(*Routledge Revivals*) Peter Morton, 2014-08-01 In this title first published in 1984 Peter Morton argues that in late Victorian

Britain a group of novelists and essayists quite consciously sought and found ideas in post Darwinian biology that were susceptible to imaginative transformation The period between 1860 and 1900 was a time of great confusion in biology the natural selection hypothesis was in retreat before its acute critics and no extension of evolutionary theory to human affairs was too bizarre to attract its quota of enthusiasts Writers capitalised on this prevailing uncertainty and used it to their own artistic or polemic ends A fascinating and interdisciplinary title this reissue will interest students of late Victorian literature as well as historians of biological theory between The Origin of Species and Mendel *H.G. Wells* Michael Draper, Michael Sherborne, 1987 **Writers, Readers, and Reputations** Philip Waller, 2008 Philip Waller explores the literary world in which the modern best seller first emerged with writers promoted as stars and celebrities advertising both products and themselves **Cahiers Victoriens & Édouardiens**, 1989 **The War of the Worlds** H.G. Wells, 2003-03-17 H G Wells's The War of the Worlds the first story to speculate about the consequences of aliens from Mars with superior technology landing on earth is one of the most influential science fiction books ever written The novel is both a thrilling narrative and an elaboration of Wells's socio political thought on the subjects of imperialism humankind's treatment of other animals and unquestioning faith in military technology and the continuation of the human species This edition's appendices include other related writings by Wells selected correspondence contemporary reviews excerpts from works that influenced the novel and from contemporary invasion narratives and photographs of examples of Victorian military technology *H.G. Wells* Richard Hauer Costa, 1985 He was a great writer who did not always write well He made his reputation with and will be longest remembered for scientific fantasies which he never took seriously He believed that knowledge born of the scientific spirit and buttressed by rational faith would always mark advances and thereby redeem the future
