**Reading Development and Difficulties** David A. Kilpatrick, R. Malatesha Joshi, Richard K. Wagner, 2019-09-25 This book provides an overview of current research on the development of reading skills as well as practices to assist educational professionals with assessment prevention and intervention for students with reading difficulties. The book reviews the Componential Model of Reading (CMR) and provides assessment techniques, instructional recommendations, and application models. It pinpoints specific cognitive, psychological, and environmental deficits contributing to low reading skills so educators can accurately identify student problems and design and implement appropriate interventions. Chapters offer methods for assessing problems in decoding, word and sound recognition, and comprehension. In addition, chapters emphasize the recognition of student individuality as readers and learners from understanding distinctions between difficulties and disabilities to the effects of first language orthography on second language learning. Topics featured in this book include: Learning the structure of language at the word level; Reading comprehension and reading comprehension difficulties; Assessing reading in second language learners; Effective prevention and intervention for word level reading difficulties; The neurobiological nature of developmental dyslexia. **Reading Development and Difficulties** is a must-have resource for researchers, practitioners, and graduate students in varied fields including child and school psychology, assessment, testing, and evaluation, social work, and special education. I think the book has the potential to be a game changer. It will certainly challenge the expectations of policy makers, not to mention the teachers of beginning readers. These chapters will enhance the knowledge base of those in our schools who are charged with the lofty task of assuring that children have the best possible opportunities to acquire the skill of reading. Sir Jim Rose Chair and author of Independent Review of the Teaching of Early Reading Final Report 2006

**The Psychology of Reading** Mildred C. Robeck, Randall R. Wallace, 2017-11-06 The need to know why, as well as how children and youth respond as they do to reading instruction, has guided the selection of this book's content. The second edition of this title, originally published in 1990, has retained and elaborated upon the three major themes previously presented: that reading is a linguistic process; that motivation in the affective domain may be as important in learning to read as the cognitive domain; and that the reality of learning theory is to be found in the mechanisms of the brain where information is mediated and memory traces are stored. The text integrates views from cognitive psychology, psycholinguistics, and neuropsychology as they relate to reading and writing. A learning motivation model is provided to present associative learning, conceptualization, and self-directed reading in a hierarchical relationship with distinct cognitive and affective components. The distinction between beginning and proficient reading is maintained throughout the text. *Understanding and Teaching Reading Comprehension* Jane Oakhill, Kate Cain, Carsten Elbro, 2014-08-21 The ultimate aim of reading is not the process but to understand what we read, and comprehension can take place at many different levels. There has been an increasing emphasis on the importance of reading comprehension in

recent years but despite this there is very little written on this vital topic accessible to trainee and practicing teachers The Handbook of Reading Comprehension presents an overview of recent findings on reading comprehension and comprehension problems in children It provides a detailed examination of the characteristics of children who have reading comprehension difficulties and examines ways in which comprehension can be supported and improved It is accessibly written for students and professionals with no previous background in the psychology of reading or reading problems This indispensable handbook asks the question what is comprehension The authors consider comprehension of different units of language understanding single words sentences and connected prose and outline what readers and listeners have to do to successfully understand an extended text This book also considers comprehension for different purposes in particular reading for pleasure and reading to learn and explores how reader characteristics such as interest and motivation can influence the comprehension process Different skills contribute to successful reading comprehension These include word reading ability vocabulary knowledge syntactic skills memory and discourse level skills such as the ability to make inferences knowledge about text structure and metacognitive skills The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills or their precursors in pre readers provides the foundation for reading comprehension development Areas covered include Word reading and comprehension Development of comprehension skills Comprehension difficulties Assessment Teaching for improvement Throughout the text successful experimental and classroom based interventions will be highlighted practical tips for teachers and summary boxes detailing key points and explaining technical terms will be included in each chapter
