Regressive Taxation And Welfare State Path Dependence And Policy Diffusion:

Regressive Taxation and the Welfare State Junko Kato, 2003-09-01 Government size has attracted much scholarly attention Political economists have considered large public expenditures a product of leftist rule and an expression of a stronger representation of labour interest Although the size of the government has become the most important policy difference between the left and right in post war politics the formation of the government's funding base is also important Junko Kato finds that the differentiation of tax revenue structure is path dependent upon the shift to regressive taxation Since the 1980s the institutionalisation of effective revenue raising by regressive taxes during periods of high growth has ensured resistance to welfare state backlash during budget deficits and consolidated the diversification of state funding capacity among industrial democracies This book challenges the conventional wisdom that progressive taxation goes hand in hand with large public expenditures in mature welfare states and qualifies the partisan centred explanation that dominates the welfare state literature

The Political Economy of Europe's Incomplete Single Market David Howarth, Tal

Sadeh, 2014-04-10 Progress in European market integration over the past two decades has come at the expense of growing flexibility or differentiation in the laws that govern the Single Market SM as well as the way that these laws are implemented This volume examines how the completion of the SM has been held back in the varied implementation of European Union competition policy variation in national policies on services corporate law telecommunications energy taxation and gambling and the EU's uneven transportation network These sectors and issue areas form the frontier at which the main political struggles over the future shape of the SM have taken place in the past decade Broadly progress in economic integration in the EU has been complicated by the need to reconcile perfection to the SM with the global competitiveness of European producers and efficiency gains with ideational and normative concerns In services there is a clash between deregulation and social policy Financial integration has had to reconcile different institutionalized views among the member states about the place of finance in the economy and society The SM notion supposedly entails a concrete set of substantive policy commitments that form the basis of the ever closer union However increasing differentiation in the SM undermines the identification of the EU's core constitutional commitments This book was published as a special issue of the Journal of European Public Policy

The 2012 Dominican Tax Reform in Historical and Regional

Context James E. Mahon Jr., 2015-04-07 In November 2012 publicly worried about a large fiscal deficit the new government

of President Danilo Medina passed a tax reform. The move was preceded by technical discussions with the International Monetary Fund (IMF), consultations with various social and economic interests, and the convocation for just over two weeks of the new Economic and Social Council. Many factors pointed to the success of a major reform. The President's party, the Dominican Liberation Party (Partido de la Liberación Dominicana, PLD), enjoyed an overwhelming majority in the Senate and, along with its allies, a clear majority in the House of Representatives. The 2030 National Development Strategy, publicly discussed at length during the period 2010-11 and signed into law on the first day of 2012 by the previous government, also of the PLD, had set fiscal revenue levels above those recorded in 2011-12. However, despite the obvious need, the international support, the fresh mandate of the President, and the undisputed control of almost all the formal seats of power in the country, the reform was rightly called half of a reform or even a missed opportunity. Why? Is another large reform possible in the coming years? This paper attempts to answer these questions through an analysis of the political economy of the tax reforms, with reference to Dominican history as well as to the regional context. Finally, the paper focuses on the relationship between the executive and the interests of the private sector and its possible mediation through the political parties, and as was done too hastily in October 2012, civil society forums such as the CES. The first part outlines the major tax reforms that took place in the Dominican Republic between its democratic opening in 1978 and the 2012 efforts, along with the political and economic conditions in each case, with a special focus on the 1992 reform. Next, the document describes the rigidities that accumulated during that period, which were the legacy of crisis, international commitments, and the goals of the ambitious tax revenue goals of the National Development Strategy. The second and longest section describes the regional debate on tax policy and redistribution, while showing how the Dominican Republic is situated in this scenario, with statistics on the fiscal performance of the Dominican Republic and other Caribbean and Central American countries. From there, with the ground prepared, the paper narrates the process of the 2012 reform and investigates the question posed above by comparing different episodes of fiscal reform. Finally, the paper discusses the challenges and possibilities for future reforms, from narrow technical ones to those that would involve a broad and reciprocal process, with a focus on the role that could be played by fiscal pacts.

