Molecules of Nature Paul F. Torrence,2017-12-13 Molecules of nature are created by living organisms in their quest to survive and thrive in Earth s challenging environments This ages old evolutionary struggle has produced an immense library of chemicals from which humans have selected invaluable therapeutics critical to modern medicine Natural products presently provide half of all prescription medications and 70% of all cancer drugs The success of continued drug development from natural products depends upon the diversity of molecules of nature which in turn depends upon biodiversity Unfortunately human caused damage to the environment from pollution to habitat loss to overexploitation of resources is causing unprecedented ecological damage and death of species a mass extinction event Unless this biotic crisis is obviated humanity will lose a primary source of future novel medicines This book assembles a powerful argument for

nature's critical role in providing medicines for humanity and how that irreplaceable service is threatened by the extinction crisis. A sampling of the molecules of nature employed in modern medicine reads like a catalog of biodiversity. For example, one of the most prescribed drugs in the United States is lisinopril, which controls high blood pressure. Lisinopril originated from the venom of a deadly viper from the Amazonian forests. A denizen of US southwestern deserts provided a therapeutic for type II diabetes. The ancient horseshoe crab of the US Atlantic coast enables a critical test for deadly endotoxins in medical products of all kinds. Once a diagnosis of acute lymphocytic leukemia in children was a death sentence. A tropical flower from Madagascar provided two natural products that changed a 90% fatality rate to a 90% cure rate. The Pacific Yew tree from the US northwest was discovered to contain the potent anticancer agent Taxol, now vital in the treatment of breast and ovarian cancers and Kaposi's sarcoma. This book tells the fascinating story of these and other medicines. It also summarizes some of the driving forces of the Sixth Mass Extinction and shows how it threatens at least half of the planet's species with extinction. We rightly ask: What will be the future of medicine without the contribution of millions of species? How many treatments for disease will be forever lost? What cures are we asking future generations to forgo? As we willy nilly extinguish the future of one organism after another together with all the knowledge they hold, we are like the looters of the Great Library of Alexandria. The final chapter challenges readers to pursue a different outcome. By uniting our efforts, we can still preserve many of the remaining species on our blue-green planet and the invaluable gifts they offer. **Red Snow**

Michael Slade, 2024-08-06. In this mind-bender about a psychopath seeking revenge, the plot yanks you compulsively toward its solution and the shocks make you jerk back in fright. Toronto Star. The Winter Olympics are coming to western Canada, but the mood is far from celebratory when a snowboarder is murdered on the slopes, his corpse mutilated. And he's only the first athlete to suffer a grisly end. Soon a raging winter storm and a deranged killer's team of mercenaries has cut Whistler Mountain off from the rest of the world. It's a whodunit especially suited to the Special X team, which specializes in psychopathic behavior. Except an old enemy is targeting team commander Robert DeClercq. Bent on bloody revenge, Mephisto has an elaborate plan that includes assassinating anyone connected with the Canadian Mounties. And that's just the start of this megalomaniac's horrific doomsday scheme. Let the games begin. As always with Slade, a cracking good detective story. Anne Perry, New York Times bestselling author of the Thomas Pitt series. **Red Snow** is crisply written, sly, and exciting. Michael Slade is a writer who clearly knows how to tell a story and make it real. Robert McCammon, New York Times bestselling author of *Swan Song* and the Matthew Corbett series. **Red Snow** indeed. This one is guaranteed to keep you awake with the lights burning. The Globe and Mail, Toronto. In the annals of dark fiction, Canada can claim one true champion in Michael Slade. The plot yanks you compulsively toward its solution and the shocks make you jerk back in fright. Toronto Star. Very good twists and a great villain, Mephisto, who seems to have attained a new level of insanity. Is the kind of homicidal maniac you can't take your eyes off. The writing is tight and compelling. Winnipeg Free Press. **The River Sea** Marshall DeBruhl, 2011-11-08

Since its discovery by Europeans in 1500 explorers visionaries soldiers of fortune men of God scientists and slavers have been drawn to the legendary Amazon The River Sea is a sweeping chronicle of those brave and hardy souls ranging from the Spanish seafarer Vicente Pinzón who discovered the river to contemporary heroes and heroines like Sister Dorothy Stang and Chico Mendes whose efforts to save the rain forest cost them their lives Among the vast cast of characters who people this drama of the Amazon are Francisco de Orellana the first European to traverse the river from the Andes to the sea the fiery priest Bartolomé de las Casas defender of the indigenous peoples the great scientist explorers Alexander von Humboldt and Alfred Russel Wallace the madman and psychopath Lope de Aguirre and the Peruvian Evangeline Isabel Godin who in 1769 crossed the continent braving the terrors of the jungles to reunite with her husband whom she had not seen in twenty years The River Sea is a compelling account of five centuries of the history the myths and the legends of Río Amazonas the most exotic and fascinating locale on earth

