Modeling the Regional Economic Impacts of Major New Military Bases, 1983

The Geography of Competition John R. Miron, 2010-03-16 This book provides a comprehensive up to date and expert synthesis of location theory What are the impacts of a firm s geographic location on the locations of customers suppliers and competitors in a market economy How when and why does this result in the clustering of firms in space When and how is society made better or worse off as a result This book uses dozens of locational models to address aspects of these three questions Classical location problems considered include Greenhut Manne Hitchcock Koopmans and Weber Launhardt The book reinterprets competitive location theory focusing on the linkages between Walrasian price equilibrium and the localization of firms It also demonstrates that competitive location theory offers diverse ideas about the nature of market equilibrium in geographic space and its implications for a broad range of public policies including free trade industrial policy regional development and investment in infrastructure With an extensive bibliography and fresh interdisciplinary approach the book will be an invaluable reference for academics and researchers with an interest in regional science economic geography and urban planning as well as policy advisors urban planners and consultants

Regional Development Modeling, Theory and Practice Murat Mikhaïlovich Albegov, International Institute for Applied Systems Analysis. Regional Development Task, 1982

Handbook of Regional and Urban Economics P. Nijkamp, Edwin S. Mills, P. C. Cheshire, 1986 This second volume of the Handbook presents professional surveys of all the important topics in urban economics The first section contains 6 surveys on locational analysis the second 5 surveys of specific urban markets and the third part presents 5 surveys of government policy issues The book brings together exhaustive research by distinguished scholars from many countries It is the only complete survey volume of urban economics and should serve as a reference volume to scholars and graduate students for many years For more information on the Handbooks in Economics series please see our home page on [http www elsevier nl locate hes](http://www.elsevier.nl/locate/hes)

Theories of Local Economic Development James E. Rowe, 2016-12-05 In economic development theory and practice exist as two seemingly separate realities Academics strive to develop or refine theory by drawing on abstract concepts about the way people behave and institutions work while practitioners draw from a stock of experiences By bringing together leading theorists and practitioners such as Blakely Blair McCann Luger Gunder Stough and Stimson this book provides the first comprehensive overview of local economic development theories for over fifteen years It explores the theory behind the key concepts that every economic practitioner must understand and in doing so ties together the various theories from across the disciplines to practice

Empirical Regional Economics Richard S. Conway Jr., 2022-04-23 This

textbook offers an introduction to empirical regional economics including a comprehensive and systematic overview of the fundamentals history development and applications of economic base models It not only provides a sound basis for regional economics and regional economic analysis but it also includes numerous applications of the underlying theory The book has an empirical orientation highlighting the value of observation and testing in order to explain regional economic behavior Theory plays an important role in this study but it is only a starting point The book is divided into three parts the first discusses the economic base theory of regional growth and the empirical evidence supporting it while the second part covers the specification and application of four increasingly complex regional economic models the economic base model the input output model the interindustry econometric model and the structural time series model Lastly the third part presents forty eight regional economic case studies organized under seven headings including economic cycles economic policy and regional forecasting Given its scope the book appeals to upper undergraduate and graduate students majoring in economics economic geography and business as well as to anyone in the private or public sector interested in gaining a better understanding of practical methods of regional economic forecasting and analysis For additional course material please check the author s website <https://www.empiricalregionaleconomics.com>

Economic Models and Policy Dr. Zolo Eyea Alain Remy, Sindongo Valentinus Masonde, Mike Johnson, Zari Kizito, Felix Omondi, 2025-07-11

Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2019

Regional economics an established discipline for several decades has undergone a period of rapid change in the last ten years resulting in the emergence of several new perspectives At the same time the methodology of regional economics has also experienced some surprising developments This fully revised and updated Handbook brings together contributions looking at new pathways in regional economics written by many well known international scholars The aim is to present the most cutting edge theories explaining regional growth and local development The authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas between regional and mainstream economists It will be an essential source of reference and information for both scholars and students in the field

Running the Numbers: A Practical Guide to Regional Economic and Social Analysis: 2014 John Quinterno, 2014-12-18

Through use of practical examples and a plainspoken narrative style that minimises the use of maths this book demystifies data concepts sources and methods for public service professionals interested in understanding economic and social issues at the regional level By blending elements of a general interest book a textbook and a reference book it equips civic leaders public administrators urban planners nonprofit executives philanthropists journalists and graduate students in various public affairs

disciplines to wield social and economic data for the benefit of their communities While numerous books about quantitative research exist few focus specifically on the public sector Running the Numbers in contrast explores a wide array of topics of regional importance including economic output demographics business structure labour markets and income among many others To that end the book stresses practical applications minimises the use of maths and employs extended chapter length examples that demonstrate how analytical tools can illuminate the social and economic workings of actual American regions

