Mari Et Femme Dans La Societe Paysanne:

Mari et femme dans la société paysanne Martine Segalen, 1980 **Mari et femme dans la société paysanne** Martine Segalen, 1984 La société paysanne en Nouvelle-Castille Marie-Catherine Barbazza, 2000

Aux XVI^e XVII^e siècles le système successoral castillan repose sur le principe d'aînesse et implique par conséquent une division des patrimoines. Dès lors quel pouvait être le sort d'une propriétaire paysanne soumise à un morcellement continu? Le recours au majorat restant exceptionnel dans les campagnes. Grâce à l'analyse minutieuse d'une documentation d'archives et de nature très diverse (partages de biens, testaments, lettres de dot, actes de vente et autres actes notariés et aux nombreux recoupements qui ont pu être effectués) le présent ouvrage met en lumière les mécanismes selon lesquels entre 1580 et 1640 se sont constitués puis transmis un certain nombre de patrimoines paysans situés autour de Pozuelo, un village de Nouvelle Castille proche de Madrid. L'étude des stratégies mises en œuvre pour assurer la continuité des structures familiales et des alliances matrimoniales, lesquelles sont fondées sur l'échange et la réciprocité, permet de démontrer les rouages d'une société paysanne dynamique qui garde soigneusement des individus se préoccupent avant tout de donner au groupe familial les moyens de se perpétuer et de conserver le patrimoine qui garantit sa survie.

Schooling the Daughters of Marianne Linda L. Clark, 1984-01-01

This first book length study of girls' primary education in France gives a concrete picture of how Frenchwomen were and are prepared for their roles in society. Until the 1960s the primary school provided the only formal education for the majority of French children. Long recognized as a major inculcator of patriotic and moral values, the French primary school also played the vital role of preparing girls for their expected adult lives. Linda L. Clark describes in detail this socialization process. By analyzing a wide variety of documents from 1870 to the present (textbooks, curriculum materials, students' notebooks, examination questions, inspectors' reports and teachers' memoirs) she has uncovered not only what was taught to girls but the social and political assumptions that lay behind the primary school's messages about feminine personalities and activities. The book goes on to establish the relationship of feminine images to important aspects of French social, economic and political life. A chapter on the preparation of girls for the world of work, for example, reveals the discrepancy between formal teaching about femininity and women's actual participation in society.

Historical Anthropology of the Family Martine Segalen, 1986-11-28

Over the past decade or so the social scientific/sociological analysis of the family has been obliged to reconsider its traditional view that industrialisation triggered a shift within society from the large family which fulfilled all social functions (from socialising the children to caring for the sick and the old) to the modern nuclear family which was regarded solely as being the locus for emotional relationships. Historians have shown that in the past there was a variety of family structures within a range of varying demographic, economic and cultural frameworks distinctive for each society. At the same time the interaction between sociology and social anthropology has led to a clearer conceptual analysis of that vague, polysemic term 'family' and notions of dwelling, place, descent, marriage, the relative roles of husband and wife and parent-child relations as well as the more general

relations between generations have in a variety of past and present social contexts been taken apart and analysed In this book the author synthesises European and North American historical and social anthropological material on the family that shows the reversal of the frequently held view of the family as an institution in decline showing it instead to be both dynamic and resistant Work Without Wages Jane L. Religious Renewal in France, 1789-1870 Roger Price, 2017-12-04 This book provides a study of the manner in which the Roman Catholic Church in France responded to successive revolutions between 1789 and 1870 as well as to the cultural upheaval associated with accelerating socio economic change It focuses on the Church as an institution engaged in a dynamic process of re Christianization and determined as the only repository of the true faith of Jesus Christ to fortify belief and to combat the Satanic forces of moral corruption and revolutionary chaos and create a counter society the soci t parfaite

Ariès,Michelle Perrot,Georges Duby,1987 Library has Vol 1 5 **Women, Equality, and the French Revolution** Candice E. Proctor,1990-10-24 This volume represents the first book length study of attitudes toward women in revolutionary France Based on extensive research in the libraries and archives of Paris the book examines the impact of the Revolution s ideology of liberty and equality When the men of 1789 wrote the Declaration of the Rights of Man they were thinking in terms of man the male not man the species But there were some men and women who interpreted it in terms of all humanity The outrage of these individuals over what they perceived as a discrepancy between the principles and the practice of the Revolution motivated them to produce some of the most unhesitating declarations of sexual equality that had ever been seen in history Dr Proctor demonstrates however these claims of equality were not simply ignored they were categorically rejected by the mainstream revolutionaries The book examines the typical 18th century concept of women as alien and in some ways inferior beings and traces the striking continuity between pre Revolutionary and Revolutionary thought on the subject Against this background Proctor addresses a number of important questions How widespread was the support for a movement in favor of sexual equality What was the response of the Revolution itself to demands for equal rights for women How did the men of the French Revolution justify the contradiction between their suppression of women and the ideologies for which they claimed to be fighting To arrive at the answers an abundance of material produced in France in the 18th century is identified and analyzed and cited in an extensive bibliography of original sources What finally emerges is not only a clearer picture of the French Revolution and its attitude toward women but a deeper understanding of the ambivalent attitudes toward women that still affect our society today This book will be an important resource for courses in European history the French Revolution and women s studies as well as a valuable reference for college university and public libraries Paysans du Bourbonnais
