Postsocial History An Introduction:

Postsocial History Miguel A. Cabrera, 2004-01-01 In *Postsocial History An Introduction* historian Miguel A Cabrera points to the crisis of modernity as a locus for the collapse of social historical models Previously established theories of social change and social relations are proving insufficient calling for the emergence of a new social historical theory By arguing convincingly for the inclusion of language in that model Cabrera awakens a revolutionary new approach to historiography The book will prove indispensable to historians and to social scientists in general who are dissatisfied with the old paradigms and seek new ways of addressing the challenges of social research *A Genealogical History of Society* Miguel A.

Cabrera, 2017-10-27 This book provides a detailed reconstruction of the process of formation of the modern concept of society as an objective entity from the 1820s onwards thus helping to better understand the shaping of the modern world and the nature of the current crisis of modernity The concept has exerted considerable influence over the last two centuries during which time many people have conceived themselves and behave as members of a society and social scientists have explained human subjectivities and conducts as social effects For both groups society exists as a very real phenomenon Historical inquiry shows however that the modern concept of society is no more than a historically contingent way of imagining and making sense of the human world

Deconstructing History Alun Munslow, 2006-04-18 Munslow examines history in the postmodern age He provides an introduction to the debates and issues of postmodernist history He also surveys the latest research into the relationship between the past history and historical practice

The Future of History Alun Munslow, 2010-07-30 In this radical reassessment Alun Munslow challenges conventional notions of history and offers a new vision of historical thinking and practice Deploying a range of concepts such as scepticism aesthetics ethics standpoint irony authorship and a new understanding of truth *The Future of History* examines history as a form of knowledge in itself arguing that in the future the multiple forms of its expression will be as significant as its content This thought provoking challenging and unique book offers a way forward for history after postmodernism and is essential reading for anyone asking the question what is history

The French Nobility in the Eighteenth Century Jay M. Smith, 2006-10-03 Historians have long been fascinated by the nobility in pre Revolutionary France What difference did nobles make in French society What role did they play in the coming of the Revolution In this book a group of prominent French historians shows why the nobility remains a vital topic for understanding France's past *The French Nobility in the Eighteenth Century* appears some thirty years after the publication of the most sweeping and influential revisionist assessment of the French nobility Guy Chaussinand Nogaret's *La noblesse au dix huitième siècle* The contributors to this volume incorporate the important lessons of Chaussinand Nogaret's revisionism but also reexamine the assumptions on which that revisionism was based At the same time they consider what has been gained or lost through the adoption of new methods of inquiry in the intervening years Where in other words should the nobility fit into the twenty first century's narrative about eighteenth century France The

French Nobility in the Eighteenth Century will interest not only specialists of the eighteenth century the French Revolution and modern European history but also those concerned with the differences in and the developing tensions between the methods of social and cultural history In addition to the editor the contributors are Rafe Blaufarb Gail Bossenga Mita Choudhury Jonathan Dewald Doina Pasca Harsanyi Thomas E Kaiser Michael Kwass Robert M Schwartz John Shovlin and Johnson Kent Wright

Practicing History Gabrielle M. Spiegel, 2005 This essential new collection of key articles from critical thinkers and practicing historians focuses on where history is now in terms of its theory and practice For students teachers and historians alike this is an indispensable reader

Folds of Past, Present and Future Sarah Van Ruyskensvelde, Geert Thyssen, Frederik Herman, Angelo Van Gorp, Pieter Verstraete, 2021-09-07 This volume brings together important theoretical and methodological issues currently being debated in the field of history of education The contributions shed insightful and critical light on the historiography of education on issues of de colonization on the historical development of the educational sciences and on the potentiality attached to the use of new and challenging source material

Brian Simon and the Struggle for Education Gary McCulloch, Antonio Fco Canales, Hsiao-Yuh Ku, 2023-09-21 This is the first full length study of the life and career of Brian Simon 1915 2002 leading Marxist intellectual and historian of education in twentieth century Britain Using documentary sources that have only recently become publicly available it reveals the remarkably broad range of Simon's life as student soldier and school teacher Communist Party activist and educational academic campaigner and reformer In a sympathetic biography that yet retains critical distance the authors analyse Simon's contribution to Marxism and the CP explore the influence of both on his work as a historian of education and trace the significance of his Marxist beliefs political associations and historical approach to the cause of educational reform In so doing they consider the full nature and limitations of Simon's achievements in his struggle for education Unlike many Marxist scholars he remained loyal to the CP in the 1950s which damaged his reputation as a public intellectual Nevertheless his support for comprehensive education helped to promote egalitarian educational reforms in Britain although he was later unable to provide sufficient resistance to the 1988 Education Reform Act and to a decline in the position of the comprehensive schools In all this the significance of Simon's family and especially his relationship with his wife Joan is to the fore Joan and Brian forged a formidable 60 year partnership in politics and the CP as well as in life that lasted until Brian's death in January 2002