The Spanish Fiscal Transition Sara Torregrosa Hetland, 2021-09-18. This book provides an analysis of the process and outcomes of the tax reform, with a focus on progressivity, redistribution, and inequality. Between 1977 and 1986, Spain underwent a comprehensive tax reform, which shaped its fiscal system until today. It was made in connection with the transition to democracy and indeed was understood as a fundamental part of the political change. The book situates the reform both within Spanish history and international trends in tax systems and connects it to the expansion of the welfare state and regional decentralization in Spain. The analysis reveals that the tax system failed to attain progressivity and significant levels of fraud had a noticeable impact on inequality. Because of this, fiscal redistribution remained limited. In the new political economy of the second globalization, late democratic and fiscal transitioners were unable to emulate the path of

the welfare state forerunners The Rise of the Value-Added Tax Kathryn James,2015-04-30 This book explores one of the most significant trends in the evolution of global tax systems by asking how within less than half a century the value added tax VAT has risen from relative obscurity to become one of the world's most dominant revenue instruments Despite its significance very little is known about why so many countries have adopted the VAT and in particular why different countries adopt the types of VAT that they do The popular mythology provides that the merits of the VAT have underpinned its global spread however this book contends that much scholarship confuses the question of why the VAT has risen to dominance with the issue of what makes a good VAT This book combines policy and legal analysis to propose a new way of understanding the rise of this important revenue instrument so as to better reflect the realities of the VATs that are actually implemented

Handbook on the Politics of Taxation Hakelberg, Lukas ,Seelkopf, Laura,2021-09-14 This comprehensive Handbook provides an insight into the main concepts and academic debates on taxation from a political science perspective Providing a background to current debates on green taxation taxation and inequality taxation and gender tax evasion and avoidance and tax compliance it offers potential avenues for future research Studies in the History of Tax Law, Volume 3 John Tiley,2009-09-17 This work on the history of tax law presents the papers delivered at the third Tax Law History Conference in 2006 organised by the Centre for Tax Law in the Law Faculty at Cambridge University The papers deal with a range of topics and though the breadth of topics is broad it is not devoid of pattern The majority of the papers deal with themes connected with continental Europe law and empire international law and the problems of progression and the tax system As a whole the papers by leading tax scholars from all over the world once again illustrate a wide variety and depth of learning on tax history and highlight the important issues waiting to be investigated in this rapidly growing field of scholarship Fair Enough? Charlotte Cavallé,2023-09-21 Fair Enough proposes and tests a new framework for studying attitudes toward redistributive social policies These attitudes the book argues are shaped by at least two motives First people support policies that increase their own expected income Second they support policies that move the status quo closer to what is prescribed by shared norms of fairness In most circumstances saying the fair thing is easier than reasoning according to one's pocketbook But there are important exceptions when policies have large and certain pocketbook consequences people take the self-interested position instead of the fair one Fair Enough builds on this simple framework to explain puzzling attitudinal trends in post industrial democracies including a decline in support for redistribution in Great Britain the erosion of social solidarity in France and a declining correlation between income and support for redistribution in the United States *The Politics of Budgets* Christine S. Lipsmeyer,Andrew Q. Philips,Guy D. Whitten,2023-03-23 While governments prefer to alter budgets to fit their ideological stances the domestic and international contexts can facilitate or constrain behavior The Politics of Budgets demonstrates when governments do and do not make preferred budgetary changes It argues for an interconnected view of budgets and explores both the reallocation of expenditures across policy areas and the interplay

among budgetary components While previous scholars have investigated how politics and economics shape a single budgetary category or collective categories this methodologically rich study analyzes data for thirty three countries across thirty five years to provide a more comprehensive theoretical approach a holistic framework about the competition and contexts around the budgetary process and an of examination of how and when these factors affect the budgetary decision making processes
