Welch, 2023-05-01 Cultural understandings of well being often differ from scientific measures such as health happiness and affluence For the Indigenous A'uw Xavante people in the tropical savannas of Brazil special forms of intimate and antagonistic social relations camaraderie suffering and engagement with the environment are fundamental aspects of community wellness Anthropologist James R Welch transparently presents ethnographic insights from his long term

fieldwork in two A'uw communities. He addresses how distinctive constructions of age organization contribute to social well-being in an era of major ecological, economic, and sociocultural change. Welch shows how A'uw perspectives on the human life cycle help define ethnic identity, promote cultural resilience, and encourage the betterment of youth. They provide frameworks that people may creatively mobilize to responsibly and respectfully engage with others at different stages of life. They also motivate people to access and manage landscape resources essential to the social construction of good living. Through careful analysis, Welch shows how contemporary traditional peoples can foster enthusiasm for service to family and community amid dominant cultures that prioritize individual well-being. This book is an essential resource for students and scholars interested in sociocultural anthropology, Indigenous cultures, health and culture, and human ecology.
