An Anthropology of Robots and AI Kathleen Richardson, 2015-02-11 This book explores the making of robots in labs at the Massachusetts Institute of Technology MIT It examines the cultural ideas that go into the making of robots and the role of fiction in co-constructing the technological practices of the robotic scientists The book engages with debates in anthropological theorizing regarding the way that robots are reimagined as intelligent autonomous and social and weaved into lived social realities Richardson charts the move away from the worker robot of the 1920s to the social one of the 2000s as robots are reimagined as companions friends and therapeutic agents

Humans and Robots Sven Nyholm, 2020-03-09 Can robots perform actions make decisions collaborate with humans be our friends perhaps fall in love or potentially harm us Even before these things truly happen ethical and philosophical questions already arise The reason is that we humans have a tendency to spontaneously attribute

minds and agency to anything even remotely humanlike Moreover some people already say that robots should be our companions and have rights Others say that robots should be slaves This book tackles emerging ethical issues about human beings robots and agency head on It explores the ethics of creating robots that are or appear to be decision making agents From military robots to self driving cars to care robots or even sex robots equipped with artificial intelligence how should we interpret the apparent agency of such robots This book argues that we need to explore how human beings can best coordinate and collaborate with robots in responsible ways It investigates ethically important differences between human agency and robot agency to work towards an ethics of responsible human robot interaction
