Reconceptualizing Qualitative Research Mirka

Koro-Ljungberg, 2015-03-25 Reconceptualizing Qualitative Research Methodologies without Methodology calls for qualitative research that is complex situational theoretically situated and yet productive Author Mirka Koro Ljungberg challenges ideas about data research design and researcher responsibility that are often taken for granted provoking readers to rethink beliefs paradigms processes and methodological frameworks Written in a clear conversational style the book compels readers to think about qualitative research differently often in creative ways and to continuously question existing narratives and dogmas

Leadership Ethics Terry L. Price, 2008-07-03

Are leaders morally special Is there something ethically distinctive about the relationship between leaders and followers Should leaders do whatever it takes to achieve group goals Leadership Ethics uses moral theory as well as empirical research in psychology to evaluate the reasons everyday leaders give to justify breaking the rules Written for people without a background in philosophy it introduces readers to the moral theories that are relevant to leadership ethics relativism amoralism egoism virtue ethics social contract theory situation ethics communitarianism and cosmopolitan theories such as utilitarianism and transformational leadership Unlike many introductory texts the book does more than simply acquaint readers with different approaches to leadership ethics It defends the Kantian view that everyday leaders are not justified in breaking the moral rules

The Oxford Handbook of the History

of Ethics Roger Crisp, 2013-01-31 Philosophical ethics consists in the human endeavour to answer rationally the fundamental question of how we should live The Oxford Handbook of the History of Ethics explores the history of philosophical ethics in the western tradition from Homer until the present day It provides a broad overview of the views of many of the main thinkers schools and periods and includes in addition essays on topics such as autonomy and impartiality The authors are international leaders in their field and use their expertise and specialist knowledge to illuminate the relevance of their work to discussions in contemporary ethics The essays are specially written for this volume and in each case introduce the reader to the main lines of interpretation and criticism that have arisen in the professional history of philosophy over the past two or three decades

Structuring Mind Sebastian Watzl, 2017

What is attention How does attention shape consciousness In an approach that engages with foundational topics in the philosophy of mind the theory of action psychology and the neurosciences this book provides a unified and comprehensive answer to both questions Sebastian Watzl shows that attention is a central structural feature of the mind The first half of the book provides an account of the nature of attention Attention is prioritizing it consists in regulating priority structures Attention is not another element of the mind but constituted by structures that organize integrate and coordinate the parts of our mind Attention thus integrates the perceptual and intellectual the cognitive and motivational and the epistemic and practical The second half of the book concerns the relationship between attention and consciousness Watzl argues that attentional structure shapes consciousness

into what is central and what is peripheral The center periphery structure of consciousness cannot be reduced to the structure of how the world appears to the subject What it is like for us thus goes beyond the way the world appears to us On this basis a new view of consciousness is offered In each conscious experience we actively take a stance on the world we appear to encounter It is in this sense that our conscious experience is our subjective perspective

The Bloomsbury Encyclopedia of Utilitarianism James E. Crimmins, 2017-01-26 The idea of utility as a value goal or principle in political moral and economic life has a long and rich history Now available in paperback The Bloomsbury Encyclopedia of Utilitarianism captures the complex history and the multi faceted character of utilitarianism making it the first work of its kind to bring together all the various aspects of the tradition for comparative study With more than 200 entries on the authors and texts recognised as having built the tradition of utilitarian thinking it covers issues and critics that have arisen at every stage There are entries on Plato Epicurus and Confucius and progenitors of the theory like John Gay and David Hume together with political economists legal scholars historians and commentators Cross referenced throughout each entry consists of an explanation of the topic a bibliography of works and suggestions for further reading Providing fresh juxtapositions of issues and arguments in utilitarian studies and written by a team of respected scholars The Bloomsbury Encyclopedia of Utilitarianism is an authoritative and valuable resource

Amartya Sen and Rational Choice Mark Peacock, 2019-09-18 Are human beings motivated exclusively by self interest The orthodox theory of rational choice in economics thinks that they are Amartya Sen disagrees and his concept commitment is central to his vision of an alternative to mainstream rational choice theory This book examines commitment as it has evolved in Sen s critique of orthodox rational choice theory The in depth focus on commitment reveals subtleties in the concept itself as well as in its relationships with other concepts which Sen develops in his critique of rational choice theory for example preference sympathy weakness of will agency personhood social norms rights self welfare goal and self goal choice The book provides a comprehensive understanding of commitment and offers novel interpretations of the term as a way of strengthening its plausibility Broadly in support of Sen s conceptualization of rational choice the book nevertheless reveals ambiguities and weaknesses in Sen s conceptual framework and it reformulates Sen s concepts when doing so strengthens the claims he makes The book also engages with critics of Sen and argues for the importance of commitment as a component in the theory of rational choice

