of all known Maya painted caves A major monograph on a major Maya site For completeness of presentation for clarity of writing and for depth and scope of analysis Images from the Underworld is a model of what a final report should be Journal of Anthropological Research Ice Age Cave Faunas of North America Blaine W. Schubert, Jim I. Mead, Russell William Graham, Denver Museum of Nature and Science, 2003-11-10 This book gathers the findings of a number of studies on North American cave paleontology Although not intended to be all inclusive Ice Age Cave Faunas of North America contains contributions that range from overviews of the significance of cave fossils to reports about new localities and studies of specific vertebrate groups These essays describe how cave remains record the evolutionary patterns of organisms and their biogeography how they can help reconstruct past ecosystems and climatic fluctuations how they provide an important record of the evolution of modern ecosystems and even how some of these caves contain traces of human activity The book s eclectic nature should appeal to students professional and amateur paleontologists biologists geologists speleologists and cavers The contributors are Ticul Alvarez Joaquin Arroyo Cabrales Christopher J Bell Larry L Coats Jennifer Glennon Wulf Gose Frederick Grady Russell Wm Graham Timothy H Heaton Carmen J Jans Langel Ernest L Lundelius Jr H Gregory McDonald Jim I Mead Oscar J Polaco Blaine W Schubert Holmes A Semken Jr and Alisa J Winkler **Exploring the Mesoamerican Subterranean Realm** James E. Brady, Cristina Verdugo, 2025-09-01 Exploring the Mesoamerican Subterranean Realm brings together recent work and interpretations on the use of underground cavities by Mesoamerica s pre Columbian cultures

demonstrating their invaluable cultural purpose Case studies from across the region investigate the ways in which these highly charged points in the sacred landscape were the focus of countless political and religious activities The volume expands the study of caves to focus on the broader realm of subterranean space introducing the concept of the constructed subterranean a space in which the Maya deliberately created sacred landmarks through excavation Chapters critically examine chultuns previously thought to be subterranean storage chambers and sascaberas previously considered mines demonstrating that the traditional archaeological models are deeply flawed A wealth of data on both features is used to envision a new sacred landscape filled with thousands of subterranean sacred landmarks Natural caves are also examined a survey conducted around the ancient site of Yaxchilan considers the obvious importance of large stalagmites set up in the site core as monuments Long distance pilgrimages to these caves fundamentally reevaluates the nature of pilgrimage and reveals an economic and political importance that structured settlement and activities around the pilgrimage sites Finally evidence is analyzed to show that the human bones recovered from Midnight Terror Cave Belize were the result of human sacrifice Dealing equally with the archaeology of both natural and constructed subterranean spaces Exploring the Mesoamerican Subterranean Realm challenges preconceived notions of these spaces and their meanings dramatically shifting the field's focus and extending the understanding of the critical importance of this dark side of archaeology

The Exploitation of Raw Materials in Prehistory Xavier Terradas Batlle,Telmo Pereira,2017-11-06 This collection presents state of the art approaches to the use of inorganic raw materials in the period known as prehistory It focuses on stone tools adornments colorants and pottery from Europe America and Africa The chapters intimately merge archaeology anthropology geology geography physics and chemistry to reconstruct past human behaviour economy technology ecology cognition territory and social complexity The book represents a framework of raw material investigation for those working in science regardless of the time period region of the world or materials they are studying

Ancient Mesoamerican Population History Adrian S.Z. Chase,Arlen F. Chase,Diane Z. Chase,2024-05-07 Establishing ancient population numbers and determining how they were distributed across a landscape over time constitute two of the most pressing problems in archaeology Accurate population data is crucial for modeling interpreting and understanding the past Now advances in both archaeology and technology have changed the way that such approximations can be achieved Including research from both highland central Mexico and the tropical lowlands of the Maya and Olmec areas this book reexamines the demography in ancient Mesoamerica Contributors present methods for determining population estimates field methods for settlement pattern studies to obtain demographic data and new technologies such as LiDAR light detecting and ranging that have expanded views of the ground in forested areas Contributions to this book provide a view of ancient landscape use and modification that was not possible in the twentieth century This important new work provides new understandings of Mesoamerican urbanism development and changes over time Contributors Traci Ardren M Charlotte Arnauld Barbara Arroyo

 archaeological researchers current views on the adoption and first use of pottery across the Maya lowlands Covering the
 early Middle Preclassic period when communities began using and producing pottery for the first time roughly 1000 600 BC
 through to the establishment of a recognizably Maya tradition termed the Mamom ceramic sphere about 600 300 BC the
 book demonstrates that the adoption was broadly contemporary with variation in how the new technology was adapted
 locally Analyzing ceramics found at sites in Belize Petén Guatemala and Mexico the contributors provide evidence that the pre
 Mamom expansion of pottery resulted from increased dependence on maize agriculture exploitation of limestone caprock and
 greater reliance on a preexisting system of long distance exchange The chapters describe the individual experiences of new
 potting communities at various sites across the region They are supplemented by appendixes presenting key chronological
 data as well as the principal types and varieties of pre Mamom ceramic complexes across the various spheres Xe Eb Swasey

Pathways to Complexity M. Kathryn Brown, George J. Bey III, 2021-04-27 Pathways to Complexity synthesizes a wealth of new archaeological data to illuminate the origins of Maya civilization and the rise of Classic Maya culture In this volume prominent Maya scholars argue that the development of social religious and economic complexity began during the Middle Preclassic period 1000 300 B C hundreds of years earlier than previously thought Contributors reveal that villages were present in parts of the lowlands by 1000 B C challenging the prevailing models estimating when civilization took root in the area Combining recent discoveries from the northern lowlands an area often neglected in other volumes and the southern lowlands the collection then traces the emergence of sociopolitical inequality and complexity in all parts of the Yucatan peninsula over the course of the Middle Preclassic period They show that communities evolved in different ways due to influences such as geographical location ceramic exchange shell ornament production agricultural strategy religious ritual ideology and social rankings These varied pathways to complexity developed over half a millennium and culminated in the institution of kingship by the Late Preclassic period Presenting exciting work on a dynamic and poorly understood time period Pathways to Complexity demonstrates the importance of a broad comparative approach to understanding Preclassic Maya civilization and will serve as a foundation for future research and interpretation Contributors M Kathryn Brown Dr George Bey III Tara Bond Freeman Fernando Robles Castellanos Tomas Gallareta Negr n E Wyllys Andrews V Anthony Andrews David S Anderson Lauren Sullivan Jaime J Awe James F Garber Mary Jane Acu a William Saturno Bobbi Hohmann
