Pain as Human Experience Mary-Jo DelVecchio Good, Paul Brodwin, Byron J. Good, 1994-11-14 With case studies drawn from anthropological investigations of chronic pain sufferers and pain clinics in the northeastern United States the authors attempt to invent new ways of writing about this language resistant human experience Focused on substantive issues in the study of chronic pain their work explores the great divide between the culturally shaped language of suffering and the traditional language of medical and psychological theorizing They argue that the representation of experience in local social worlds is a central challenge to the human sciences and to ethnographic writing and that meeting that challenge is also crucial to the refiguring of pain in medical discourse and health policy debates Anthropologists scholars from the medical social sciences and humanities and many general readers will be interested in *Pain as Human Experience* In addition behavioral medicine and pain specialists psychiatrists and primary care practitioners will find much that is relevant to their work in this book Jacket *Current Catalog* National Library of Medicine (U.S.), 1983 First multi year cumulation covers six years 1965 70 Handbook of Pain and Aging David I. Mostofsky, Jacob Lomranz, 2013-11-11 From time to time professional journals and edited volumes devote some of their pages to considerations of pain and aging as they occur among the aged in different cultures and populations One starts from several reasonable assumptions among them that aging per se is not a disease process yet the risk and frequency of disease processes increase with ongoing years The physical body's functioning and ability to restore all forms of damage and insult slow down the immune system becomes compromised and the slow growing pathologies reach their critical mass in the later years The psychological body also becomes weaker with unfulfilled promises and expectations and with tragedies that visit individuals and families and the prospect that whatever worlds remain to be conquered will most certainly not be met with success in the rapidly passing days and years that can only culminate in death Despair and depression coupled with infirmity and sensory and or motor inefficiency aggravate both the threshold and the tolerance for discomfort and synergistically collaborate to perpetuate a vicious cycle in which the one may mask the other Although the clinician is armed with the latest advances in medicine and pharmacology significant improvement continues to elude her or him The geriatric specialist all too familiar with such realities usually can offer little else than a hortative to learn to live with it but the powers and effectiveness of learning itself have declined **Pain - Its Neurosurgical Management** H. Kravynbühl, P. E. Maspe, W. H. Sweet, 1977-04-04 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1971 *Recent Advances in the Management of Pain* Costantino Benedetti, C. Richard Chapman, Guido Moricca, 1984 **"Camp Pain"** Jean E. Jackson, 2011-06-07 Pain is the most frequent cause of disability in America And pain specialists estimate that as many as thirty to sixty million Americans suffer from

chronic pain Chronic pain is a complex phenomenon often extremely difficult to treat and surprisingly difficult to define Just as medical literature in general neglects the experience of illness so the clinical literature on pain neglects the experience of pain Camp Pain takes an approach different from most studies of chronic pain which are typically written from a medical or social perspective Based on a year s fieldwork in a pain treatment center this book focuses on patients perspectives on their experiences of pain what these experiences mean to them and how this meaning is socially constructed Jackson explores the psychological burden imposed on many sufferers when they are judged not to have real pain and by harsh moral judgments that sufferers are weak malingering or responsible in some way for their pain Jackson also looks at the ways in which severe pain erodes and destroys personal identity studying in particular the role of language While keeping her focus on patients experiences Jackson explores Western concepts of disease health mind and body assumptions about cause and effect and notions of shame guilt and stigma Camp Pain does not attempt to resolve the uncertainties and misperceptions associated with pain but rather aims at enhancing our understanding of the wider implications of chronic pain by focusing on the sufferers themselves

Clinical Behavioral Medicine I.E. Wickramasekera,1988-03-31 This book is an effort to integrate some clinical observations theoretical concepts and promising clinical procedures that relate psychological variables to physiological variables My primary emphasis is on what psychological and behavioral concepts and procedures are most likely to enable us to influence physiological functions The book covers ques tions that have fascinated me and with which I have struggled in daily clinical practice What types of people are most at risk for physical disor ders or dysfunctions Why do some people present psychosocial con flicts somatically and others behaviorally What is the placebo effect and how does it work How do you arrange the conditions to alter maladap tive belief systems that contribute to psychopathology and patho physiology Do beliefs have biological consequences When I was in private clinical practice and even today in my medi cal school clinical practice situation I set aside one day each week to puzzle over the theoretical questions that my clinical experience gener ates Often isolating these underlying theoretical questions provides guidance into the most relevant empirical literature I have found that this weekly ritual which I started in private practice many years ago appears to increase my clinical efficacy or at least makes clinical work more exciting I find the unexamined clinical practice hard to endure Kurt Lewin once said There is nothing so practical as a good theory Anesthesiology and Pain Management T.H. Stanley,M.A. Ashburn,P.G. Fine,2012-12-06 Theodore H Stanley M D Anesthesiology and Pain Management contains the Refresher Course manuscripts of the presentations of the 36th Annual Postgraduate Course in Anesthesiology which took place at The Cliff Conference Center in Snowbird Utah February 22 26 1991 The chapters reflect new data and concepts within the general framework of pain research and basic science clinical topics in pain management The purposes of the textbook are to 1 act as a reference for the anesthesiologists attending the meeting and 2 serve as a vehicle to bring many of the latest concepts in anesthesiology to others within a short time of the formal presentation Each chapter is a brief but

sharply focused glimpse of the interests in anesthesia expressed at the conference This book and its chapters should not be considered complete treatises on the subjects addressed but rather attempts to summarize the most salient points This textbook is the ninth in a continuing series documenting the proceedings of the Postgraduate Course in Salt Lake City We hope that this and the past and future volumes reflect the rapid and continuing evolution of anesthesiology in the late twentieth century ix list of Contributors Ashburn Michael A Department of Anesthesiology University of Utah Salt Lake City Utah Basbaum Allan Department of Anatomy Physiology University of California San Francisco San Francisco California Bonica John J Department of Anesthesiology The University of Washington Seattle Washington Cousins Michael J

