Regional Development In A Global Economy The Multinational Corporation Technology And Andean Integration:

Regional Development in a Global Economy Lynn Krieger Mytelka, 1979-01-01 **Transnational Corporations and Regional Economic Integration** Peter Robson, 1993 Regional Integration and Foreign Direct Investment Centre for Economic Policy Research (Great Britain), National Bureau of Economic Research, 1997 *The Oxford Handbook of International Business* Alan M. Rugman, Thomas L. Brewer, 2001-08-30 The Handbook comprises 28 original chapters from the world's leading scholars in the field. United these reflect both the present structure of the field and the major intellectual issues of current and likely future interest. About the Series Oxford Handbooks in Business Management bring together the world's leading scholars on the subject to discuss current research and the latest thinking in a range of interrelated topics including Strategy, Organizational Behavior, Public Management, International Business and many others. Containing completely new essays with extensive referencing to further reading and key ideas, the volumes in hardback or paperback serve as both a thorough introduction to a topic and a useful desk reference for scholars and advanced students alike.

Multinational Enterprise and Economic Analysis Richard E. Caves, 1996-01-26 This book surveys the contributions that economic analysis has made to our understanding of why multinational enterprises exist **USITC Publication**, 1998

The Economic Implications of Liberalizing APEC Tariff and Nontariff Barriers to Trade, 1998 **The Challenge Of The New International Economic Order** Edwin P. Reubens, 2019-07-11 This volume deals with the recent proposals in the United Nations and elsewhere for reconstructing the existing economic relations between less developed and more developed countries. The contributors to the book undertake to clarify the NIEO proposals, asking specifically to what extent they are really new, fully international, realistically economic, and are the constituents of workable order. The confrontation of NIEO demands and real world constraints is a leading feature of the book, and each of the chapters deals with one or more elements of the NIEO proposals against the background of relevant conditions in both the countries and the international institutions and practices that interrelate them. The authors arrive at a considerable degree of consensus, mostly agreeing that the NIEO is not really a new order but endorsing specific NIEO proposals that will achieve gradual progress for LDCs in absolute terms. **The Reconfiguration of Twenty-first Century Latin American Regionalism** Rowan Lubbock, Ernesto Vivares, 2022-11-28 This cutting edge volume brings together a diverse roster of scholars to shed light on the reconfiguration of twenty first century Latin American regionalism. Reflecting on both the multiplicity of regional integration across Latin America, LA and the theoretically pluralist turn in contemporary scholarship on LA politics and International Relations, this edited volume proposes an integrative pluralist methodology to deciphering the complexity of regionalisation projects from both above and below. The book charts the contemporary evolution of older regionalisation schemes such as the Common Market of the South, MERCOSUR, as well as more recent twenty first century regional innovations including the Bolivarian Alliance for the Peoples of Our America, Peoples Trade Treaty, ALBA, TCP, Pacific Alliance, AP, and the Union of South American

Nations UNASUR Complementing this more traditional institutional perspective the book also charts the underexplored dynamics of regionalism from below in the context of region wide networks of political organisation among indigenous and peasant movements Set against the backdrop of a more critical reading of the historical origins of regionalism this volume aims to contribute to the ever growing conversation among scholars within and beyond Latin America on the actors processes contradictions and prospects for regional cooperation In offering a more holistic perspective on Latin American regionalism from above and below this volume will be of interest to both newcomers to the field and more seasoned scholars working within across disciplinary boundaries from International Relations and International Political Economy to Historical Sociology and Institutionalism The chapters in this book were originally published as a special issue of Globalizations

Technological Capabilities and Export Success in Asia Dieter Ernst,Tom Ganiatsos,Lynn Mytelka,2003-09-02 What accounts for export success A team of international contributors show that learning and capability formation are critical to sustain competitiveness Through a series of case studies of firms in the textile and garment and electronics industries of five Asian economies Korea Taiwan Thailand Indonesia and Vietnam Technological Capabilities and Export Success in Asia demonstrates that cheap labour combined with currency devaluation is no longer sufficient for export success African Regional Organizations Domenico Mazzeo,1984 Essays examine security political financial and economic organizations in Africa and discuss the problems and prospects of each group **Cooperation among Nations** Joseph M.