Light at the Edge of the World Wade Davis, 2009-12-01 For more than 30 years renowned anthropologist Wade Davis has traveled the globe studying the mysteries of sacred plants and celebrating the world's traditional cultures His passion as an ethnobotanist has brought him to the very center of indigenous life in places as remote and diverse as the Canadian Arctic the deserts of North Africa the rain forests of Borneo the mountains of Tibet and the surreal cultural landscape of Haiti In *Light at the Edge of the World* Davis explores the idea that these distinct cultures

represent unique visions of life itself and have much to teach the rest of the world about different ways of living and thinking As he investigates the dark undercurrents tearing people from their past and propelling them into an uncertain future Davis reiterates that the threats faced by indigenous cultures endanger and diminish all cultures Acorns: Windows High-Tide Foghat Joshua Morris,2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around **The**

Maximum of Wilderness Kelly Enright,2012-01-10 Danger in the Congo The unexplored Amazon Long perceived as a place of mystery and danger and more recently as a fragile system requiring our protection the tropical forest captivated America for over a century In *The Maximum of Wilderness* Kelly Enright traces the representation of tropical forests what Americans have typically thought of as jungles and their place in both our perception of wilderness and the globalization of the environmental movement In the early twentieth century jungle adventure as depicted by countless books and films from Burroughs's Tarzan novels to King Kong had enormous mass appeal Concurrent with the proliferation of a popular image of the jungle that masked many of its truths was the work of American naturalists who sought to represent an authentic view of tropical nature through museums zoological and botanical gardens books and film Enright examines the relationship between popular and scientific representations of the forest through the lives and work of Martin and Osa Johnson who with films such as *Congorilla* and *Simba* blended authenticity with adventure as well as renowned naturalists John Muir William Beebe David Fairchild and Richard Evans Schultes The author goes on to explore a startling shift at midcentury in the perception of the tropical forest from the jungle a place that endangers human life to the rain forest a place that is itself endangered

Shamanism and Vulnerability on the North and South American Great Plains Kathleen Bolling Lowrey,2020-12-01 In *Shamanism and Vulnerability on the North and South American Great Plains* Kathleen Bolling Lowrey provides an innovative and expansive study of indigenous shamanism and the ways in which it has been misinterpreted and dismissed by white settlers NGO workers policymakers government administrators and historians and anthropologists Employing a wide range of theory on masculinity disability dependence domesticity and popular children's literature Lowrey examines the parallels between the cultures and societies of the South American Gran Chaco and those of the North American Great Plains and outlines the kinds of relations that invite suspicion and scrutiny in divergent contexts in the Americas power and autonomy in the case of Amerindian societies and weakness and dependence in the case of settler societies She also demonstrates that where stigmatized or repressed in practice dependence and power manifest and intersect in unexpected ways in storytelling fantasy and myth The book reveals the various ways in which anthropologists historians folklorists and other writers have often misrepresented indigenous shamanism and revitalization movements by unconsciously projecting

ideologies and assumptions derived from modern contract societies onto ethnographic and historical realities Lowrey also provides alternative ways of understanding indigenous American communities and their long histories of interethnic relations with expanding colonial and national states in the Americas A creative historical and ethnographical reevaluation of the last few decades of scholarship on shamanism disability and dependence Shamanism and Vulnerability on the North and South American Great Plains will be of interest to scholars of North and South American anthropology indigenous history American studies and feminism

The Architecture of Luxury Annette Condello, 2016-03-16 Over the past century luxury has been increasingly celebrated in the sense that it is no longer a privilege or attitude of the European elite or America's leisure class It has become more ubiquitous and now practically everyone can experience luxury even luxury in architecture Focusing on various contexts within Western Europe Latin America and the United States this book traces the myths and application of luxury within architecture interiors and designed landscapes Spanning from antiquity to the modern era it sets out six historical categories of luxury Sybaritic Lucullan architectural excess rustic neoEuropean and modern and relates these to the built and unbuilt environment taking different cultural contexts and historical periods into consideration It studies some of the ethical questions raised by the nature of luxury in architecture and discusses whether architectural luxury is an unqualified benefit or something which should only be present within strict limits The author argues how the ideas of permissible and impermissible luxury have informed architecture and how these notions of ethical approval have changed from one context to another Providing voluptuous settings for the nobles and the leisure class luxury took the form of not only grand palaces but also follies country and suburban houses private or public entertainment venues and ornate skyscrapers with fast lifts The Architecture of Luxury proposes that in Western societies the growth of the leisure classes and their desire for various settings for pleasure resulted in a constantly increasing level of luxury sought within everyday architecture
