## **Abstract**

Global issues are emerged due to the advent of internationalization and interdependence processes. There is a number of global issues prevailing world-wide. The present research paper tries to explore the three way classification of global issues such as inter social, natural social and anthropo-social global problems that may occur as a result of different circumstances. Issues related to Inter-social global are associated to war and peace whereas natural social global problems are related to environmental problems, energy issues, global lack of food, the climate change etc. Global issues such as health care, human rights, education, urbanization etc are classified under anthropo-global issues. This study made an attempt to measure the impact of regional civil protection on the under-research global issues. The major objective of the study is to understand and explore the nature as well as the typology of global concerns. The discussion of this study is based on detailed literature review. This research paper aims to discuss the necessary recommendations that will come as solutions of the under study global issues as well as the role of civil protection in the development policies.

**Spatial Policy in a Divided Nation** Richard T. Harrison, Mark Hart, 2002-09 This re evaluation of the role of regional policy in the UK has been accompanied by a much closer identification of regional policy with national economic policymaking This book drawing upon the contributions of a large number of experts in the field in the UK sets the debate on the future of spatial policy explicitly within the context of the economics and politics of the North South divide Recent policy debates in the United Kingdom have highlighted two major issues which will shape future policy developments and their impact in the 1990s the persistence of pronounced regional economic and social imbalances and the shift away from traditional perceptions of the role of regional policy with a new emphasis on inner city as opposed to regional problems In this collection by leading researchers in the field the role of regional policy in the UK is re evaluated against a background of renewed debate on the economic disparities inherent in the north south divide and an assessment of the implications for future policy

**2014 Annual Provincial And Regional Competitiveness Analysis For Greater China Economies: Development Strategies Under The New Normal** Khee Giap Tan, Randong Yuan, Sangiita Wei Cher Yoong, 2015-11-09 After more than three decades of rapid growth China is now entering into the New Normal Era which will be characterised by slower but sustainable quality growth for several decades to come How China will fare under the New Normal Era matters not only for itself but also for its great impact on global prosperity While presenting as the second instalment of ACI s annual tracking of the dynamics of competitiveness among 34 Greater China economies this volume also includes the results of the inaugural regional competitiveness analysis for five regions of Greater China As regional imbalance in socioeconomic advancement is a serious issue China has to face up to under the New Normal Era the results of such competitiveness analysis at provincial and regional levels offer insights for policy makers to help address concerns associated with the regional disparity in development and facilitate industry leaders

and other stakeholders in identifying challenges and opportunities for sound decision making      *Inequality: Economic and Social Issues* Mats Lundahl, Daniel Rauhut, Neelambar Hatti, 2024-07-18 Inequalities of opportunity affect a person's life expectancy and access to basic services and human rights through discrimination, abuse and lack of access to justice. High levels of inequality of opportunity discourage skill accumulation, choke economic and social mobility and consequently depress economic growth. Inequality also entrenches uncertainty, vulnerability and insecurity, undermines trust in institutions and government, increases social discord and tensions and triggers violence and conflicts. This book presents wide-ranging perspectives on economic inequality as measured by differences in incomes and wealth. The contributors to the book explore how the economy is shaped in such a way as to generate differences in economic and social welfare between individuals, regions and nations. But the book is not limited to economic perspectives; inequality is a many-faceted phenomenon that manifests itself in a number of ways. Thus the book begins with a section which highlights some of the standard features of inequality: class, gender and age. The second section explores the manifestation of inequality in terms of differences in income and wealth. The third section looks at some of the causes of inequality, exploring the effects of discrimination and plunder by those in power. The final section serves to drive home the point that geographic and institutional factors have an important place as well when it comes to shedding light on what equality is, how it manifests itself and what its consequences are. This book will be essential reading for anyone interested in the causes and consequences of economic inequality, including those in economics, sociology, politics and geography.
