Power The Party Changing Faces Of Communism In Western Europe:

Power and the Party Keith Middlemas, 1980 Efter en indledning om Kominternperioden Den Kommunistiske Internationale koncentrerer forfatteren sig om udviklingen inden for de vesteuropæiske kommunistpartier efter 2. Verdenskrig. Der er separate kapitler om udviklingen inden for kommunistpartierne i Frankrig Italien Spanien og Portugal på grundlag af mange kilder og interviews med partimedlemmer m.v. *Liberal Parties in Western Europe* Emil J. Kirchner, 1988-11-03 This book is a comparative study of liberal parties in Western Europe examining the role and development of liberal parties within individual countries their internal party structure and organization electoral audience coalitions and government participation party programmes and strategies and international and cross national links

The Decline Of The World Communist Movement Heinz Timmermann, 2019-07-11 International Communism today is split on a number of ideological and political issues and is incapable of the kind of unified action implied by the term movement. So argues Heinz Timmermann in this assessment of the current state of world Communism. Dr Timmermann discusses the historical concept of a world Communist movement in connection with the USSR and China. Focusing on Communism in the West he examines such diverse groups as the Communist parties in Italy France Portugal Cyprus Chile and Japan. Communist parties in the West are increasingly adjusting their policies to better fit their own cultures and the author links this independence to the emphasis the Soviet Union's Communist Party has been placing on the specifically Russian character of the October Revolution and Soviet state interests. Apparently Moscow is now showing some flexibility in its response to tendencies toward differentiation and pluralism within the system of Communist parties. Gorbachev is less concerned with ideological orthodoxy than with Communists effectively supporting Soviet foreign policy. The author argues that by acceding to the concept of unity in diversity Gorbachev is signaling that the Soviet leadership is willing to look beyond the myth of a world Communist movement.

The Spirit of '68 Gerd-Rainer Horn, 2008-10-02 In virtually all corners of the Western world 1968 witnessed a highly unusual sequence of popular rebellions. In Italy France Spain Vietnam the United States West Germany Czechoslovakia Mexico and elsewhere millions of individuals took matters into their own hands to counter imperialism capitalism autocracy bureaucracy and all forms of hierarchical thinking. Recent reinterpretations have sought to play down any real challenge to the socio-political status quo in these events but Gerd Rainer Horn's book offers a spirited counterblast. 1968 he argues opened up the possibility that economic and political elites on both sides of the Iron Curtain could be toppled from their position of unnatural superiority to make way for a new society where everyday people could for the first time become masters of their own destiny. Furthermore Horn contends the moment of crisis and opportunity culminating in 1968 must be seen as part of a larger period of experimentation and revolt. The ten years between 1956 and 1966 characterised above all by the flourishing of iconoclastic cultural rebellions can be regarded as a preparatory period which set the stage for the non-conformist cum political revolts of the subsequent red decade 1966-1976. Horn's geographic centres of attention are Western

