The Politics of Knowledge Lily M. Hoffman, 1989-01-01 In this book the author examines the question of the compatibility of politics policy making and professional work Based on nineteen case studies of organizations Hoffman looks at what happened as doctors and planners set out to redistribute services to minorities and the poor between 1960 and 1980

Biomedical Ethics Reviews • 1984 James M. Humber, Robert F. Almeder, 1984-11-25 This is the second volume of Biomedical Ethics Reviews a series of texts designed to review and update the literature on issues of central importance in bioethics today Five topics are discussed in the present volume Section I Public Policy and Research with Human Subjects reviews the history of the moral issues involved in the history of research with human subjects and confronts most of the major legal and moral problems involving research on human subjects Questions addressed in this section range from those concerning informed and proxy consent to those dealing with the adequacy of monitoring human research via institutional review boards IRBs Section II deals with a second broad topic in bioethics The Right to Health Care in a Democratic Society Here the concern not merely that of determining whether there is a right to health care but also if there is such a right how it ought best be understood and implemented To answer questions such as these we learn that one must distinguish legal from moral rights assess the merits of various theories of rights clarify the relationship between rights and duties and attempt to determine a just method for the distribution of health care Advances in medical technology often pose new legal and moral problems for legislators and health care practitioners

Public Policy in the United States Mark E. Rushefsky, 2013-07-03 Covering the period up through the 2012 elections this book accomplishes three important goals First it introduces readers to the American approach to public policy making second it surveys American public policy and policymaking in all the major policy areas from economic policy to health care policy to environmental policy and finally the book challenges readers to come to terms with the widely shared but often competing values that must be balanced and rebalanced in the ongoing policy making process The book is well illustrated and includes case studies terms and study questions

Health Politics and Policy Theodor J. Litman, Leonard S. Robins, 1984 This book in its third edition offers readers a comprehensive and analytical overview of the historic and contemporary involvement of government and politics in The development of health policy Chapters are organized around four major areas The first places health politics and policy within a historical social and economic perspective Part two focuses on an exploration of the interface between health policy and the political structure Part three covers the role of public opinion and health interest groups in the formulation of health policy Part four explores the relationship of health policy and the political process in the areas of health care finance access to health care and health care reform as well as mental disability and environmental health

Biomedicine and Alternative Healing Systems in America Hans A. Baer, 2001 Examining medical pluralism in the United States from the Revolutionary War period through the end of the twentieth century Hans Baer brings together in one convenient reference a

vast array of information on healing systems as diverse as Christian Science osteopathy acupuncture Santeria southern Appalachian herbalism evangelical faith healing and Navajo healing In a country where the dominant paradigm of biomedicine medical schools research hospitals clinics staffed by M D s and R N s has been long established and supported by laws and regulations the continuing appeal of other medical systems and subsystems bears careful consideration Distinctions of class Baer emphasizes as well as differences in race ethnicity and gender are fundamental to the diversity of beliefs techniques and social organizations represented in the phenomenon of medical pluralism Baer traces the simultaneous emergence in the nineteenth century of formalized biomedicine and of homeopathy botanic medicine hydropathy Christian Science osteopathy and chiropractic He examines present day osteopathic medicine as a system parallel to biomedicine with an emphasis on primary care chiropractic naturopathy and acupuncture as professionalized heterodox medical systems homeopathy herbalism bodywork and lay midwifery in the context of the holistic health movement Anglo American religious healing and folk medical systems particularly among racial and ethnic minorities In closing he focuses on the persistence of folk medical systems among working class Americans and considers the growing interest of biomedical physicians pharmaceutical and healthcare corporations and government in the holistic health movement

Assessing Contributions/h M. Harvey Brenner, 2019-04-10 The authors of this book provide a systematic integrated review and comparison of the contributions of sociology political science economics demography anthropology history of science and medicine psychiatry and psychology to a number of health related fields including epidemiology health services research and health policy studies The book reflects the authors attitude that multidisciplinary research efforts must be carried out in order to obtain a thorough understanding of the relationship of social science knowledge to health problems

Building a New Biocultural Synthesis Alan H. Goodman, Thomas Leland Leatherman, 2010-03-23 Anthropology with its dual emphasis on biology and culture is or should be the discipline most suited to the study of the complex interactions between these aspects of our lives Unfortunately since the early decades of this century biological and cultural anthropology have grown distinct and a holistic vision of anthropology has suffered This book brings culture and biology back together in new and refreshing ways Directly addressing earlier criticisms of biological anthropology *Building a New Biocultural Synthesis* concerns how culture and political economy affect human biology e g people s nutritional status the spread of disease exposure to pollution and how biological consequences might then have further effects on cultural social and economic systems Contributors to the volume offer case studies on health nutrition and violence among prehistoric and historical peoples in the Americas theoretical chapters on nonracial approaches to human variation and the development of critical humanistic and political ecological approaches in biocultural anthropology and explorations of biological conditions in contemporary societies in relationship to global changes *Building a New Biocultural Synthesis* will sharpen and enrich the relevance of anthropology for understanding a wide variety of struggles to cope with and combat persistent human suffering

It should appeal to all anthropologists and be of interest to sister disciplines such as nutrition and sociology Alan H Goodman is Professor of Anthropology Hampshire College Thomas L Leatherman is Associate Professor of Anthropology University of South Carolina
