The U.S. Role in a Changing World Political Economy, 1979 Gulf Politics And Economics In A Changing World Michael C Hudson, Marion E Kirk, 2014-03-21 The wave of uprisings that has engulfed the Arab world since 2011 has impacted the Gulf significantly; however, much of the region appears to have remained unscathed. In Bahrain, the regime cracked down on protestors with the help of Saudi forces, and increasing Gulf tensions with Iran, political chaos in Yemen, and rumblings among unemployed youth throughout the Gulf Cooperation Council (GCC) states all complicate the facade of Gulf stability. In addition, ties with the United States appear to be weakening; regional politics are varied and changing, particularly with the rise of India and China. Gulf governance is often oppressive, and GCC economies are even more tied to rentier practices of distribution to keep populations satisfied and in check. *Gulf Politics and Economics in a Changing World* addresses these aspects of political and economic life in the GCC. Iran and Iraq, in order to assess the present situation, it also offers analysis and predictions as to what the future of this important area of the greater Middle East may hold. The volume, which features contributions from some of the best scholars in the field of Gulf studies in the United States, the Middle East, Europe, and Asia, provides an in-depth and critical look at the region.
