**The Value of Arts and Culture for Regional Development** Lisbeth Lindeborg, Lars Lindkvist, 2013-08-21 In this new volume 28 Scandinavian researchers and others who are active in arts and culture seek to answer the questions What has been the effect of regional and local investment in arts and culture And what positive and negative experiences have there been This book describes and analyzes the extent to which cultural investments at local and regional levels have stimulated development and led to essential processes of change for the community in general Of special interest is how different places manage to turn the tide What do their development processes involve Which ways and means do they use to go forward in order to change their paths and start anew These are just a few of the important questions addressed in this book One of the most important findings is that while you can never transfer the successful renewal of one place to another like a blueprint certain common patterns in the cultural processes are discernible The contributors to this book show the breadth of theoretical tools that can be used to increase awareness of the significance of culture for regional development Throughout the book readers will find a multitude of theoretical concepts from entrepreneurship theory organizational institutionalism and cultural economy to cultural planning and art management This book will appeal to scholars and practitioners of urban and regional studies and cultural and creative economics

Denmark, 1513-1660 Paul Douglas Lockhart, 2007-08-23 One of the largest states in Europe and the greatest of the Protestant powers Denmark in the sixteenth and seventeenth centuries was at the height of its influence Embracing Norway Iceland portions of southern Sweden and northern Germany the Danish monarchy dominated

the vital Baltic trade However its geopolitical importance far exceeded its modest resources Paul Douglas Lockhart examines the short and perhaps unlikely career of Denmark as the major power of northern Europe exploring its rise to the forefront of European affairs and its subsequent decline in fortunes following its disastrous involvement in the Thirty Years War Using the latest research from Danish and other Scandinavian scholars Lockhart focuses on key issues from the dynamic role of the Oldenburg monarchy in bringing about Denmark's European integration to the impact of the Protestant Reformation on Danish culture The multi national character of the Danish monarchy is explored in depth in particular how the Oldenburg kings of Denmark sought to establish their authority over their sizable and oftentimes contentious Norwegian Icelandic and German minorities Denmark's participation in international politics and commerce is also investigated along with the power struggle between Denmark and its rival Sweden over Baltic dominion and the Danes unique approach to internal governance

*От империй – к империализму. Государство и возникновение буржуазной цивилизации* Борис Кагарлицкий, 2021-12-08 XVIII XIX      *Military Revolution and the Thirty Years War 1618-1648* Olli Bäckström, 2023-11-08

Military Revolution and the Thirty Years War 1618 1648 investigates change and decline in military institutions during a period of protracted and destructive European warfare Conceptual background is provided by the Military Revolution thesis which argues that changes in military technology and tactics drove revolutionary transformation in the way states organised and waged war in the early modern era This transformation of military institutions became evident during the long and destructive Thirty Years War in 1618 1648 The outcome of the Military Revolution was the centralised fiscal military state that possessed a strong claim to the monopoly of violence within its territorial boundaries The book examines how the Thirty Years War accelerated and even initiated transformation in four military institutions that defined land warfare feudal cavalry services militias regular armies and war commissariats The regional scope of the investigation covers the Holy Roman Empire France Spain Portugal Sweden Denmark and the Dutch Republic The book combines military historical inquiry with ancillary sciences of sociology and economics It argues that the Military Revolution of the Thirty Years War stimulated institutions capable of increased complexification and specialisation while curtailing those that were locked in stasis and immutability The institutional legacy of the Thirty Years War was the emergence of complex military organisations that are characteristic to the modern society and its self renewing social subsystems Previous scholarship on the Military Revolution has concentrated on military technicalities and the wider process of early modern state formation This book proposes an alternative way of viewing early modern military transformations from the perspectives of institutions and systems System analytical survey of change and decline in the military institutions of the Thirty Years War introduces qualifications to the Military Revolution theory and offers a novel way of conceptualising early modern military history
