Globalism in the Middle Ages and the Early Modern Age Albrecht Classen, 2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents Texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different In fact by means of translations and trade for instance global connections were established and maintained over the centuries Archetypal motifs developed in many literatures indicate how much pre modern people actually shared But we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable **On Literary Worlds** Eric Hayot, 2012-11-05 Although literature is not a technology the historical models literary scholars use to describe it owe a great deal to the languages of originality novelty progress and invention that characterize technological development However this guintessentially modern mindset putting progress at the center of historicity makes it difficult for anyone eager to mount a case for why someone interested in the history of modern literary aesthetics ought to read the literature of the non Western world In this groundbreaking book Eric Hayot argues that contemporary debates about world literature and world literary systems can be rethought through an attention to the world creating force of aesthetic objects As he rethinks from the ground up our concepts of literary progress and historicity Hayot re describes the history of modern literature as we know it or as we think we know it developing new concepts and new formal languages to describe the aesthetic physics of the socially and imaginatively possible Connecting this physics to historical shifts in world view ranging from Copernicus to Marx Don Quijote to Battlestar Galactica On Literary Worlds shows how the very notion of the modern is at heart a cosmographical social form and opens vast new directions for the future analysis of the activity and force of literature **Shaping the Future** Horst Hutter, 2006-01-01 Shaping the Future maps out the ascetic practices of a Neitzschean way of life Hutter argues that Nietzsche s doctrines are attempts and temptations that aim to provoke his free spirited readers into changing themselves by putting philosophy into practice in their lives
