Sustainable Leadership for Entrepreneurs and Academics Wadim Strielkowski, 2019-04-25 This proceedings volume focuses on the business models and higher education schemes in various countries that drive sustainable development. Specifically, it combines different approaches to issues such as social practices, educational practices, academic policies, energy, sustainable growth, R D and global security from the point of view of academics, entrepreneurs, policy makers and NGO representatives. Featuring selected contributions presented at the 2018 PRIZK International Conference on Entrepreneurial and Sustainable Academic Leadership ESAL2018 held in the Czech Republic, this book combines contributions from both theory and practice, providing a unique toolbox of policies for entrepreneurs and academics alike. Our quickly globalizing and stratifying world is marked by such processes as economic interconnectedness, digitalization, micro targeting and spillover causation. In such an environment, there is a great need for strategies and tools for securing future sustainable development in both business and education. In this regard, leadership is one of the crucial elements in achieving these goals, seemingly and simultaneously. The goal of the 2018 PRIZK International ESAL Conference and the enclosed contributions is to explore different strategies and policies that drive sustainable development in entrepreneurial and academic leadership. Featuring research from fields such as business, economics, education, social sciences, psychology and behavioral sciences, this book is a useful reference for students, academics, scholars, researchers and policy makers in leadership, entrepreneurship, education and sustainability.