The Routledge Companion to Historical Studies Alun Munslow, 2006-02 With twenty nine new entries and updated existing ones this new edition provides a much needed critical introduction to the key issues historians and philosophers and their ideas and theories which have prompted the rethinking of history

The End of Conceit Patrick Chabal, 2012-08-23 In this radical new book Patrick Chabal reveals how the future of the West is now inextricably linked to that of the non West The rise of the economic power of China and other Asian countries as well as urgent environmental issues now force the West to think in new ways about how to best face the future This is an issue which runs far deeper than

present debates on the decline of the West might suggest The book argues that the postcolonial challenge from regions such as Asia Africa Latin America and the Middle East as well as the influence of citizens of non Western origins now living in the West have combined to expose the limits of Western rationality that is the theories and concepts we currently use to understand and act upon the world Discussing such provocative questions as Is it a good idea to build mosques in Europe and Is Beckham the new black icon Chabal explores the growing failure of Western social thought to explain many of our most pressing domestic social and economic issues He also discusses contentious issues in international relations such as the spread of democracy and the protection of human rights He concludes that ultimately what the West needs is not more and better theory but an entirely new way of thinking one that will put an end to its current deep seated conceit *Logics of History* William H. Sewell Jr.,2009-07-27 While social scientists and historians have been exchanging ideas for a long time they have never developed a proper dialogue about social theory William H Sewell Jr observes that on questions of theory the communication has been mostly one way from social science to history *Logics of History* argues that both history and the social sciences have something crucial to offer each other While historians do not think of themselves as theorists they know something social scientists do not how to think about the temporalities of social life On the other hand while social scientists treatments of temporality are usually clumsy their theoretical sophistication and penchant for structural accounts of social life could offer much to historians Renowned for his work at the crossroads of history sociology political science and anthropology Sewell argues that only by combining a more sophisticated understanding of historical time with a concern for larger theoretical questions can a satisfying social theory emerge In *Logics of History* he reveals the shape such an engagement could take some of the topics it could illuminate and how it might affect both sides of the disciplinary divide

Writing History Stefan Berger,Heiko Feldner,Kevin Passmore,2020-02-20 The third edition of *Writing History* provides students and teachers with a comprehensive overview of how the study of history is informed by a broader intellectual and analytical framework exploring the emergence and development of history as a discipline and the major theoretical developments that have informed historical writing Instead of focusing on theory this book offers succinct explanations of key concepts that illuminate the study of history and practical writing and demonstrates the ways they have informed practical work This fully revised new edition comprehensively rewrites and updates original chapters but also includes new features such as new chapters on postcolonial environmental and transnational history chapter introductions setting them within the context of historiography a new substantive introduction from the editors providing a useful road map for students an expanded glossary In its new incarnation *Writing History* is more than ever an invaluable introduction to the central debates that have shaped history *A Divided Republic* Emile Chabal,2015-04-02 A bold interpretation of contemporary French political culture that uses current political debates to understand how the French engage with politics *Post-Western Sociology - From China to Europe* Laurence Roulleau-Berger,Li Peilin,2018-05-15 This book is rooted in an epistemological

approach to sociology in which the boundaries between Western and non Western sociologies are acknowledged and built on. It argues that knowledge is organised in conceptual spaces linked to paradigms and programmes which in turn are linked to ethnocentred knowledge processes that until recently Western approaches including Post Colonial French Social Science and American approaches have dominated non Western theories and that Western theories have sometimes seemed incapable of explaining phenomena produced in other societies. It goes on to argue that the blurring of boundaries between Western and non Western sociologies is very important and that such a Post Western approach will mean co production and co construction of common knowledge, the recognition of ignored or forgotten scientific cultures and a global change in sociology which imposes theoretical and methodological detours, displacements, reversals and conversions. The book brings together a wide range of Western and Chinese sociologists who explore the consequences of this new approach in relation to many different issues and aspects of sociology.

