Classroom Language Jill Richards, 2012

The acquisition and use of language are just as vital to children's learning when the newer classroom methods are being employed as ever they were when the more traditional approaches were being used. Child-centred learning has increasingly influenced language use and language work in the classroom mainly in the primary sector but also in the teaching of English and indirectly in the teaching of other subject areas including the sciences. In this volume the author focuses mainly on the language of subject learning in the secondary schools. She looks critically at some current notions concerned with language and learning and examines their translation into classroom practice. She then develops a picture of the language demands made by other subject areas using collected language material and finally in the light of this evidence she attempts to identify the range of language in everyday use in schools. She goes on to draw conclusions and then makes recommendations. *Routledge Library Editions: Education*