Europe including the first full examination of Mediterranean revolts and North America He placed particular emphasis on cultural nonconformity the student movement working class rebellions the changing contours of the Left and the meaning of participatory democracy His book will make fascinating reading for anyone interested in this turbulent period and the fundamental changes that were wrought upon societies either side of the Atlantic The French and Italian Communist Parties Cyrille Guiat,2004-08-02 This volume is a systematic comparative study of the French and Italian Communist parties in the period from the early 1960s to the early 1980s **Problems of Communism** ,1990 International Bibliography of Social Science International Committee for Social Science Information and Documentation,1984-03-15 First published in 1984 Routledge is an imprint of Taylor Francis an informa company *European Communism* Ronald Kowalski,2017-09-16 The course of modern European History has been influenced greatly by the challenge of Communism In theory it promised equality and freedom for all In practice it spawned inegalitarian authoritarian and in some instances monstrous regimes in the former Soviet Union and East Europe This study re examines the history of European Communism from its theoretical origins in the work of Marx and Engels in the mid nineteenth century until the dramatic collapse of the Soviet Union in 1991 Ronald Kowalski reappraises Marx s thinking and points out that his intellectual legacy was open to a variety of interpretations often at odds with his own views Kowalski also questions Lenin s professed Marxist credentials and the extent to which his additions to Marxist theory were central to the key issue in the history of Communism why did the egalitarian and libertarian dreams raised by the Russian Revolution degenerate into Stalinist authoritarianism and terror Furthermore why did Communism fail in West Europe while it was able to come to power in East Europe Concluding with an analysis of the revolutions which swept away the Communist regimes in East Europe and two years later in the Soviet Union itself this is an essential introduction to the history of a political force that dominated parts of Europe until the end of the twentieth century **Understanding European Trade Unionism** Richard Hyman,2001-05-09 As one would expect this is a well crafted literate and absorbing account of European trade union development Established scholars and advanced students will enjoy the discussion of theory and cases The Journal of Industrial Relations A detailed and fascinating history of trade unions in the three countries Britain Germany Italy considers how the unions could recover from the intense disarray of recent years Labour Research Everyone concerned over the construction of a truly social Europe will learn much from this thoughtful and probing study Professor Colin Crouch Istituto Universitario Europeo In this comprehensive overview of trade unionism in Europe and beyond Richard Hyman offers a fresh perspective on trade union identity ideology and strategy He shows how the varied forms and impact of different national movements reflect historical choices on whether to emphasize a role as market bargainers mobilizers of class opposition or partners in social integration The book demonstrates how these inherited traditions can serve as both resources and constraints in responding to the challenges which confront trade unions in today s working world Rethinking Security in Post-Cold-War Europe William Park,G.Wyn Rees,2014-06-11 Provides a survey of

the principal items on the agenda following the end of the Cold War focusing upon the institutions and regions where the reconsideration of security issues has been particularly profound The book is organised into three main sections the first examines the changed roles of the main security institutions which have survived the Cold War NATO the European Union Western European Union and the Organisation for Security and Cooperation in Europe The second analyses the Central European countries Russia and States of the former Soviet Union in terms of their ideologies political structures and relationships of the Cold War period Lastly the text examines the northern and southern regions of Europe where quite different perspectives and agendas are concerned

Power, Competition and the State K. Middlemas, 1991-03-21 The best contemporary map available of the British state Peter Hennessy The final volume of Keith Middlemas's acclaimed trilogy shows how after a climactic crisis in the mid 1970s the balance changed between government interest groups political parties and public whose competition had characterised the postwar years and how emergence of new alignments among them altered the British state itself Documented from over three hundred interviews with participants as well as archives it provides an object lesson in contemporary history

Power, Competition and the State Keith Middlemas, 1990-06-18 A study of how World War II British politicians planned a postwar settlement to remedy inadequacies from the interwar years how that settlement was implemented in conditions different from what they had imagined and why it became so criticized that the Macmillan government tried to recreate it

West European Communist Parties after the Revolutions of 1989 Martin J. Bull, Paul M. Heywood, 2016-07-27 This book analyses the impact of the collapse of communism in Eastern Europe and the former Soviet Union on the Communist Parties of Western Europe Seven case studies covering the Italian French Spanish Portuguese Belgian British and German parties provide a tightly argued comparative perspective The conclusion assesses the range of responses to the dramatic events of 1989-91 and likely future direction of the west European communist movement It is argued that whilst it is no longer possible to talk of a coherent family of communist parties various individual parties some of them in revised form may continue to prosper

