

A photograph of two golden shoe lasts resting on a large, textured, grey rock. The rock is positioned diagonally across the frame, with its peak towards the top left. The shoe lasts are positioned on the upper part of the rock, one slightly higher and further back than the other. They are both facing towards the right. The background is a plain, light grey wall. The lighting is soft, creating subtle shadows on the rock's surface.

**Nietzsche's Philosophy of Life Affirmation** Michael J. McNeal,2024-12-23 This anthology broadly examines the interrelated roles of art science and experimentation in Nietzsche s philosophical project It is divided into two parts the first organized around the theme of experimentally reconceiving our world the second investigating the aforementioned subjects in Nietzsche s free spirit or middle period works Together the essays comprising the book underscore Nietzsche s concern that experimentation with values ultimately provide humankind with a new wherefore or purpose Wide ranging in its scope this volume brings together a diverse group of scholars working in both the analytic and continental traditions to provide original insights into Nietzsche s thought A unique contribution to the scholarship it deepens understanding of the relationship between Nietzsche s

critiques of art and science the role this relationship plays in his futural thought and the experimental life affirming practices that his free spirit project may enable toward the transfiguration of humankind **The Inhabitable Flesh of Architecture** Marcos Cruz,2017-03-02 Today s architecture has failed the body with its long heritage of purity of form and aesthetic of cleanliness A resurgence of interest in flesh especially in art has led to a politics of abjection completely changing traditional aesthetics and is now giving light to an alternative discussion about the body in architecture This book is dedicated to a future vision of the body in architecture questioning the contemporary relationship between our Human Flesh and the changing Architectural Flesh Through the analysis and design of a variety of buildings and projects Flesh is proposed as a concept that extends the meaning of skin one of architecture s most fundamental metaphors It seeks to challenge a common misunderstanding of skin as a flat and thin surface In a time when a pervasive discourse about the impact of digital technologies risks turning the architectural skin ever more disembodied this book argues for a thick embodied flesh by exploring architectural interfaces that are truly inhabitable Different concepts of Flesh are investigated not only concerning the architectural and aesthetic but also the biological aspects The latter is materialised in form of Synthetic Neoplasms which are proposed as new semi living entities rather than more commonly derived from scaled up analogies between biological systems and larger scale architectural constructs These neoplastic creations are identified as partly designed object and partly living material in which the line between the natural and the artificial is progressively blurred Hybrid technologies and interdisciplinary work methodologies are thus required and lead to a revision of our current architectural practice