Grieco,2018-08-06 In Cooperation among Nations Joseph M Grieco offers a provocative answer to a fundamental question in world politics How does the anarchical nature of the international system inhibit the willingness of states to work together even when they share common interests Grieco examines the capacity of two leading contemporary theories modern political realism and the newest liberal institutionalism to explain national responses to the non tariff barrier codes negotiated during the Tokyo Round of international trade talks According to his interpretation of realist theory Grieco characterizes states as defensive positionalists As such they often fail to cooperate because they fear that a joint endeavor while producing positive gains for all participants might also generate disparities in gains among the partners involved Grieco demonstrates that this realist concept of defensive state positionalism gives rise to a better understanding of the systemic constraints on international collaboration and of the impact of anarchy on states than is offered by neoliberal institutionalism Drawing on previously unreported archival materials Grieco rigorously applies the two theories to an empirical analysis of the cooperative efforts of the United States and the European Community during the 1980s to regulate and reduce non tariff trade barriers through the General Agreement on Tariffs and Trade **Integration and Unequal Development** Dudley Seers,Constantine V. Vaitsos,1980-06-18 **The Political Economy of Regional Cooperation** W. Andrew Axline,1994 This book synthesizes development theory and empirical studies to present a comparative analysis of co operation in four regions in the developing world Asia ASEAN Latin America ANDEAN the Caribbean CARICOM and the South Pacific SPF

The European Economy Christopher M. Dent, 2002-09-11 The shape of the world economy is changing Globalisation and regionalism have led to the development of powerful but interdependent economic blocs Much economic potential has shifted from the Atlantic to the Pacific area In view of this The European Economy argues that economists need a broader worldwide base of information if these processes and their effect on Europe are to be fully understood Topics discussed include Europe s experience of the growing trend of regionalism the single market plans for economic union EU enlargement Europe s triad rivals EU external trade and trade relations technology and innovation environmental issues This fresh approach highlights the issues which will challenge European countries into the twenty first century Southern Africa After Apartheid Bertil Odén, 1993 **The Politics of Transnational Actors in Latin America** Frederick M. Shepherd, 2021-03-30 The Politics of Transnational Actors in Latin America Power from Afar explores the important issues of transnational actors and their influence on institutions and people in Latin America raising profound questions of accountability social justice and sovereignty The text focuses on four particularly significant groups that transcend national boundaries the Catholic Church transnational corporations transnational drug networks and transnational human rights networks By comparing each of their impacts on the region Frederick M Shepherd explores larger questions about transnational power and how it has deeply penetrated the nations of Latin America The book s analysis delves into attempts made over the last 100 years by citizens social movements and governments to reassert a degree of control over these transnational actors setting up a framework to understand how local national and global forces interact in a setting of transnational dominance The volume suggests that local and national groups can use principles and power to bring about equitable and just outcomes in relation to transnational actors and that in some cases transnational actors can be a part of constructive change in Latin America This concise volume will be of interest to students of History Latin American and Caribbean Studies and Political Science as well as those interested in 20th century Latin American politics and political history **International Technology Flows And The Technology Gap** Jan Monkiewicz, 2019-04-01 This book assesses under what conditions and to what extent international technology transfer may contribute to technology gap closure in overall industrial activity It is of particular interest for all developing countries as well as for the socialist countries of Eastern Europe Historical Dictionary of Inter-American Organizations David W. Dent, Larman C. Wilson, 2013-12-11 The Historical Dictionary of Inter American Organizations covers the changing world of inter American and international organizations that have played an important role in bilateral and multilateral efforts to solve a wide range of problems that have confronted the nations of the Western Hemisphere The Latin American region is clearly more integrated regionally and internationally than in previous decades and is better prepared to confront a broad range of problems trade development illicit drugs terrorism and guerrilla activity health environment democratization trade human rights intervention electoral assistance peacekeeping and conflict resolutions migration border conflicts corruption and energy independence that governments and non governmental

organizations face in the 21st century The role of the United States in Latin America has clearly faded since the end of the Cold War and the second edition of this book fills a large void in explaining the complexities of inter American organizations and their activities since the first edition was completed in the late 1990s This updated second edition of Historical Dictionary of Inter American Organizations covers the history of through a chronology an introductory essay appendixes and an extensive bibliography The dictionary section has over 400 hundred cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Inter American Organizations **International Political Economy Yearbook** W. Ladd Hollist, 2020-01-29 The International Political Economy Yearbook will be published annually under the sponsorship of the International Political Economy Section of the International Studies Association at the Department of Political Science Brigham Young University The intent of the series is to describe and explain the structure and the dynamic operation of the international political economy and to explore their political social and economic impact on different countries be they advanced market economies newly industrializing countries or underdeveloped countries This first volume is an overview of the policy and research field of international political economy studies It explores what international political economy is what approaches and theories might broaden and deepen our understanding of the phenomena addressed what perspectives seem inappropriate or misdirected and why neither international relations scholars nor mainstream economists can any longer claim status as senior partners in the community of scholars and policymakers interested in these issues It also addresses major policy problems confronting both advanced and developing countries including commodity trade foreign investment regulation of multinational corporations food shortages and other development problems industrial crises in the United States and Europe international debt and the increased role of the state in different economies