Reconstructive Neurosurgery Wen-Ta Chiu, Ming-Chien Kao, Ching-Chang Hung, Shinn-Zong Lin, Han-Jung Chen, Simon F. T. Tang, Barry J. Hoffer, Yung-Hsiao Chiang, 2009-01-22 International experts present in this volume advances in reconstructive neurosurgery focusing on the fields of neurotrauma and neurodegenerative disorders The highlights include building an international strategy for risk reduction documentating an multidisciplinary approach towards restoration of function in paraplegic spinal cord injured patients describing a new approach for statistical analysis in traumatic brain injury trials describing blood flow changes in diffuse brain injury discussing rehabilitation programs in Germany following acute brain injury describing research data form Taiwan on neurotrauma showing the neuropsychiatric effects from deep brain stimulation fro ovement disorders difining the role played by imanging for deep brain stimulation targeting in mental illness using radiosurgery in decompresssion in the treatment of trigeminal neuralgia describing the development of radiosurgery from brain to the spine listing new transgenic animal models of Parkinson s disease discussing gene therapy for neuropathic pain and Parkinson s disease and finally discussing constrained induced movement therapy fro stroke patients and endovascular therapy for cerebrovenous disorders *The Opiate Receptors* Gavril Pasternak, 2013-04-17 The growth of the opiate field over the past decade has been enor mous Initial interest focused upon the strategic clinical impor tance of morphine and its analogs but the discovery of the enkephalins and the other endogenous opioid peptides with their widespread actions within brain has expanded the field to investi gators in almost all areas of neuroscience as well as pharmacol ogy Unfortunately this field of research with its vast literature has become progressively more complex The receptors are no longer limited to opiates but include many subtypes selective for the opioid peptides Indeed they might be better termed opioid rather than opiate receptors Many controversies have emerged and been settled others remain Early studies must now be inter preted on the basis of current information Thousands of papers examining various aspects of opiates and the endogenous opioids present separate pieces of a large puzzle The goal of this volume is to put the pieces together to give a coherent overview of opiate receptor pharmacology and to provide insights into both the mo lecular and classical pharmacology of opiates and the opioid pep tides The issue of multiple classes of opiate and opioid peptide re ceptors and their importance in understanding mechanisms of ac tion provides the major focus of the book The study of

opiates and opioid peptides provides a unique research opportunity in the neuropharmacology of drug receptors *Muscle Pain, Myofascial Pain, and Fibromyalgia* Leonardo Vecchiet, Maria Adele Giamberardino, 1999-10-15 Discover new findings on musculoskeletal pain from experts around the world This comprehensive book gives you new insights into musculoskeletal disorders which are among the major sources of chronic pain and disability Although much remains to be explored in the muscle pain domain the results of the many studies conducted have undoubtedly led to an improvement in diagnostic tools and knowledge about pathophysiological mechanisms of the various syndromes Muscle Pain Myofascial Pain and Fibromyalgia is a comprehensive update on the latest developments in musculoskeletal pain and a valuable point of reference for both patients and scientists in this field Muscle Pain Myofascial Pain and Fibromyalgia Recent Advances covers the developments in musculoskeletal pain research that were presented at the MYOPAIN 98 Congresses in Silvi Marina Italy This work explores the results of basic and applied research regarding soft tissue pain with a strong focus on skeletal muscle physiology and related clinical syndromes Muscle Pain Myofascial Pain and Fibromyalgia offers you the widest possible range of topics in the context of muscle pain disorders as well as a variety of clinical and experimental approaches to the different aspects of the problem This important and informative book also gives you a detailed account of the Consensus Meeting on Diagnostic Criteria of Myofascial Pain Syndromes which was held at the end of the Congress Some of the topics related to musculoskeletal pain that you will explore in Muscle Pain Myofascial Pain and Fibromyalgia include neurogenic inflammation in muscle pain treating myofascial pain by reducing activity of trigger points and tender spots using specific drugs and physical therapy therapeutic approaches to muscle pain for patients with myoarthropathies neurochemical pathogenesis of fibromyalgia syndrome treatments for fibromyalgia syndrome such as the use of amitriptyline 2 6 and cyclobenzaprine 7 11 findings on tests to identify myofascial pain syndrome and fibromyalgia differential diagnosis problems when chronic myalgia is not the main symptom because other infective ailments such as Lyme disease or HIV are prevalent and may cause myalgia to become a secondary diagnosis As a health care professional or someone who suffers from musculoskeletal pain you will discover that the findings in Muscle Pain Myofascial Pain and Fibromyalgia are invaluable for your use and the continued clinical and basic research of this growing field Best Practices in Clinical Chiropractic Robert D.
