*Memoir of a Broken Brain* Kimberly Faye, 2011-11-23. Journey with Kimberly through one crisis that set her up for failure and another life altering experience that remapped her brain for success. Had the road sign read 'Take a sharp right turn here and follow the path to your life altering destiny' I would have turned and gone in another direction. The path was marked with two color coded shapes: the green circle indicated a widely groomed easy trail and the blue square led to an intermediate slope. I needed the green trail that led to the lodge at the bottom of the mountain. I had taken a hard fall on the catwalk and wasn't feeling so good. To get to the trail I needed to take a sharp right turn. The only problem was I suddenly

didn't know what right meant I could not find my right side Everything right was gone Kimberly fell into her defining role and life's purpose quite literally when she skied over a cliff and sustained a traumatic brain injury TBI One day Kimberly was a vibrant career woman who enjoyed a successful lifestyle and an active social life The next she had to learn basic life skills to survive Kimbberlys quest for survival sent her in search of the missing pieces of her past She learned that survival is a multifaceted anvil that shapes our decisions and forges our future Merely existing then becomes a double edged sword you may have managed to keep breathing but are you really living The only way for survival to triumph is to acknowledge the role of fear in the face of crisis affirmed fear liberates coddled fear incapacitates Denial keeps us stuck

**Traumatic Brain Injury Rehabilitation** Rudi Coetzer, 2006 Clinical neuropsychology and neuro rehabilitation are disciplines that have truly developed at a phenomenal pace over the last couple of decades Practitioners have had to make a continued commitment to staying up to date There are many exciting theoretical clinical and technological developments within the field However central to all of these remains the issue of working with persons who have experienced an extreme life changing experience Often persons struggle to make sense of a traumatic brain injury and live life as it is for them now Because of improved acute medical care there are more survivors of traumatic brain injury today than ever before Traumatic brain injury and the resulting disability constitute a major loss for the individual Assisting persons with coming to terms with the changes after traumatic brain injury is probably one of the essential tasks in many rehabilitation programs taking a longer term view regarding outcome This book represents how neuro rehabilitation has evolved over the past decade and includes exciting new studies in this field