Why It's OK Not to Think for Yourself Jonathan Matheson, 2023-09-29 We tend to applaud those who think for themselves the ever curious student for example or the grownup who does their own research Even as we re applauding however we ourselves often don t think for ourselves This book argues that s completely OK In fact it s often best just to take other folks word for it allowing them to do the hard work of gathering and evaluating the relevant evidence In making this argument philosopher Jonathan Matheson shows how expert testimony and the wisdom of crowds are tested and provides convincing ideas that make it rational to believe something simply because other people believe it Matheson then takes on philosophy s

best arguments against his thesis including the idea that non self thinkers are free riding on the work of others Socrates claim that the unexamined life isn t worth living and that outsourcing your intellectual labor makes you vulnerable to errors and manipulation Matheson shows how these claims and others ultimately fail and that when it comes to thinking we often need not be sheepish about being sheep Key Features Discusses the idea of not thinking for yourself in the context of contemporary issues like climate change and vaccinations Engages in numerous contemporary debates in social epistemology Examines what can be valuable about thinking for yourself and argues that these are insufficient to require you to do so Outlines the key practical takeaways from the argument in an epilogue The Maturing of Monotheism Garth Hallett,2019-01-24 Tracing a dialectical path The Maturing of Monotheism emphasises the plausibility of Jewish Christian Muslim and kindred forms of monotheism and responds to anti theistic challenges of our day These include materialism determinism the denial of objective value the pervasiveness of evil and predictions of human individual and collective extinction The book reviews traditional metaphysical ways of arguing for monotheism but employs a cumulative more experiential approach While agnosticism affects humanity s most basic beliefs Garth Hallett demonstrates that there remains ample room for rational theistic faith Of keen interest to students and researchers alike The Maturing of Monotheism offers new insights and approaches in this steadily advancing field **Answering the Music Man** B. Kyle Keltz,Tricia Scribner,2020-05-29 Dan Barker ex preacher and co founder of the Freedom From Religion Foundation travels widely arguing in debates and speaking on his beliefs that Christianity is false God does not exist and the Bible is filled with errors and mythology He has been touted as one of America s leading atheists Yet close examination of his arguments shows that Barker s reasons for disbelief are poorly reasoned and miss the mark as they are aimed at a mistaken caricature of Christian theism Answering the Music Man exposes Barker s misunderstandings of Christianity and provides compelling answers to Barker s arguments Towards a History of Consciousness Vwadek P. Marciniak,2006 Towards a History of Consciousness Space Time and Death offers a cogent and compelling discussion of the neglected topic of the history of consciousness An analysis of our postmodern ontology reveals deep but neglected roots What are those roots and how did they grow Is there a self without consciousness What is the relation of the self to the individual Does the recognition of death contribute to the growth of consciousness As a survey of western history this work pushes the boundaries of the understanding of consciousness in intriguing and sometimes provocative directions This integrative study is intended for the serious curious student and thinker **Beyond Ethics to Post-Ethics** Peter Baofu,2011-02-01 Is moral goodness really so desirable in the way that its proponents through the ages would like us to believe For instance in our time there is even this latest version of the popular moral idea shared by many when Dalai Lama suggested that we need these human values of compassion and affection Even without religion we have the capacity to promote these things WK 2009 The naivety of this popular moral idea can be contrasted with an opposing critical idea advocated not long ago by Sigmund Freud 1966 who once wrote that men

are not gentle creatures who want to be loved and who at the most can defend themselves if they are attacked they are on the contrary creatures among whose instinctual endowments is to be reckoned a powerful share of aggressiveness As a result their neighbor is for them someone who tempts them to satisfy their aggressiveness on him to exploit his capacity for work without compensation to use him sexually without his consent to seize his possessions to humiliate him to cause him pain to torture and to kill him Homo homini lupus Contrary to the two opposing sides of this battle for the high moral ground morality and immorality are neither possible nor desirable to the extent that their respective ideologues would like us to believe But one should not misunderstand this challenge as a suggestion that ethics is a worthless field of study or that other fields of study related to ethics like political philosophy moral psychology social studies theology or even international relations should be dismissed Needless to stress neither of these two extreme views is reasonable either Instead this book provides an alternative better way to understand the nature of ethics especially in relation to morality and immorality while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other This book offers a new theory to transcend the existing approaches in the literature on ethics in a way not thought of before This seminal project is to fundamentally alter the way that we think about ethics from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate

Rethinking Security in Nigeria Dapo Adelugba, Ogo Ujumu, 2007-05-15 Rethinking Security in Nigeria adopts an alternate conceptual and methodological framework for rethinking national security in Nigeria by using the humanities multidisciplinary perspective against the backdrop of the hitherto restrictive analysis of the nature of national security By expounding the largely unexplored cosmological conceptual ethical and aesthetic dimensions as key contributors to national survival and social integration the volume argues systematically for a basic redefinition of the meanings of security the value of life government action and social re engineering in order to create a new system of social order an integration The authors attempt to extend the boundaries of previous theorizing on security by identifying alternate ethical and aesthetic approaches to national reconciliation and human development in present day Nigeria which faces major security challenges requiring the clarification of the basis for developing a just and harmonious society The study is a contribution to the quest for defining the vital socio cultural norms and doctrinal imperatives needed for responsible cooperative human action It examines the roles of dominant works of philosophy literature plays and performances in the creation of a basis for political stability and social reconciliation in the society It extends the boundaries of previous aesthetic studies and redefines the roles of ethics and aesthetics as crucial contributors to security human development and world civilisation

Physicalism and Mental Causation Sven Walter, Heinz-Dieter Heckmann, 2015-11-04 Physicalism the thesis that everything there is in the world including our minds is constituted by basic physical entities has dominated the philosophy of mind during the last few decades But although the

conceptual foundations of the physicalist agenda including a proper explication of notions such as causation determination realization or even physicalism itself must be settled before more specific problems e g the problems of mental causation and human agency can be satisfactorily addressed a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency written by established and leading authors in the field
