**Regional Financial Cooperation** Jose Antonio Ocampo, 2007-08-29 A Brookings Institution Press and Economic Commission for Latin America and the Caribbean ECLAC publication Using the experience of postwar Western Europe as a benchmark Jos Antonio Ocampo and his colleagues assess how regional financial institutions can help developing countries often at a disadvantage within the global financial framework finance their investment needs counteract the volatility of private capital flows and make their voices heard The 1997 Asian financial crisis generated extensive debate on the international financial architecture Through this discussion it became clear that services by financial institutions including adequate mechanisms for preventing and managing financial crises and instruments for safeguarding global macroeconomic and financial stability are undersupplied Furthermore private international capital markets provide finance to developing countries in a way that effectively reduces the ability of those

nations to undertake countercyclical macroeconomic policies International capital markets ration out many developing countries particularly the poorest from private global capital markets While these deficiencies in the financial architecture are clear the post 1997 debate has done little to evaluate the role that regional institutions could play in improving global financial arrangements Regional Financial Cooperation aims to fill that important gap Contributors include Ernest Aryeetey Institute of Statistical Social and Economic Research University of Ghana Georges Corm Saint Joseph University Beirut Roy Culpeper North South Institute Ottawa Ana Teresa Fuzzo de Lima Institute of Development Studies University of Sussex Stephany Griffith Jones Institute of Development Studies University of Sussex Julia Leung Hong Kong Monetary Authority Jos Luis Machinea ECLAC Jae Ha Park Korean Institute of Finance Yung Chul Park Korea University Fernando Prada FORO Nacionall International Lima Guillermo Rozenwurcel School of Politics and Government University of San Martin Argentina

Innovation, Regional Integration, and Development in Africa Samuel Ojo Oloruntoba, Mammo Muchie, 2018-07-26 This edited volume discusses the role of innovation and regional integration in economic development in Africa Over the past five decades post colonial African countries have struggled to break loose from the trap of poverty and underdevelopment through the adoption of various development strategies at regional national and continental levels However the results of both national and regional efforts at advancing development on the continent have been mixed Although the importance of agglomeration and fusion of institutions have long been recognized as possible path to achieving economic development in Africa the approach to regionalism has been unduly focused on market integration while neglecting other dimensions such as social policy mobility of labor educational policy biotechnology regional legislation manufacturing innovation and science and technology This volume investigates the link between innovation regional integration and development in Africa arguing that the immediate and long term development of Africa lies not just in the structural transformation of its economies but in the advancement of scientific and innovation capacities The book is divided into four parts Part I addresses the theoretical and conceptual underpinnings of innovation and regional integration in Africa Part II presents case studies which examine how regional economic institutions are fostering innovation in Africa Part III of the book deals with sectoral issues on innovation and integrated development in Africa Part IV sets the future research on innovation regional integration and development in Africa Combining theoretical analysis and a comparative interdisciplinary approach this volume is appropriate for researchers and students interested in economic development political economy African studies international relations agricultural science and geography as well as policymakers in regional economic communities and the African Union The Regional Integration Manual Philippe De Lombaerde, Renato Flores, Lelio Iapadre, Michael Schulz, 2012-03-29 The Regional Integration Manual brings together different methods for monitoring and analysing regional integration processes in a systematic way Employing a multi disciplinary approach it seeks to provide officials in regional organisations researchers in think tanks academics and students worldwide with an accessible set of both quantitative and qualitative tools useful in their

day to day work The Manual addresses an increasing demand for such tools in a world where mechanisms and ideas for effective regional government and governance are in dire need whereas the monitoring and analytical capabilities of official and non governmental actors often lag behind It also addresses a rapidly growing academic community studying the determinants depth speed and other characteristics of regional integration and co operation Employing a multi disciplinary approach The Regional Integration Manual will be of interest to scholars of governance and regional politics as well as policy makers and those in regional organisations

**Mapping Agency** Ulrike Lorenz-Carl, Martin Remppe, 2016-05-13 Despite regionalism having developed into a global phenomenon the European Union EU is still more often than not presented as the role model of regionalism whose institutional designs and norms are adopted by other regional actors and organizations as part of a rather passive downloading process Reaching beyond such a Eurocentric perception Mapping Agency provides an empirically rich African perspective on regionalisms in Sub Saharan Africa It adopts an actor centred approach but departs from a rather simplified understanding of agency as exerting power and instead scrutinizes to what extent actors actually participate in or are excluded from processes of regionalism The value of this volume derives from the inclusion of historical dimensions its open multi actor approach to both formal and informal processes and its comparative perspective within but also beyond Sub

Saharan Africa The chapters offer a multifaceted picture of agency beyond disciplinary divides where the EU is one actor amongst many and where local national regional and global state and non state actors shape and sometimes break processes of regionalisms in Sub Saharan Africa