Mastery and Lost Illusions Włodzimierz Borodziej, Stanislav Holubec, Joachim Puttkamer, 2014-10-15. This volume highlights the specific experiences and challenges of modernity in twentieth century Eastern and Central Europe. Contributors ask how spatial and temporal conditions shaped the region's transformation from a rural to an urban industrialized society in this period and investigate the state's role in the mastery of space, particularly in the context of state socialism. The volume also sheds light on the ruralization of cities and mutual perceptions of the rural and urban populations in this region.

Minor Knowledge and Microhistory Sigurdur Gylfi Magnusson, David Olafsson, 2016-10-04. This book studies everyday writing practices among ordinary people in a poor rural society in the 19th and early 20th centuries. Using the abundance of handwritten material produced, disseminated and consumed some centuries after the advent of print as its research material, the book's focus is on its day-to-day usage and on minor knowledge, i.e. text matter originating and rooted primarily in the everyday life of the peasantry. The focus is on the history of education and communication in a global perspective. Rather than

engaging in comparing different countries or regions the authors seek to view and study early modern and modern manuscript culture as a transnational or transregional practice giving agency to its ordinary participants and attention to hitherto overlooked source material Through a microhistorical lens the authors examine the strength of this aspect of popular culture and try to show it in a wider perspective as well as asking questions about the importance of this development for the continuity of the literary tradition The book is an attempt to explain the nature of the literary culture in general how new ideas were transported from one person to another from community to community and between regions essentially the role of minor knowledge in the development of modern men *The Workers' State* Mark Pittaway, 2010-11-23 In 1956 Hungarian workers joined students on the streets to protest years of wage and benefit cuts enacted by the Communist regime Although quickly suppressed by Soviet forces the uprising led to changes in party leadership and conciliatory measures that would influence labor politics for the next thirty years In *The Workers State* Mark Pittaway presents a groundbreaking study of the complexities of the Hungarian working class its relationship to the Communist Party and its major political role during the foundational period of socialism 1944-1958 Through case studies of three industrial centers Ujpest Tatabánya and Zala County Pittaway analyzes the dynamics of gender class generation skill level and rural versus urban location to reveal the embedded hierarchies within Hungarian labor He further demonstrates how industries themselves from oil and mining to armaments and textiles possessed their own unique labor subcultures From the outset the socialist state won favor with many workers as they had grown weary of the disparity and oppression of class systems under fascism By the early 1950s however a gap between the aspirations of labor and the goals of the state began to widen In the Stalinist drive toward industrialization stepped up production measures shortages of goods and housing wage and benefit cuts and suppression became widespread Many histories of this period have focused on Communist terror tactics and the brutal suppression of a pliant population In contrast Pittaway's social chronicle sheds new light on working class structures and the determination of labor to pursue its own interests and affect change in the face of oppression It also offers new understandings of the role of labor and the importance of local histories in Eastern Europe under communism **America's Forgotten Middle East Initiative** Andrew Patrick, 2015-06-25 Sent to the Middle East by Woodrow Wilson to ascertain the viability of self determination in the disintegrating Ottoman Empire the King Crane Commission of 1919 was America's first foray into the region The commission's controversial recommendations included the rejection of the idea of a Jewish state in Syria US intervention in the Middle East and the end of French colonial aspirations The Commission's recommendations proved inflammatory even though its counsel on the question of the Palestinian mandate was eventually disregarded by Lloyd George and Georges Clemenceau in favour of their own national interests In the ensuing years the Commission's dismissal of claims by Zionist representatives like David Ben Gurion on their right to Palestine proved particularly divisive with some historians labeling it prophetic and accurate and others arguing that Commission members were biased and ill informed

Here in the first book length analysis of the King Crane report in nearly 50 years Andrew Patrick chronicles the history of early US involvement in the region and challenges extant interpretations of the turbulent relationship between the United States and the Middle East

Indian Work Daniel H. Usner, 2009-08-27 Representations of Indian economic life have played an integral role in discourses about poverty social policy and cultural difference but have received surprisingly little attention Daniel Usner dismantles ideological characterizations of Indian livelihood to reveal the intricacy of economic adaptations in American Indian history