Spatial and Regional Analysis Methods in Forestry Economics Alex Obiye, Daniel E. Chappelle, Con H. Schallau, 1986

Targeting Regional Economic Development Stephan J. Goetz, Steven Deller, Tom Harris, 2009-03-25 This book addresses the growing interest in cluster and targeted economic developments reviewing the socioeconomic theoretical foundations of industry targeting and suggesting alternative methods of identifying industries for targeting

Income Elasticity and Economic Development M. Ohidul Haque, 2005-10-24 Income Elasticity and Economic Development Methods and Applications is mainly concerned with methods of estimating income elasticity This field is connected with economic development that can be achieved by reducing income inequality This is highly relevant in today's world where the gap between rich and poor is widening with the growth of economic development Income Elasticity and Economic Development Methods and Applications provides a good example in showing how to calculate income elasticity using a number of methods from widely available grouped data Some of the techniques presented here can be used in a wide range of policy areas in all developed developing and under developed countries Policy analysts economists business analysts and market researchers will find this book very useful

Hidden Markov Models Ramaprasad Bhar, Shigeyuki Hamori, 2006-04-18 Markov chains have increasingly become useful way of capturing stochastic nature of many economic and financial variables Although the hidden Markov processes have been widely employed for some time in many engineering applications e.g. speech recognition its effectiveness has now been recognized in areas of social science research as well The main aim of Hidden Markov Models Applications to Financial Economics is to make such techniques available to more researchers in financial economics As such we only cover the necessary theoretical aspects in each chapter while focusing on real life applications using contemporary data mainly from OECD group of countries The underlying assumption here is that the researchers in financial economics would be familiar with such application although empirical techniques would be more traditional econometrics Keeping the application level in a more familiar level we focus on the methodology based on hidden Markov processes This will we believe help the reader to develop more in depth understanding of the modeling issues thereby benefiting their future research

E-Innovation for Sustainable Development of Rural Resources During Global Economic Crisis Andreopoulou, Zacharoula, 2013-09-30 Implementation of technology into social and economic developments have provided key strengths in improving competitiveness and meeting the demands of modern society for life and the economy including adapting to green development as a means to confront the economic crisis E Innovation for

Sustainable Development of Rural Resources During Global Economic Crisis brings together a multidisciplinary exchange of knowledge on the application of electronic and mobile innovations towards the sustainable development of the economy Providing an opportunity to identify effective e innovation and successful practices this book is essential for researchers students rural developers and academics in the fields of economics sustainable development informatics and the environment

Multiregional Economic Modeling Boris Issaev,1982 *The Theory, Practice and Potential of Regional Development* Kelly Vodden,David J.A. Douglas,Sean Markey,Sarah Minnes,Bill Reimer,2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build **Rational Expectations in Macroeconomic Models** P.

Fisher,2013-04-17 It is commonly believed that macroeconomic models are not useful for policy analysis because they do not take proper account of agents expectations Over the last decade mainstream macroeconomic models in the UK and elsewhere have taken on board the Rational Expectations Revolution by explicitly incorporating expectations of the future In principle one can perform the same technical exercises on a forward expectations model as on a conventional model and more Rational Expectations in Macroeconomic Models deals with the numerical methods necessary to carry out policy analysis and forecasting with these models These methods are often passed on by word of mouth or confined to obscure journals Rational Expectations in Macroeconomic Models brings them together with applications which are interesting in their own right There is no comparable textbook in the literature The specific subjects include i solving for model consistent expectations ii the choice of terminal condition and time horizon iii experimental design i e the effect of temporary vs permanent anticipated vs unanticipated shocks deterministic vs stochastic dynamic vs static simulation iv the role of exchange rate v optimal control and inflation output tradeoffs The models used are those of the Liverpool Research Group in Macroeconomics the London Business School and the National Institute of Economic and Social Research **Handbook on**

Entropy, Complexity and Spatial Dynamics Reggiani, Aura, Schintler, Laurie A., Czamanski, Danny, Patuelli, Roberto, 2021-12-14 This ground breaking Handbook presents a state of the art exploration of entropy complexity and spatial dynamics from fundamental theoretical empirical and methodological perspectives It considers how foundational theories can contribute to new advances including novel modeling and empirical insights at different sectoral spatial and temporal scales