Communist and Marxist Parties of the World, 1986

The Communist Party in Post-Soviet Russia Luke March, 2002 This pioneering analysis uses the results from the first ever Irish election study to provide a comprehensive survey of the motives outlook and behaviour of voters in the Republic of Ireland Building on the foundations laid down by previous work on comparative electoral behaviour it explores long term influences on vote choice such as party loyalties and enduring values as well as short term ones such as the economy the party leaders and the candidates themselves It also examines how people use their vote and why so many people do not vote at all Many features of Irish elections make such a detailed study particularly important The single transferable vote system allows voters an unusual degree of freedom to pick the candidates they prefer while electoral trends observed elsewhere can be found in a more extreme form in Ireland For example attachment to parties is very low differences between them are often obscure candidate profiles are very high and turnout is falling rapidly However Irish elections defy international trends in

other respects most notably in the degree of personal contact parties and candidates make with their voters Findings are presented in a manner that is highly accessible to anyone with an interest in elections electoral systems and electoral behaviour The book is essential reading for anyone interested in Irish politics and is an important text for students of European Politics Parties and Elections Comparative Politics and Political Sociology [The A to Z of Marxism](#) David Walker, Daniel Gray, 2009-08-13 Marxism one of the few philosophies that turned into an effective movement not so long ago was the official ideology in one form or another of much of humanity It was promulgated initially by the Soviet Union then imposed on much of Central and Eastern Europe later emerged in the People s Republic of China and gradually spread to other parts of Asia and even bits of Africa and Latin America Although declining in its initial popularity it still remains strong in several countries and is supported by numerous communist and other parties and countless individuals around the world The A to Z of Marxism covers the history of Marxism and all its thinkers and schools of thought in a comprehensive manner This is done through a chronology an introductory essay a bibliography and hundreds of cross reference dictionary entries on basic terms and concepts significant thinkers and doers and also the parties and countries that followed it *Historical Dictionary of Marxism* Elliott Johnson, David Walker, Daniel Gray, 2014-09-09 The second edition of the Historical Dictionary of Marxism covers of the basics of Karl Marx s thought the philosophical contributions of later Marxist theorists and the extensive real world political organizations and structures his work inspired that is the myriad political parties organizations countries and leaders who subscribed to Marxism as a creed This text includes a chronology an introductory essay and an extensive bibliography The dictionary section has over 500 cross referenced entries on important personalities both thinkers and doers political parties and movements and major communist or ex communist countries This book is an excellent access point for students researchers and anyone wanting to know more about Marxism **Postwar** Tony Judt, 2006-09-05 Finalist for the Pulitzer Prize Winner of the Council on Foreign Relations Arthur Ross Book Award One of the New York Times s 100 Best Books of the 21st Century Impressive Mr Judt writes with enormous authority The Wall Street Journal Magisterial It is without a doubt the most comprehensive authoritative and yes readable postwar history The Boston Globe Almost a decade in the making this much anticipated grand history of postwar Europe from one of the world s most esteemed historians and intellectuals is a singular achievement Postwar is the first modern history that covers all of Europe both east and west drawing on research in six languages to sweep readers through thirty four nations and sixty years of political and cultural change all in one integrated enthralling narrative Both intellectually ambitious and compelling to read thrilling in its scope and delightful in its small details Postwar is a rare joy **The Red Flag** David Priestland, 2016-05-03 The best and the most accessible one volume history of communism now available A far reaching vividly written account Foreign Affairs In The Red Flag Oxford professor David Priestland tells the epic story of a movement that has taken root in dozens of countries across two hundred years from its birth after the French Revolution to its ideological maturity in nineteenth century Germany to its

rise to dominance and subsequent fall in the twentieth century Beginning with the first modern Communists in the age of Robespierre Priestland examines the motives of thinkers and leaders including Marx Engels Lenin Stalin Castro Che Guevara Mao Ho Chi Minh Gorbachev and many others Priestland also shows how Communism in all its varieties appealed to different societies for different reasons in some as a response to inequalities and in others more out of a desire to catch up with the West But paradoxically while destroying one web of inequality Communist leaders were simultaneously weaving another It was this dynamic together with widespread economic failure and an escalating loss of faith in the system that ultimately destroyed Soviet Communism itself At a time when global capitalism is in crisis and powerful new political forces have arisen to confront Western democracy The Red Flag is essential reading if we are to apply the lessons of the past to navigating the future Detailed and scholarly but written in lively prose this is a rich satisfying account of the most successful utopian political movement in history Publishers Weekly starred review **Toward a Theory of Eurocommunism** Armen Antonian, 1987-04-03
